Global Programme to End Child Marriage Phase III Design Workshop

Meta presentation

Table of contents

Day 1	
Session 1	<u>Setting the scene: Where are we now and where are we going?</u>
Session 2	<u>The global context: Polycrisis megatrends and gender equality</u> <ul style="list-style-type: none">• <u>The case of child marriage in the Arab States region</u>• <u>The case of child marriage in South Asia region</u>
Session 3	<u>A review of the evidence: What works to end child marriage</u>
Session 4	<u>Zooming in, zooming out: Ensuring quality interventions at scale</u>
Session 5	<u>Vision forward: Expectations and suggestions for Phase III from regional and country teams</u>
Day 2	
Session 6	<u>Looking at the data: The latest child marriage trends</u>
Session 7	<u>For lasting change: Expanding gender-transformative approaches</u> <ul style="list-style-type: none">• <u>Global overview</u>• <u>The case of Bangladesh</u>• <u>The case of India</u>• <u>The case of Niger</u>
Session 8	<u>Addressing social norms and other drivers of child marriage: Social and behavior change as a programme approach</u> <ul style="list-style-type: none">• <u>Global overview</u>• <u>Gender norms</u>• <u>The case of WCAR</u>• <u>The case of Ethiopia</u>
Session 9	<u>Maximizing impact: Quality implementation and leveraging services and systems</u> <ul style="list-style-type: none">• <u>The case of Nepal</u>

Table of contents

Day 3	
Session 10	<u>Integrated across the programme cycle: Monitoring, evaluation and learning</u> <ul style="list-style-type: none">• <u>Global overview</u>• <u>Focus on research</u>• <u>Focus on evaluation</u>
Session 11	<u>Crisis-adaptive programming: Practical solutions and adaptations</u> <ul style="list-style-type: none">• <u>Climate change</u>• <u>The case of Burkina Faso</u>• <u>The case of Ethiopia</u>
Session 12	<u>Launching Phase III: Developing a global communications campaign</u>
Session 13	<u>Leaving no one behind: Addressing intersecting vulnerabilities</u> <ul style="list-style-type: none">• <u>Global overview</u>• <u>The case of Ghana</u>• <u>The case of Mozambique</u>• <u>The case of Zambia</u>
Day 4	
Session 14	<u>Phase III acceleration: Innovation solutions for scaling up</u> <ul style="list-style-type: none">• <u>Global review of technology-based interventions</u>• <u>The case of Nepal</u>• <u>The case of Bangladesh</u>• <u>The case of Mozambique</u>

Table of contents

Session 15	<u>Mobilizing for change: Youth-led, feminist and women-led organizations take the lead</u> <ul style="list-style-type: none">• <u>Global overview</u>• <u>The case of the climate movement and the SRHR agenda</u>• <u>Perspective of a youth advocate</u>• <u>Perspective of Girls Not Brides</u>
Session 16	<u>A key intervention to address child marriage: Gender-responsive social protection</u> <ul style="list-style-type: none">• <u>Global overview</u>• <u>The case of Ethiopia</u>• <u>The case of Ghana</u>
Session 17	<u>Accountability in action: Policy and legislative change</u> <ul style="list-style-type: none">• <u>The case of India</u>• <u>The case of Uganda</u>• <u>The case of ESARO</u>
Day 5	
Session 18	<u>What is next?: Areas of agreement for moving forward</u>

Session 1

Setting the scene: Where we are now and where we are going

Speaker:
Nankali Maksud, Global Programme Coordinator

A WORLD AFFECTED BY MEGATRENDS AND POLYCRISIS

Climate change

Inflation

Increasing factionalism
issue for multilateralism

Increasing food
insecurity

The lingering effects
of COVID-19

Fragile and
humanitarian situations

Off track on delivering on
gender equality targets

Threats to democratic rights
and freedom of expression

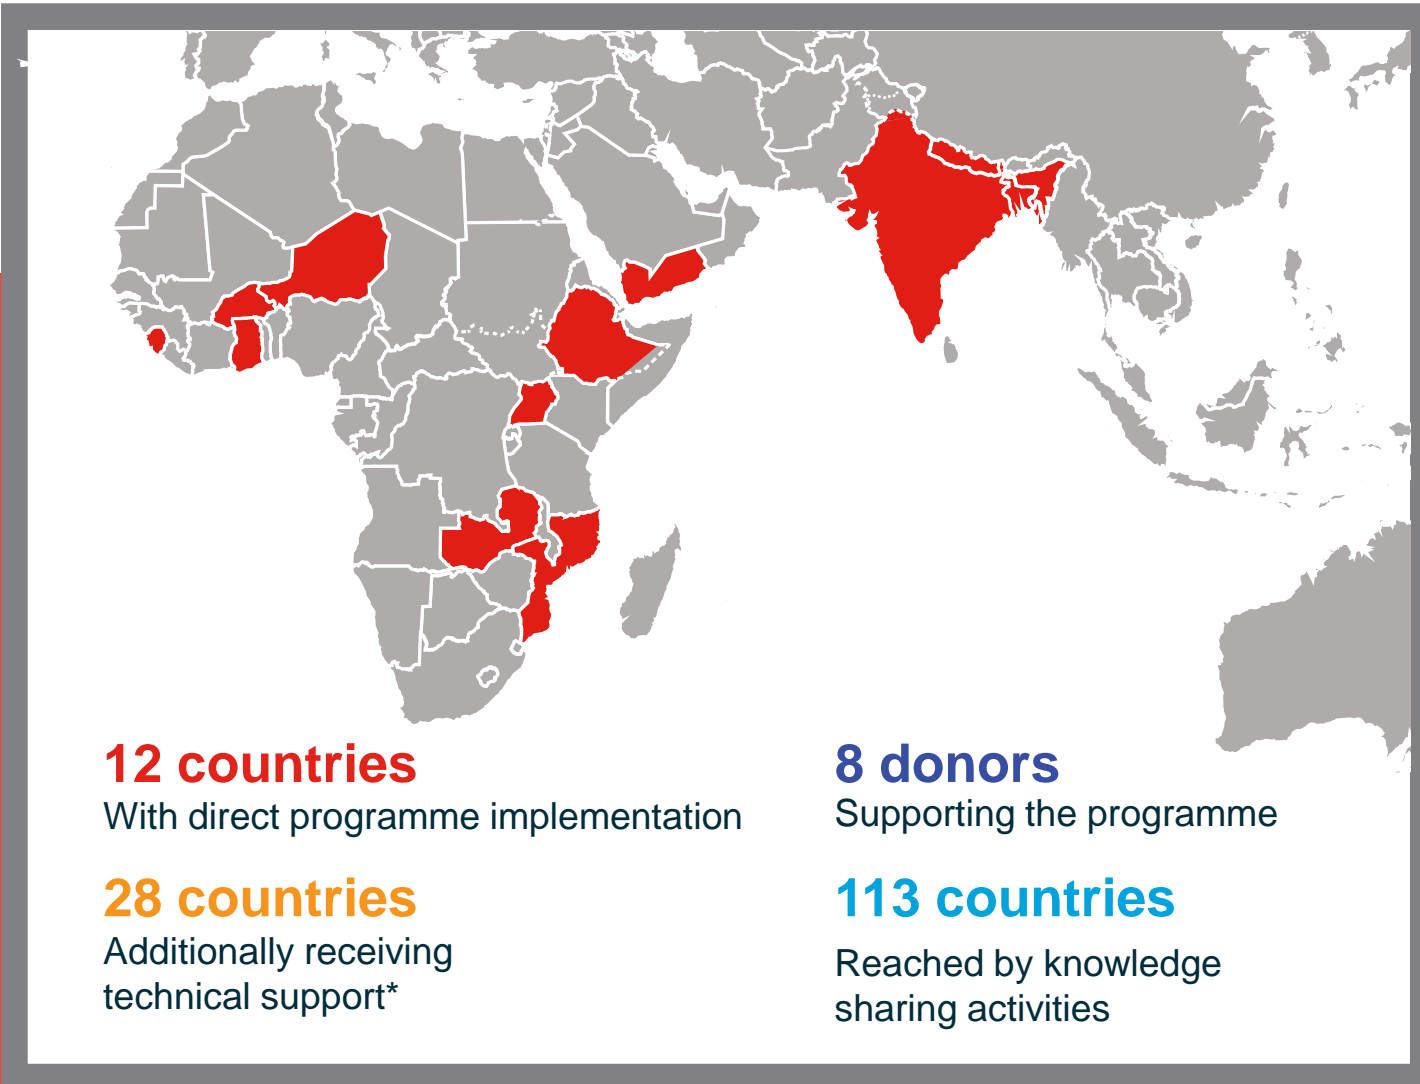

Underinvestment
in child marriage

Energy crisis

Internet fragmentation

Pushback on gender and sexual
and reproductive health and rights

THE GLOBAL PROGRAMME: AT A GLANCE

PHASE I (2016-2019)

Strengthen critical institutions and systems to deliver quality services for girls and lay the ground for norm change among families and communities

PHASE II (2020-2023)

Enhance investments in married and unmarried girls, engage key actors for positive gender norms change, advocate for increased political support and invest in evidence on what works

PHASE III (2024-2030)

Longer-term, gender-transformative goal for larger proportions of adolescent girls to live healthier, more empowered and safer lives, including making their own life choices

* Data from 2021.

PARTNERSHIPS

FOR ENHANCED RESULTS

Working **through government programmes,** systems and platforms...

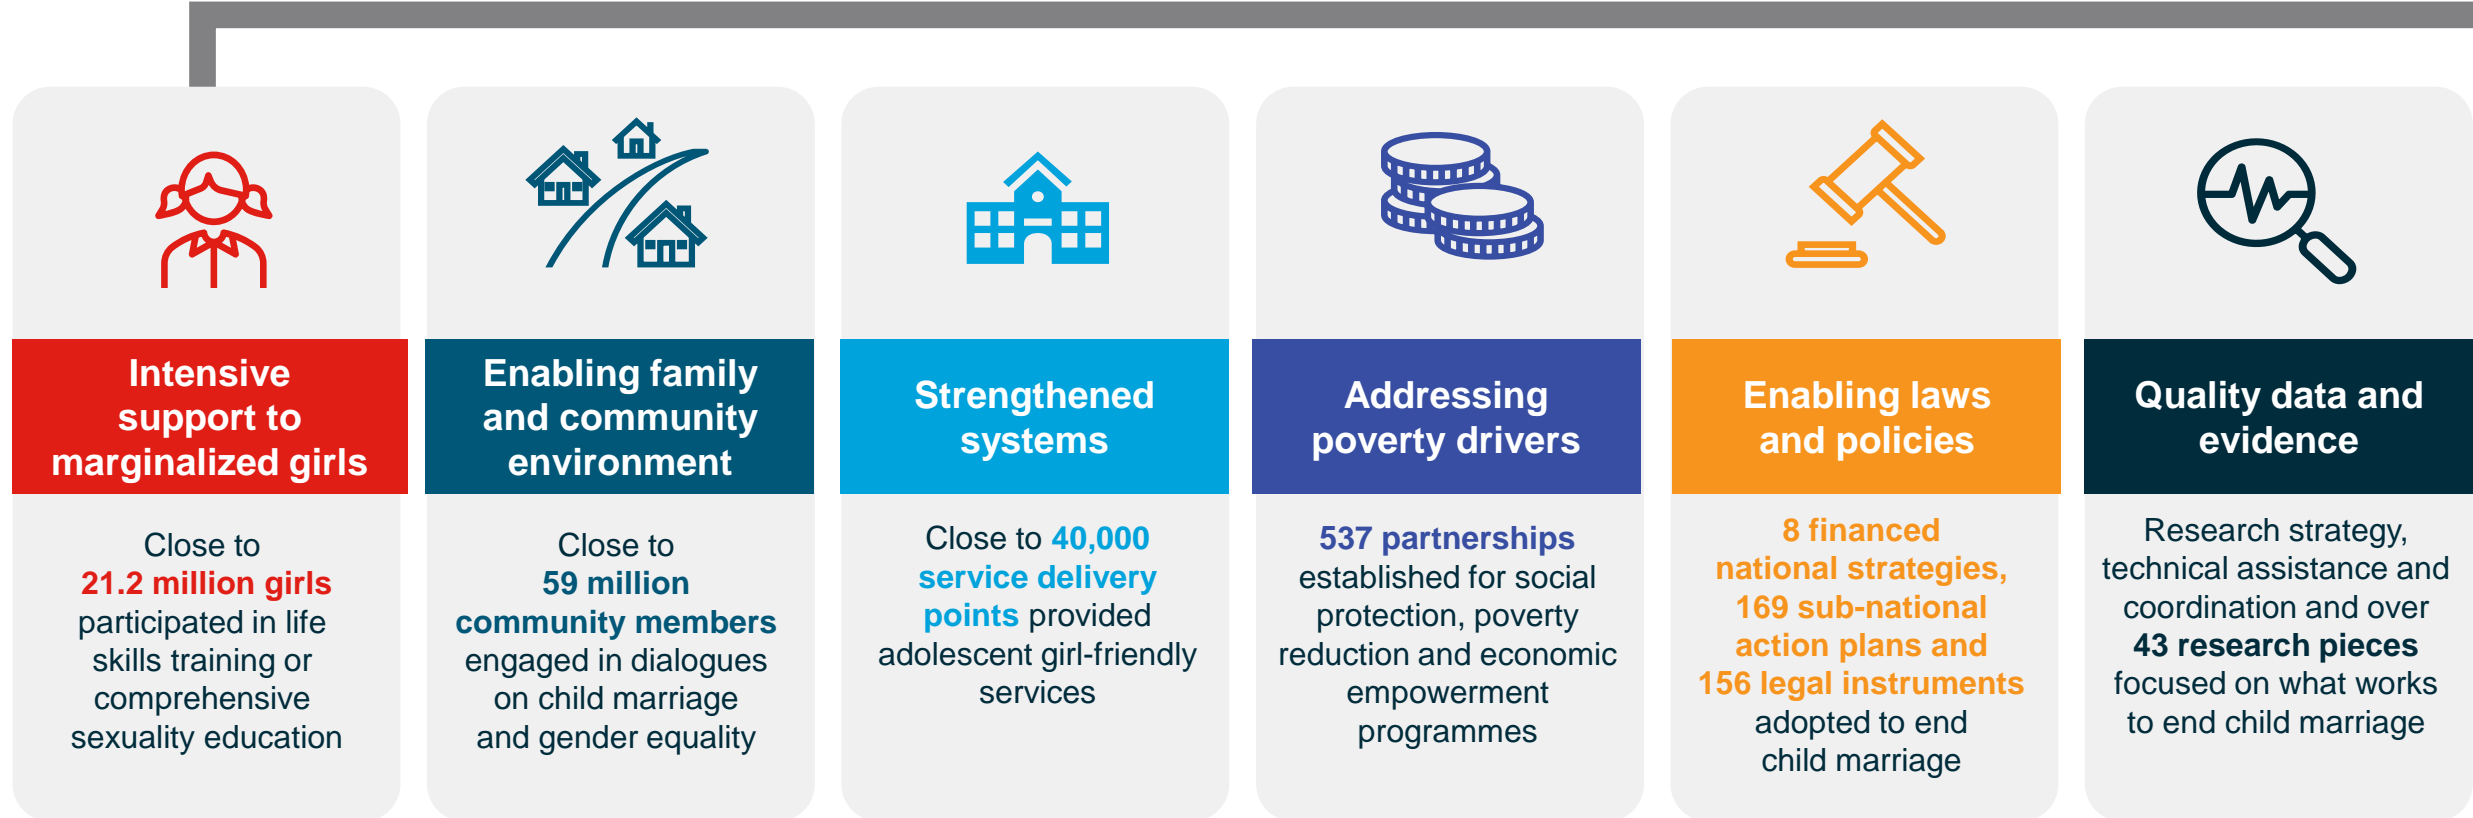

...with

146 civil society organizations as partners

69 of which are **youth-led** or **women's rights organizations**

HOW FAR HAVE WE COME?

All data as of 2022.

RENEWED AMBITION TOWARDS 2030

SDG TARGET 5.3:

Eliminate all harmful practices, such as child, early and forced marriage and female genital mutilation

VISION:

Adolescent girls, including the most marginalized, in countries targeted by the Global Programme fully enjoy their childhood free from the risk of marriage; they experience healthier, safer and more empowered life transitions, including **making choices** about their education, sexuality, relationships, marriage, and childbearing

VISION FOR PHASE III

(2024-2030)

Education

Child protection

Health services

Social protection

Family and community
engagement

Comprehensive
sexuality education

Sexual and reproductive health

Life skills training

Enabling laws and policies

© UNICEF/UN0735172/Pouget

Programme Principles

Enhancing partnerships

Leaving no one behind

Fostering gender-
transformative change

Programming across the
humanitarian-development nexus

Scaling up and institutionalization

Outcome and impact
measurement

Learning and sharing
what works

UNDS reform and coherence
to QCPR

Session 2

The global context: Polycrisis, megatrends and gender equality

Moderated by:

Jose Roberto Luna, UNFPA HQ

Speakers:

Cecile Mazzacurati, UNFPA WCARO

Mona Aika, UNICEF ESARO

Shadia Elshiw, UNFPA ASRO

Veronica Kamanga Njiko, UNICEF ROSA

The case of the Arab States and the Middle East and North Africa Region

Shadia Elshiwiy
1 May 2023

Global Polycrisis affecting child marriage

Humanitarian
crisis

Rising poverty

COVID-19 pandemic
aftermath

Rising fragility

Climate crisis

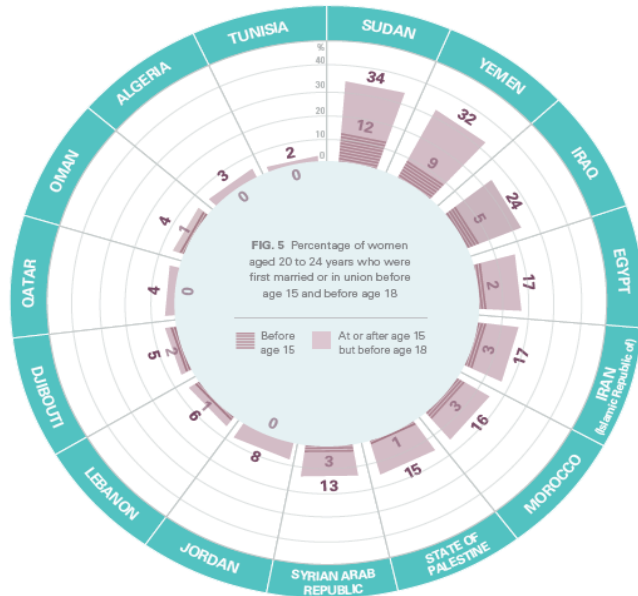

Underfunding

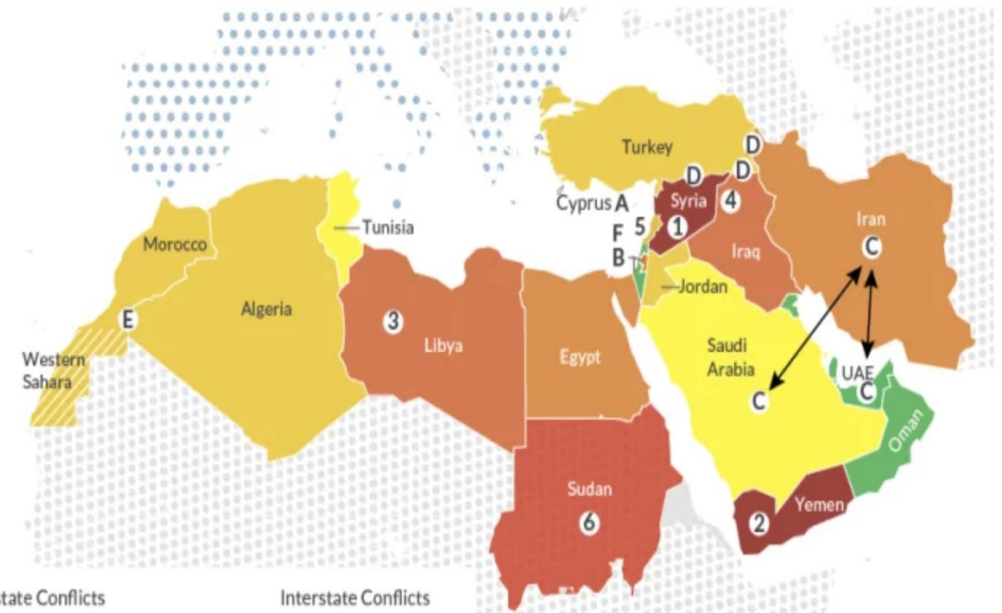

Fragile States Index 2022

Alternate	Rank	Total												
Yemen	1st	111.7	9.1	10.0	9.1	9.9	8.0	6.7	9.9	9.9	9.9	9.9	9.9	9.4
Somalia	2nd	110.5	9.4	10.0	8.4	9.1	9.0	8.7	9.5	9.9	8.8	10.0	8.7	9.0
Syria	3rd	108.4	9.5	9.9	9.4	9.3	6.8	8.1	10.0	9.3	9.4	7.3	9.4	10.0
South Sudan	3rd	108.4	9.8	9.2	8.5	8.9	8.7	6.6	9.6	9.8	8.6	9.6	10.0	9.1
Central African Republic	5th	108.1	8.3	9.7	8.4	8.2	9.7	6.5	9.2	10.0	9.4	9.2	9.8	9.7
Congo Democratic Republic	6th	107.3	8.7	9.6	9.3	8.3	8.4	6.7	9.3	9.5	9.3	9.7	9.7	8.8

Afghanistan	8th	105.9	10.0	8.7	8.2	9.3	8.2	8.0	9.2	9.9	8.4	9.1	8.9	8.0

The prevalence of child marriage varies within the region

Demonstrate and Interstate Conflicts and State Fragility

Intrastate Conflicts

1. Syria
2. Yemen
3. Libya
4. Iraq (North-West)
5. Lebanon
6. Sudan

Interstate Conflicts

- A. Cyprus
- B. Israel - Palestinian Territories
- C. Iran - United Arab Emirates/Saudi-Arabia
- D. Kurds (Turkish-Syrian border area, Iraq, Iran)
- E. Morocco - Algeria (Western Sahara)
- F. Gas-Exploration in the Eastern Mediterranean (Turkey, Cyprus, Lebanon, Israel, Egypt)

Country examples

Yemen

- Yemen remains one of the world's largest humanitarian crises.

Syria

- Now entering its 13th year, Syria's conflict has taken a massive toll on every single Syrian, but in particular women and girls.
- Even before the recent earthquakes, the needs inside Syria were staggering.

Sudan

- The heavy fighting which continues in Sudan's capital Khartoum and across the country is putting tens of thousands of women in danger.
- Risk of gender-based violence also rises.

Impact of climate change on GBV and child marriage

- Climate Change increases the risk of Violence Against Women (UNFCCC, 2019, etc)
- GBV, child, early and forced marriages, and trafficking have been seen to increase following disasters and extreme weather events (McLeon, 2019; Mason, 2016)
- Pressure on families due to floods, droughts, disasters and other climate impacts can also result in early, forced and child marriage (Leon, 2019; CARE, 2015)
→ decreased access to quality health, social protection and GBV services

[What works programme](#)

Impact of climate change on GBV and child marriage

- Women may have less opportunity to influence **household decision-making** to mitigate and the decision to migrate
- **Women have poorer access to resources** that could help with adaptation such as land title, irrigation technologies, financial assets and formalized safety nets
- **Discriminatory, patriarchal laws**, norms, customs and institutions exclude women from participating in decision-making and community processes to adapt to climate change
- Women's work is particularly dependent on the reliable availability of water and wood fuel and will have to walk longer distances to fetch firewood when climate change hits. This leads to increase in women's labor time, physical strain, and risk of GBV

Impact of humanitarian situations on child marriage

Impact of humanitarian situations on FGM and CM

- ✓ HP often driven by pre-existing social and cultural norms exacerbated in humanitarian situations
- ✓ Complex and multiple drivers

... but rarely considered a priority in humanitarian settings

- ✓ Limited funding for GBV and Child protection
- ✓ Limited collaboration between humanitarian and development actors / different stakeholders
- ✓ Focus on response vs. prevention
- ✓ Not considered “life-saving” and contributing to “resilience”
- ✓ Social norms require time vs. short funding / project approach

Evidence gaps

- ✓ Lack of data and evidence on incidence of HP in these contexts
- ✓ Challenge of prevalence studies in fragile settings

The case of the South Asia region

Veronica Kamanga Njikhó
1 May 2023

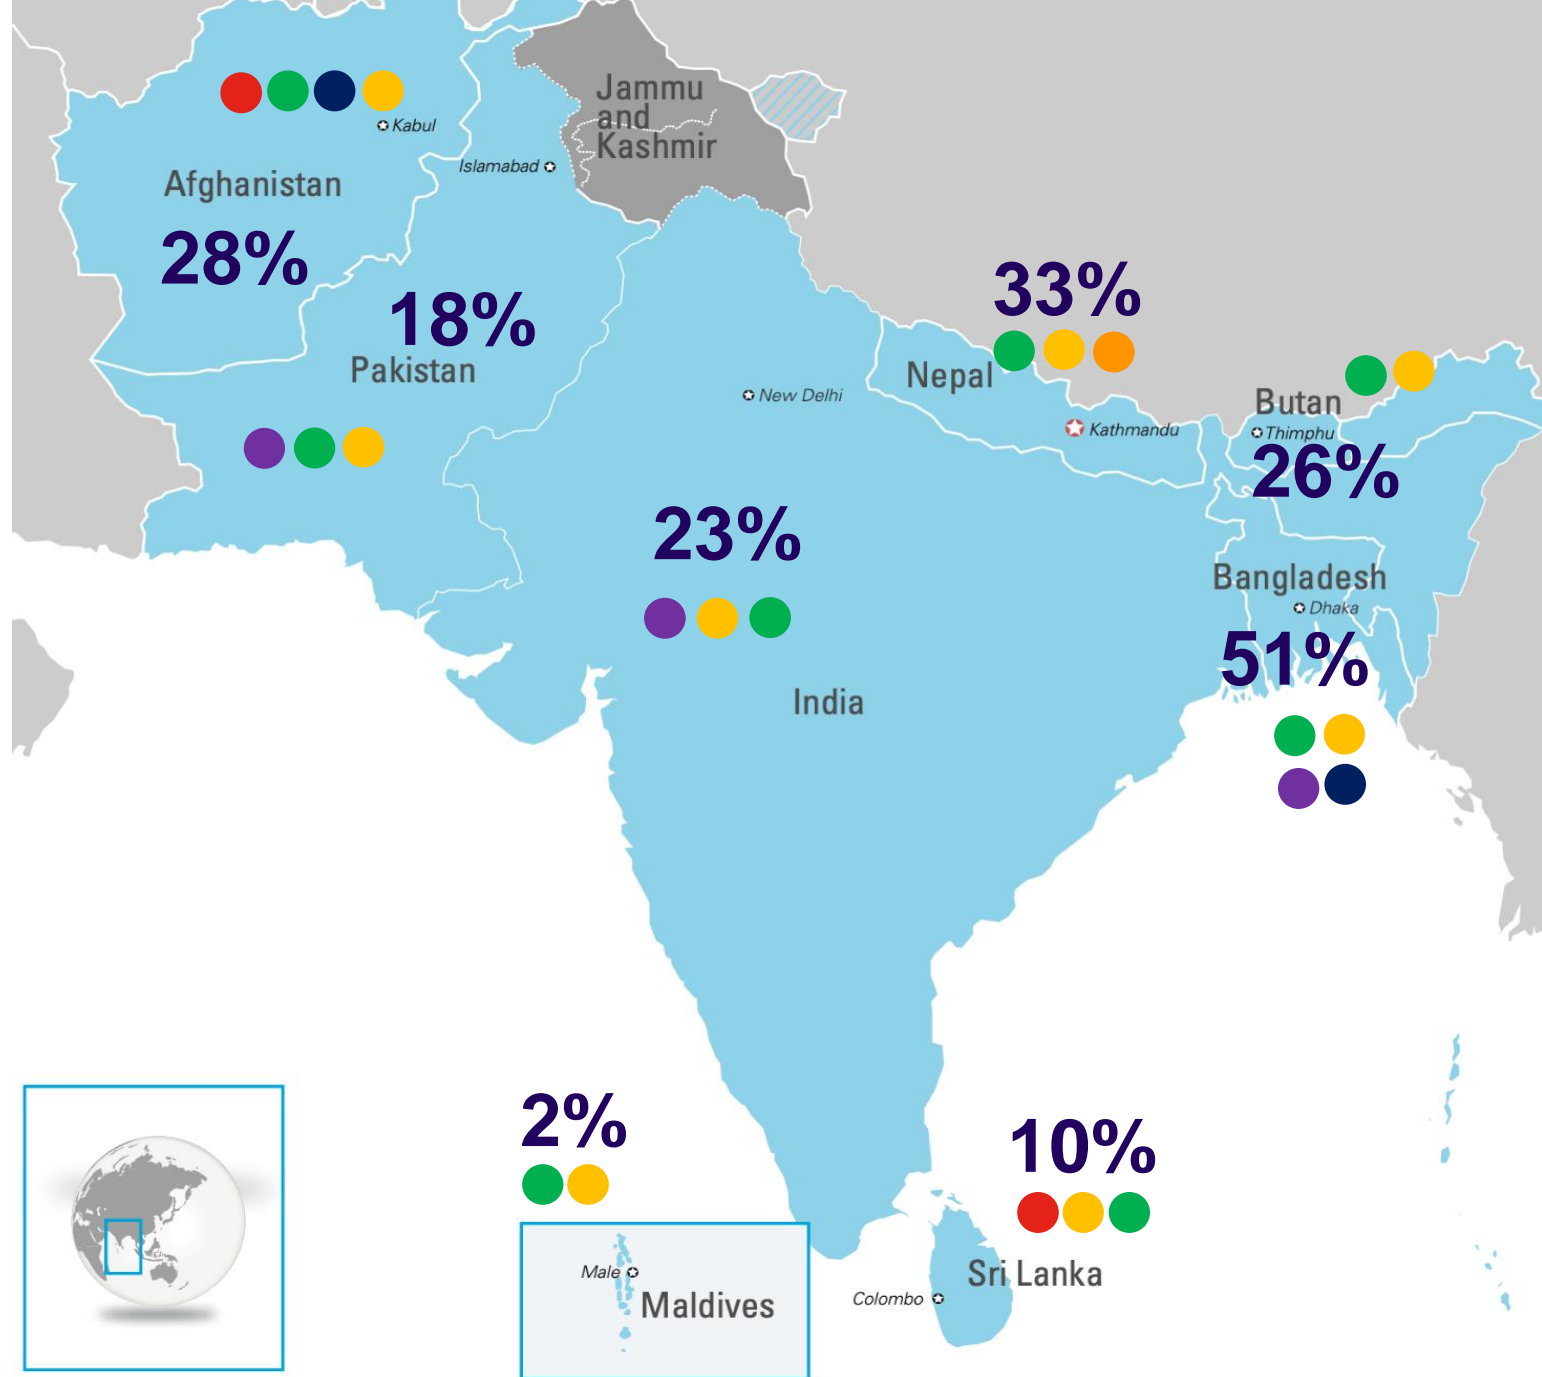

South Asia is home to **290 million child brides.**

The highest number in the world.

45% of the global prevalence.

- Economic crisis
- Climate change
- COVID-19 pandemic
- Flooding
- Conflict
- Earthquake

Who are the most affected?

■ girls ■ boys

■ poor households ■ higher income groups

■ out-of-school girls ■ girls in school

■ rural ■ urban

The polycrisis and its impact on child marriage programming in South Asia

**UNICEF and UNFPA
projections:**

YEARLY:
7.4 million child marriages that
could have been prevented
globally

IN TOTAL:
an additional 13 million child
marriages between 2020 and
2030 globally

**due to COVID-19
Pandemic alone**

IMPACT

- **Lost livelihoods and economic insecurity** pressuring families to marry their daughters to alleviate household outgoings
- **School disruption** due to C-19 & conflict-limiting access of girls' education
- **Reduction in dowry practices** created a lucrative opportunity to gain money/marry daughters for a lower dowry
- **Difficulties accessing SRH** and other health **services** led to higher domestic violence rates and unwanted pregnancies
- Reinforced **negative social norms** – CM to repay family debts, to resolve conflicts (baad) and to establish or reinforce family ties (baadal)
- **Migrant working men returning** to their home communities looking for girls to marry

INDIA "My daughter was 15 years old when she got married. They were married right after lockdown, as it would have been too difficult to give her a dowry and marry her later. I thought before all my savings end, I should get my daughter married..."

UNFPA: Some 47 million women in 114 low- and middle-income countries are projected to be unable to use modern contraceptives if COVID-19-related disruption continues for 6 months.

BANGLADESH "My husband had been working as a construction worker in Dubai and had returned. As soon as he returned from abroad, his family arranged a marriage with me. I was young – a student in ninth grade."

Harness crises as opportunities to end child marriage.

Is it possible?

- Crises present us with an opportunity to reimagine a world fit for children and to address child marriage.
- We need to better understand both scale and scope of children's vulnerability to child marriage during crises to produce better, scalable solutions capable of addressing heterogeneous contexts.

Adapt critical services based on needs, vulnerabilities and context

Address intersectionality of the most vulnerable. (caste, OOSC, poor and already married girls)

Identify shifting trajectories of social norms and respond to new needs they create

Ensure child marriage is a key component in HRP

Scale up avenues/pathways to address CM - already existing emergency services

(health, SP plus, GBVie)

Expand economic opportunities for affected families to mitigate livelihood disruptions

Focus on adolescent girls' education, skills through alternative learning pathways (ALP, CBE, ECE)

Expand online & digital platforms to reach more girls with information and services

Session 3

A review of the evidence: What works to end child marriage

Moderated by:
Upala Devi, UNFPA APRO

Speakers:
Manahil Siddiqi, UNICEF Office of Research – Innocenti
Gillian Mann, Child Frontiers

Towards a world with no child marriage

A presentation on what works to prevent child marriage and improve outcomes for girls

Manahil Siddiqi
1 May 2023

Without **evidence** to inform practice,
it is like we are operating in the dark.

how...

are we going to maximize impact in Phase III?

**We know far more
about child marriage
then ever before.**

PAST

Evidence base limited to
a handful of studies from
South Asia.

PRESENT

**Robust evidence base on
child marriage**

- **Prevalence and trends:**
 - Who is affected? Where?
- **Drivers:**
 - Why does child marriage persist?
- **Consequences of child marriage:**
 - How does child marriage affect girls, families and societies?
- **Interventions to prevent child marriage:**
(Siddiqi & Greene, Mathers, Malhotra and El Nakib)

Effective when well-designed and executed

- At least two **high quality impact evaluations**, using randomised control trials and/or quasi experimental designs have found **statistically significant reductions in child marriage** and/or mediating drivers.

Promising but more research is needed

- One **high or medium quality impact evaluation**, using a randomised control trial, or quasi-experimental study, has found **statistically significant reductions in child marriage or a pattern of change across multiple mediating drivers** and is suggestive of this (statistical significance has not been demonstrated).

Mixed or conflicting evidence of effectiveness

- Evidence from **different high-quality studies shows conflicting results**, e.g., some interventions are found to be effective, and some are found to be harmful or detrimental.

What works?

Income and economic strengthening

show the most definitive pattern of success in preventing child marriage.

- Cash transfers for schooling
- Vocational skills and training for income generation
- Favourable job markets for girls

CASH TRANSFERS

Evidence

- Multiple systematic reviews of the evidence have concluded that cash transfers for schooling **consistently effective at reducing the risk of CM** across all contexts (21 quality studies)
- In multi-component programmes, it is often the economic transfer that reduces risk of child marriage over the empowerment programming which may have other positive effects

Essential components

- **Length of exposure and Frequency matter:** Longer exposure to cash transfer results in greater delays in timing of marriage.
- **Communication of programme and engagement with beneficiaries is a critical factor** in success or failure
- **Sensitive to the varied contexts of CM**
- **Integrate gender transformative plus components**
- **Link to services and systems**

Reductions in child marriage risk

Reductions in early sexual debut and adolescent pregnancy

Reductions in violence against women and girls

Cash transfer to address child marriage in humanitarian settings

Large-scale, multi-purpose cash assistance for Syrian refugee children in Lebanon (Mousa 2021)

Partners: Economic research forum, ODI, UNHCR, WFP

Focus: Cash transfer programme to alleviate economic hardship, improve child wellbeing and delay marriage

Evaluated: Yes, in 2019

Target population: evaluation sample was 6,207 refugee households

Implementation: \$175 per month to eligible households over 12 months

Reduced the likelihood of early marriage for girls aged 15-19 years

Inc. enrollment in school for school aged children

Improved health outcomes for pre-primary and school aged children

VOCATIONAL SKILLS AND TRAINING FOR INCOME GENERATION AND FAVOURABLE JOB MARKETS

Evidence

- High quality RCTs showing **large pos. effects of investing in girls' human capital and employment opportunities**
- Girls who participated in a **vocational training and financial literacy program** for two years in Uganda run by BRAC were **58% less likely to marry early**
- Govt. programmes created demand for education by promoting **manufacturing growth and the visible promise of opportunities** (inc. access to call center jobs India and garment sector jobs in Bangladesh) showed large positive in reducing child marriage at scale

Reductions in child marriage risk

Reductions in early pregnancy

Increased income generation with no decrease in school attendance

Essential components

- Invest in interventions that promote girls' **safe transition from school to productive employment** through skills training
 - To support this transition: address **education and skills gaps, information gaps, limited employment opportunities** and adverse **social norms**
 - Deliver beyond just schools to **reach out of school girls**
- Support **macro-policies that enable economic participation** particularly in rural areas and inclusive economic growth (need more research on policy interventions)

Education approaches are supported by the evidence on what works.

- Cash or asset transfer
- Curriculum: targeted life skills, CSE
- Systems—strengthening: Building schools, improving facilities (especially for girls) and hiring female teachers

EDUCATION INTERVENTIONS

Evidence

- Cash transfers are an evidence-based strategy that can keep girls in school and reducing child marriage
- Select RCTs show that well-designed and implemented life skills training can reduce CM (e.g., BALIKA programme in Bangladesh)
- Limited but promising evidence:
 - CSE and gender-transformative curriculums more broadly can be an important component of programmes
 - Supply side interventions
 - Supporting married girls to re-enter the school system

Essential components

- **Cross-sectoral linkages:** Work with education sector to ensure education policies and the budgets that support them place greater emphasis on reducing child marriage
- When possible, **multi-level intervention:** availability and access to secondary schools combined with quality teaching and infrastructure and evaluate these larger-scale approaches
- **Inclusive programmes** that reach married and out of school girls

 **Reductions in
child marriage
risk**

 **Reductions in
early pregnancy
risk**

**Mixed or conflicting
evidence**

Laws: Minimum age of marriage laws and banning of exceptions

Evidence

- Mixed evidence -- **legal approaches by themselves are insufficient for reducing child marriage in most contexts** and in some cases have **unintended consequences**.
 - Study using DHS data from 100 countries found that laws banning child marriage do not deter the practice;
 - Qualitative studies from Malawi and India find that it is driving the practice underground
 - Large proportion of marriages occur illegally - 7.5 million girls marry illegally each year, making up >60% of all child marriages
- Legal approaches **must be accompanied by a wide range of additional interventions** to delay marriage including education and economic.

Empowerment approaches

- Safe spaces

Evidence

- Despite being one of the most widely implemented approaches, the evidence on safe spaces from high quality RCTs is **mixed and inconsistent**.
 - Evaluation of the COMPASS program (life skills and safe spaces for girls, plus family dialogues) for **South Sudanese refugees in Ethiopia** showed **no effects on child marriage after 12 months** (possibly because of the short time frame of the study and the significant challenges associated with living in a camp environment).
 - A high quality RCT of the **Kishori Kontha program in Bangladesh** found that 4.5 years after the intervention ended, girls who undertook the 6-month empowerment programme, which included safe spaces and peer educators, showed **no change in marriage rates**.

**Promising, but more
research is needed in
Phase III**

Norms and values

- **Significant number of programs include plus components that aim to change norms and attitudes**
- **Norms interventions to address child marriage lack robust and valid measures, and comprehensive programming (inclusion of reference groups, longer time frames, etc.).**
 - Greene, Edmeades and Siddiqi (2023) identified only 12 programs that measured impacts on norm change and child marriage.; Of these, only two programs worked with boys, only 3 worked with family members other than girls, and only 5 with community members; and Only three programmes implemented comprehensive norms change programming.
- Research and programming on norm change needs **shared definitions, terminology, validated instruments and theories of change** linking activities to specific norms and reference groups.

Response and support services for married girls

- Siddiqi et al. 2023 – Examined the evidence base on interventions for married adolescents. Our analysis of 29 intervention studies found:
 - **disparities across sectors**, with most programmes focusing on SRH and maternal health to the neglect of education and economic approaches, mental health, and interventions on relationship dynamics that engage boys and men.
 - interventions occur mostly at a **small scale are geographically concentrated**
- The child marriage field's emphasis on prevention must be matched by attention to mitigation and response.

Systems strengthening: Training to build capacity of workforces across sectors

- Delivering evidence-based prevention programming depends on the **strength of systems across multiple sectors**, but evidence base as it relates to child marriage is limited.
- A 2020 evaluation of **Ethiopia's Health Extension Programme** between 2002 and 2013 established that adolescent girls who had received household support from the largely female health extension workers were found to have a **reduced risk of child marriage and teen pregnancy, higher levels of school attendance, and better literacy and numeracy.**
- **Whole system and whole institution strengthening**, combined with **multi-sectoral collaboration**, is necessary for large scale impact. Often, short-term projects and vertical programming. interventions that are developed wholly outside the system, or in sectoral isolation, may struggle to achieve scale-up and sustainability and have limited reach.

Summary

Taking an **evidence-based** approach in Phase III to accelerate towards a world with no child marriage

Apply what we know: We have confidence in particular programmatic directions, and they must become essential to how we address CM and improve outcomes in Phase III:

- Address poverty through **Income and economic interventions** (cash transfers, vocational training, labour market opportunities) and **supporting girls schooling** (especially secondary school) **and learning**

Fill critical gaps in intervention research :

Strengthen evidence base on promising approaches by adapting, monitoring and evaluate interventions focused on child marriage and...

- **Norms**
- **Systems strengthening**
- **Response and support services**

Achieve the 3 R's for Evidence Impact (Evidence Rigour, Responsiveness and Reach) and connect with the **STAR Initiative to end Harmful Practices for support**

“When the target is human suffering, and the cause human rights, **mere rhetoric is not adequate** to the task at hand. What are needed are solid methodologies, careful techniques, and effective mechanisms to get the job done.”

Mary Robinson, UN High Commissioner for Human Rights (1997-2002)

how...

are we going to maximize impact in Phase III?

Session 4

Zooming in, zooming out: Ensuring quality interventions at scale

Moderated by:
Catherine Muller, UNICEF WCARO
Bernadette Ssebadduka, UNFPA WCARO

Speakers:
Joachim Theis, Child Frontiers

Context-specific drivers of child marriage

Implications for achieving the elimination goal

Joachim Theis
1 May 2023

01. Purpose of the presentation

- Present preliminary findings from the WCAR and ESAR research and learning project on context-specific drivers of child marriage and how they influence programme strategies at national and subnational levels
- Reflect on the implications for Phase III of the Global Programme

02.

Comparing Burkina Faso and Sierra Leone

Commonalities in context and drivers of child marriage in Burkina Faso and Sierra Leone

- **Poverty:** Both are low-income countries. Child marriage rates are highest in the poorest, rural districts
- **Gender inequality** and discriminatory gender norms. Gendered economy with limited education and economic opportunities for adolescent girls and young women
- **Lack of access to quality services:** Education, health, social protection, child protection, GBV
- **Weak law enforcement**
- **Frequent humanitarian crises:** Armed conflict, natural disasters, public health crises, food and fuel crisis

Child marriage trends in Burkina Faso and Sierra Leone

Women aged 20-24 married before age 18 in Burkina Faso and Sierra Leone (DHS)

Burkina Faso: Specific drivers of child marriage

- Arranged marriages, bride price and polygamy are common
- Fear of girls' sexuality, pre-marital sexual relations and pregnancy outside of marriage
- Marrying girls early is seen as a way to avoid premarital sexual relations and the shame this would bring to a family
- Religious beliefs and traditional power structures
- Adolescent girls lack the autonomy and agency to make decisions that affect their lives, including marriage and sexual relations

Policies and programmes focus on preventing child marriage

Sierra Leone: Drivers of adolescent pregnancies

- Premarital sexual relations are common and widely condoned
- Adolescent girls have significant autonomy to engage in sexual relations and enter into marriage or unions
- Adolescent girls are expected to provide for their own needs
- Transactional sex is one of the few means for poor adolescent girls to pay for goods and services
- Adolescent pregnancies are often caused by transactional sex – and can lead to self-initiated child marriage/union

Policies and programmes focus on preventing adolescent pregnancies

Relationship between girls' autonomy, marriage decisions, marriage transfers and pre-marital sexual relations

Low	← Girls' autonomy →		High
Arranged Girls have no say (including forced marriage)	Arranged Girls have some say	Self-initiated Strong family influence	Self-initiated Little family influence
Dowry / bride price	← Marriage transactions →		Limited / none
Low	← Likelihood of premarital sexual relations →		High

03.

Locating contexts on the “girls’ autonomy” scale

Low	← Girls’ autonomy →		High
Arranged Girls have no say (including forced marriage)	Arranged Girls have some say	Self-initiated Strong family influence	Self-initiated Little family influence
Dowry / bride price	← Marriage transactions →		Limited / none
Low	← Likelihood of premarital sexual relations →		High

04.

Sierra Leone: Strategies to prevent adolescent pregnancies

- Evidence on preventing adolescent pregnancies and transactional sex (not only child marriage)
- Assets, skills and services for adolescent girls:
 - **ASRH** information, services, including contraceptives for unmarried adolescent girls
 - **Life skills education** for adolescent girls
 - **GBV** and child protection services
 - **Education:** school completion, prevent school drop-out, safe schools, CSE, MHM
 - **Social protection** and economic opportunities for adolescent girls
- Supportive attitudes towards and expectations of adolescent girls among: families, peers, service providers, teachers, motorcycle riders, chiefs, religious leaders, etc.

Opportunities for leveraging

- **ASRH** services, information and products (contraception): Community, service and policy levels
- **Education**: prevent school drop-out; School-related Gender-based Violence (SRGBV); Comprehensive Sexuality Education (CSE); Menstrual Health Management (MHM); etc.
- **Social protection**: Launch of Productive Social Safety Net and Youth Employment Project

Linkages and convergence 1

Vulnerable adolescent girls need life skills, access to contraceptives, education and job skills and a supportive environment.

They have to reach and **converge at the level of individual adolescent girls.**

Linkages and convergence 2

- Vertical linkages between interventions at the **community – service – and policy levels**
- Horizontal linkages between sectors, departments and agencies

05.

Implications for Phase III

- **Contextualise strategies** for sub-national contexts
- Place strategies that address the structural dimensions at the core. **Invest more in services that create greater opportunities and autonomy for adolescent girls:**
 - ASRH, including contraceptives for unmarried girls
 - Education: life skills, CSE, safe schools (SRGBV)
 - Social protection
 - Job skills and opportunities
- Ensure **policy advocacy and social and behaviour change promotion** are supporting greater opportunities and autonomy of adolescent girls
- **Leverage and scale:** expand partnerships with health, education, social protection, and job training at service and policy levels
- **Strengthen horizontal and vertical linkages:** between community, service and policy levels; and between sectors and departments

Arguments for greater Phase III investments in services

- **Evidence of what works is much stronger for service delivery than for community engagement**
- **Drivers studies emphasise the need to invest more in services**
- **Norms are slow to change:** In areas where marriages are arranged and come with marriage transactions such as bride price and dowry, child marriage rates have declined more slowly than in areas where unmarried girls have greater autonomy to engage in sexual relations and to enter into unions not arranged by their families.
- **Services are easier to scale than community engagement**

Session 5

Vision forward: Expectations and suggestions for Phase III from regional and country teams

Speaker:
Martha Nelems, facilitation team

Consensus on strengthening 'jointness' at country level

- Joint country monitoring visits
- Geographic and programmatic convergence
- Shared M&E framework
- Shared advocacy and communications strategy
- Contextualized, country specific technical guidance notes
- Peer support from other Global Programme countries

Phase III Priorities: Adolescent Girls

Education and Training

- Invest more in girls' education (ROSA)
- Vocational training programmes (Ghana)

Integrated SRH information and services (ESARO)

Empowerment

- Mentorship programmes (Zambia)
- Agency building (Nepal) through sport (Mozambique)

Leverage more commitment / resources from Governments to increase scale and reach more adolescent girls (Bangladesh)

Invest in alternative pathways for already married adolescent girls - delay first pregnancy, employment, etc. (ROSA)

Phase III Priorities: Family and Community Environment

Social and Behavioural Change & Social Norms and Change

- Use robust data and analysis to measure effectiveness (ESARO)
- Design, develop and roll-out real time monitoring (Ethiopia)
- Contextualize and co-create messaging with communities (Niger);
- Intensify engagement with traditional / religious leaders (Burkina Faso)
- Scale up interventions (Uganda)
- Technical support to COs on engagement of men/boys (ASRO/MENARO)

Phase III Priorities: Family and Community Environment

(continued)

- **Community initiatives**
 - Invest in community-based structures and leadership (Zambia)
 - Strengthen the programme's community-based approach (Burkina Faso)
 - Develop village-level child protection strategies (India)
- **Partner with feminist organizations, women's collectives and youth platforms (India)**

Phase III Priorities: System Strengthening

- **System strengthening involves collaboration with other sectors:**
 - Health
 - Education
 - Social Protection
 - Justice
 - WASH
- **Multi-sector programmatic approach may involve many sectors:**
 - Integrated education, protection, health, SRHS and data (Bangladesh)
 - Multi-sectoral service delivery at decentralized level (Ghana)

Phase III Priorities: System Strengthening

(continued)

- **Advocate for increased Government investment in CM initiatives (ESARO)**
- **Support government led coordination of strategies (Zambia)**
- **Improve access to and quality of services:**
 - Digitization of services (Bangladesh)
 - Strengthen community-based referral mechanisms (Mozambique)
 - Capacity building of service providers (Ghana)

Phase III Priorities: Poverty Drivers

Social Protection

- Leverage new and scale up existing cash plus programmes for the most vulnerable girls and households (Ghana)
- Sharing learning and expertise across social protection and child protection (India)

Phase III Priorities: Laws and Policies

- Enforcement /implementation of existing laws (Uganda)
- Advocate with governments for costed National Plans of Actions with financial resources allocated (ESARO)
- Advocate for correcting laws and policies that criminalize or stigmatize adolescent sexuality (Nepal)

Phase III Priorities: Data and Evidence

- Contextualize the joint theory of change according to country specific data, evidence and results framework in order to inform programmatic decisions (Bangladesh)
- Engage nationals in the development of country specific research agendas around CM (Ethiopia)
- Identify context-specific priority areas of investment at the national and sub-national level (WCARO)
- Strengthen data management and monitoring systems (India)

Phase III Priorities: Monitoring, evaluation and learning

- Enhance the MEL systems of key partners (Ethiopia)
- Capacity build on monitoring and evaluation (ASRO/MENARO)
- Harmonize and standardize monitoring, evaluation and reporting of all partners (Sierra Leone)
- Adopt participatory M&E tools (Niger)
- Implementation research (India)
- Conduct impact evaluation of flagship initiatives (Nepal)

Crisis Adaptive Programming in Humanitarian Crises

- Integrate new technologies to facilitate more inclusive approaches to respond to issues of inaccessibility due to crises/security challenges (Burkina Faso)
- Scale up CM interventions in emergencies (Ethiopia) and include CM in disaster management and climate change adaptation (Niger)
- Integrate CM in humanitarian-development-peace nexus (Yemen)
- Prioritize SRH and GBV services (Sierra Leone)
- Improve data collection (Ghana)
- Provide emergency cash transfers (Ghana)

Crisis Adaptive Programming in Humanitarian Crises

(continued)

- Prevention focus through multidisciplinary approaches (Niger)
- Provide mental health and psychosocial support services (India)
- Systematic review of CM prevention and response programming (ASRO/MENARO)
- Implementation research on how to achieve results & operational guidance (WCARO)

Other suggestions from COs for investments by the Global Programme HQ team

- Advocate to change 'the global narrative' to include child marriage in disaster management policy and prioritize child marriage in humanitarian context and climate change adaptation
- Engage the private sector in order to increase investments in ending child marriage

Session 6

**Looking at the data:
The latest child marriage trends**

Speaker:
Colleen Murray, UNICEF HQ

Is an end to child marriage within reach?

Latest trends and future prospects

Colleen Murray
2 May 2023

Preview of global estimates launching 3 May 2023

- Current levels
- Generational trends
- Projections to 2030
- Impact of crises

How many girls and women are affected worldwide?

- 640 million girls and women alive today were married in childhood
- South Asia accounts for nearly half of the global total (45%), followed by sub-Saharan Africa (20%)

Where is the practice concentrated?

- India alone accounts for one third of the world's child brides
- This share is equal to the next ten countries combined, with the remaining 190+ countries accounting for the final third

Where is the practice concentrated?

- The Global Programme targets countries which are home to half of the world's child brides
- The twelve countries in the GP include those with a **high burden (#)**, those with a **high prevalence (%)**, and those with a combination of the two

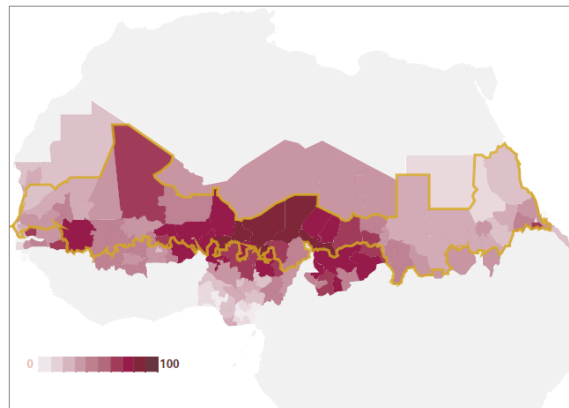

Which populations have an elevated risk?

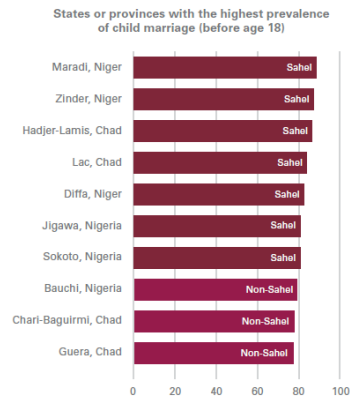

- Child marriage is more common in rural areas, among poorer families, and among girls with the least education
- Some geographic areas including the Sahel are home to especially high levels of child marriage that cross national boundaries
- States experiencing fragility show an elevated risk for girls

Some of the highest levels of child marriage in the world are found in the Sahel

FIG. 3 Percentage of women aged 20 to 24 years who were first married or in union before age 18

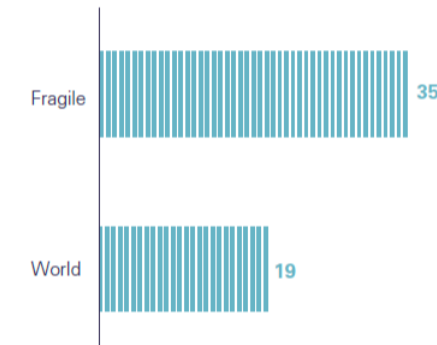

Notes: This map does not reflect a position by UNICEF on the legal status of any country or territory or the delimitation of any frontiers. The yellow border encloses the states and provinces included in the operational definition of the Sahel (see pages 9-9).

Child marriage in situations of fragility is nearly two times higher than the world average

FIGURE 7 | Percentage of women aged 20 to 24 years who were first married or in union before age 18, worldwide and in countries with high levels of institutional and social fragility

Notes: According to the Revised Classification of Fragility and Conflict Situations for World Bank Group Engagement, fragile countries are defined as those with one or more of the following: (a) the weakest institutional and policy environment (as measured using a set of 16 criteria grouped into four clusters: economic management, structural policies, policies for social inclusion and equity, and public sector management and institutions), (b) the presence of a UN peacekeeping operation, since this reflects a decision by the international community that a significant investment is needed to maintain peace and stability, or (c) flight across borders of 2,000 or more per 100,000 population, who are internationally regarded as refugees in need of international protection, as this signals a major political or security crisis.

Has there been a decline in the practice?

- Child marriage has declined steadily in South Asia, but there has been little progress in many other parts of the world
- The global prevalence has dropped from 23 per cent to 19 per cent in the last 10 years

Who has benefitted from progress?

- Progress has been concentrated among the richest
- Girls from the richest households represent three times as many averted cases of child marriage as girls from the poorest households

What can we learn from countries with exceptional progress?

In the countries with the greatest success in reducing child marriage, this trend has often been accompanied by:

- improvements in economic development and poverty reduction,
- access to employment, and
- better educational attainment for girls

Percentage of women aged 20 to 24 years who were first married or in union before age 18

Bangladesh

Ethiopia

Indonesia

India

Maldives

What can we learn from countries with exceptional progress?

- Progress on multiple fronts is necessary to give girls viable alternatives to marriage
- Education without employment opportunities can lead to a more educated cohort of girls who still marry in childhood

India's progress in completion rates for primary and lower-secondary education has outpaced the low- and middle-income country average

FIGURE 37 | Percentage of girls out of school and percentage of girls who successfully completed their education, by level

Note: Values for upper-secondary education are not available for low- and middle-income countries.

A significantly higher proportion of child brides now have an education

FIGURE 38 | Percentage distribution of women aged 20 to 24 years who were first married or in union before age 18, by highest education level attended

Note: Due to rounding, numbers for 2016 do not add up to 100.

What can we learn from countries with exceptional progress?

- Progress is possible in many different scenarios – from those with a historically high level of child marriage which can see large-scale reductions, to those with lower prevalence nearing elimination of the practice
- Many with large declines have not yet reached the poorest
- Equitable progress is rare

Large declines

- Countries that began with a high prevalence of child marriage
- Generally, these are not on track to eliminate the practice by 2030
- Large declines in prevalence in some cases also correspond to large numbers of child marriages averted
- **Bangladesh, Ethiopia, India and Indonesia**

Nearing elimination

- Countries closer to the target of eliminating child marriage by 2030
- Smaller absolute declines, both in prevalence and number
- Reaching elimination entails reaching the poorest
- **Armenia, Maldives, Rwanda and Tunisia**

Equitable progress

- Unlike the global trend, these countries show progress among the poorest that is at least as strong as progress among the richest – gaps are either staying the same, or shrinking
- **Eswatini**

Is the world on track to meet the 2030 target?

- Progress would need to be 20 times faster globally to eliminate child marriage by 2030
- At the current pace, ending child marriage is about 300 years away

Figure 7 Observed and projected percentage of women aged 20 to 24 years who were first married or in union before age 18

Note: See 'Technical notes' on page 25 for details on the calculation of projections.

Is the world on track to meet the 2030 target?

- At the current pace of progress, over 9 million girls will still marry in the 2030
- In contrast to the global trend, sub-Saharan Africa is projected to see a growing share and a steadily increasing absolute number of child brides

Figure 8 Projected number of girls under age 18 married per year, by region

Note: See 'Technical notes' on page 25 for details on the calculation of projections.

What challenges lie ahead?

Ongoing and overlapping crises create risky conditions for girls in several ways , through channels of impact such as **interrupted education** and **income shocks** caused by a public-health crisis, a protracted conflict or a natural disaster, or several of these at once.

10 million

Additional child brides estimated over the course of the decade beginning in 2020 due to the **COVID-19** pandemic

10-fold increase in conflict deaths →

7% increase in child marriage

Due to a heightened sense of insecurity, threats of sexual violence, infrastructure failures and other channels

10 per cent increase in climate shocks →

1% increase in child marriage

Due to disrupted sources of income, food insecurity, strains on communal resources, and other channels

Using country-level data for programming and advocacy

Child marriage statistical country profiles

Colleen Murray
2 May 2023

OVERVIEW

- The country profiles present a standard set of analysis in a four-page template
- Data are drawn from the UNICEF global databases, and feature secondary analysis from household surveys
- Currently available for 82 countries
- Designed to provide a data-driven overview of the practice, answering common questions like:
 - How many girls and women are affected?
 - Where is child marriage practiced most widely? Which girls are at greatest risk?
 - How do child brides fare compared to their peers?
 - Has the practice changed over time? Is the country on track to eliminate child marriage by 2030?

USE CASES

- Are child marriage programmes in the country targeted to the areas where the practice is most common?
- What types of interventions are most urgently needed to support married girls?
- What is the relationship between pregnancy and marriage in the country? Would pregnancy prevention avert many marriages?
- In working towards eliminating child marriage, what is a reasonable milestone to set, given the current trajectory?

Country profiles

Child marriage country profiles

March 2022

The world has committed to the target of ending child marriage by 2030 through the adoption of the Sustainable Development Goals, though many countries remain off-track to meet this goal. These statistical profiles draw upon nationally representative data to present an overview of the practice in each country, detailing how common the practice is across the population, describing the characteristics of unions, providing insights into the lives of child brides across key domains of well-being and illustrating trends in the practice and the acceleration required to reach the 2030 SDG target.

CURRENT LEVELS OF CHILD MARRIAGE

How common is child marriage?

Burden: Number of child brides

Prevalence: Percentage married in childhood

Comparison with the region and the world

Who is most at risk?

Demographic groups and states/provinces

CAMEROON

Minimum legal age of marriage for girls: 21 | with exceptions: 15

Current levels of child marriage

959,900

married before age 15

Burden of child marriage

Figure 1. Number of girls and women of all ages who were first married or in union before ages 15 and 18

2.6 million

married before age 18

Prevalence of child marriage

Figure 2. Percentage of women aged 20 to 24 years who were first married or in union before age 18

- 0 to 10
- 11 to 20
- 21 to 30
- 31 to 40
- 41 to 50
- 51 to 70
- 71 or higher

Cameroon is home to over 2 million child brides; 3 in 10 young women were married in childhood

Regional and global comparisons

Figure 3. Percentage of women aged 20 to 24 years who were first married or in union before ages 15 and 18

Vulnerable populations

Figure 4. Percentage of women aged 20 to 24 years who were first married or in union before age 18

CHARACTERISTICS OF UNIONS

*Are child brides marrying peers?
Or older men?*

*Are formal marriages or informal
unions more common?*

LIVES OF CHILD BRIDES

Do child brides have economic and physical autonomy?

What are their impressions and experiences of violence?

Are child brides in school?

Lives of child brides

Autonomy, empowerment and violence

Figure 7. Percentage of women aged 20 to 24 years who have an account at a bank or other financial institution, who have had a job in the past 12 months, who usually decide (alone or with their spouses) about visits to the women's families, who believe wife-beating is justified, and who have experienced intimate partner violence in the past 12 months

Education

Gender-transformative approaches

A global overview

Jose Roberto Luna
2 May 2023

GENDER-TRANSFORMATIVE APPROACHES: THE GLOBAL PROGRAMME STRATEGY

All data as of 2022.

Global Programme GTA tools and resources

TECHNICAL NOTE ON GENDER-TRANSFORMATIVE APPROACHES IN THE GLOBAL PROGRAMME TO END CHILD MARRIAGE PHASE II: A SUMMARY FOR PRACTITIONERS

BACKGROUND AND PURPOSE

The purpose of this technical note is:

- 1 To promote a common understanding of gender-responsive and gender-transformative programming in the context of the Phase II Global Programme to End Child Marriage (The Global Programme).
- 2 To provide practical guidance, to countries participating in the Global Programme, on how to translate bold commitments to gender equality, women's and girls' empowerment and gender transformation into practical action.

Child marriage is both a symptom and a result of deep-seated gender inequalities and restrictive gender norms. Addressing child marriage therefore necessitates a gender-transformative approach, tackling harmful gender roles, norms and power relations (see Figure 1). This note articulates strategies for adopting a gender-transformative approach in designing, implementing and measuring programmes in the Global Programme, building on the experiences of Phase I of the Global Programme,⁷ to reduce child marriage and contribute to the ultimate outcome of promoting gender equality over the long term.

Gender transformation actively examines, questions and changes rigid gender norms and imbalances of power that advantage boys and men over girls and women. It aspires to tackle the root causes of gender inequality and reshape unequal power relations; it moves beyond individual self-

improvement among girls and women towards redressing the power dynamics and structures that serve to reinforce gendered inequalities. A gender-transformative approach⁸ therefore attempts to promote gender equality as follows:

- 1 By fostering critical examination of inequalities and gender

UNFPA-UNICEF
GLOBAL PROGRAMME
TO END CHILD
MARRIAGE

FIGURE 1. The gender equity continuum⁹

1 GENDER-TRANSFORMATIVE APPROACHES IN THE GLOBAL PROGRAMME

TECHNICAL NOTE ON LIFE SKILLS PROGRAMMES FOR EMPOWERING ADOLESCENT GIRLS: NOTES FOR PRACTITIONERS ON WHAT WORKS

A set of technical notes, webinars and reports to advance a gender-transformative approaches in Phase II (2020-2023):

- [Gender-Transformative Approaches in the Global Programme to End Child Marriage](#) (English, French, Spanish)
- [Leaving No One Behind](#) (English)
- [Adolescent Girls' Empowerment](#) (English, French)
- [Life Skills Programmes for Empowering Adolescent Girls](#) (English, French)
- [Gender Norms](#) (English, French, Spanish)
- [Partnering with Men and Boys to End Child Marriage](#) (English)
- [Adolescent Girl-Responsive Systems](#) (English)
- [Gender-Transformative Accelerator Tool](#) (Various)

Internal and external capacity building

The Global Programme offers a menu of learning options and technical assistance on gender-transformative programming in 12 focus countries and beyond:

- Public webinars, clinics and technical guidance
- Online courses and trainings (such as GenderPro and Adolescent Girls' Agency, Safety and Wellbeing)
- Gender analysis, reviews and tailored gender training

The gender-transformative accelerator (GTA) tool

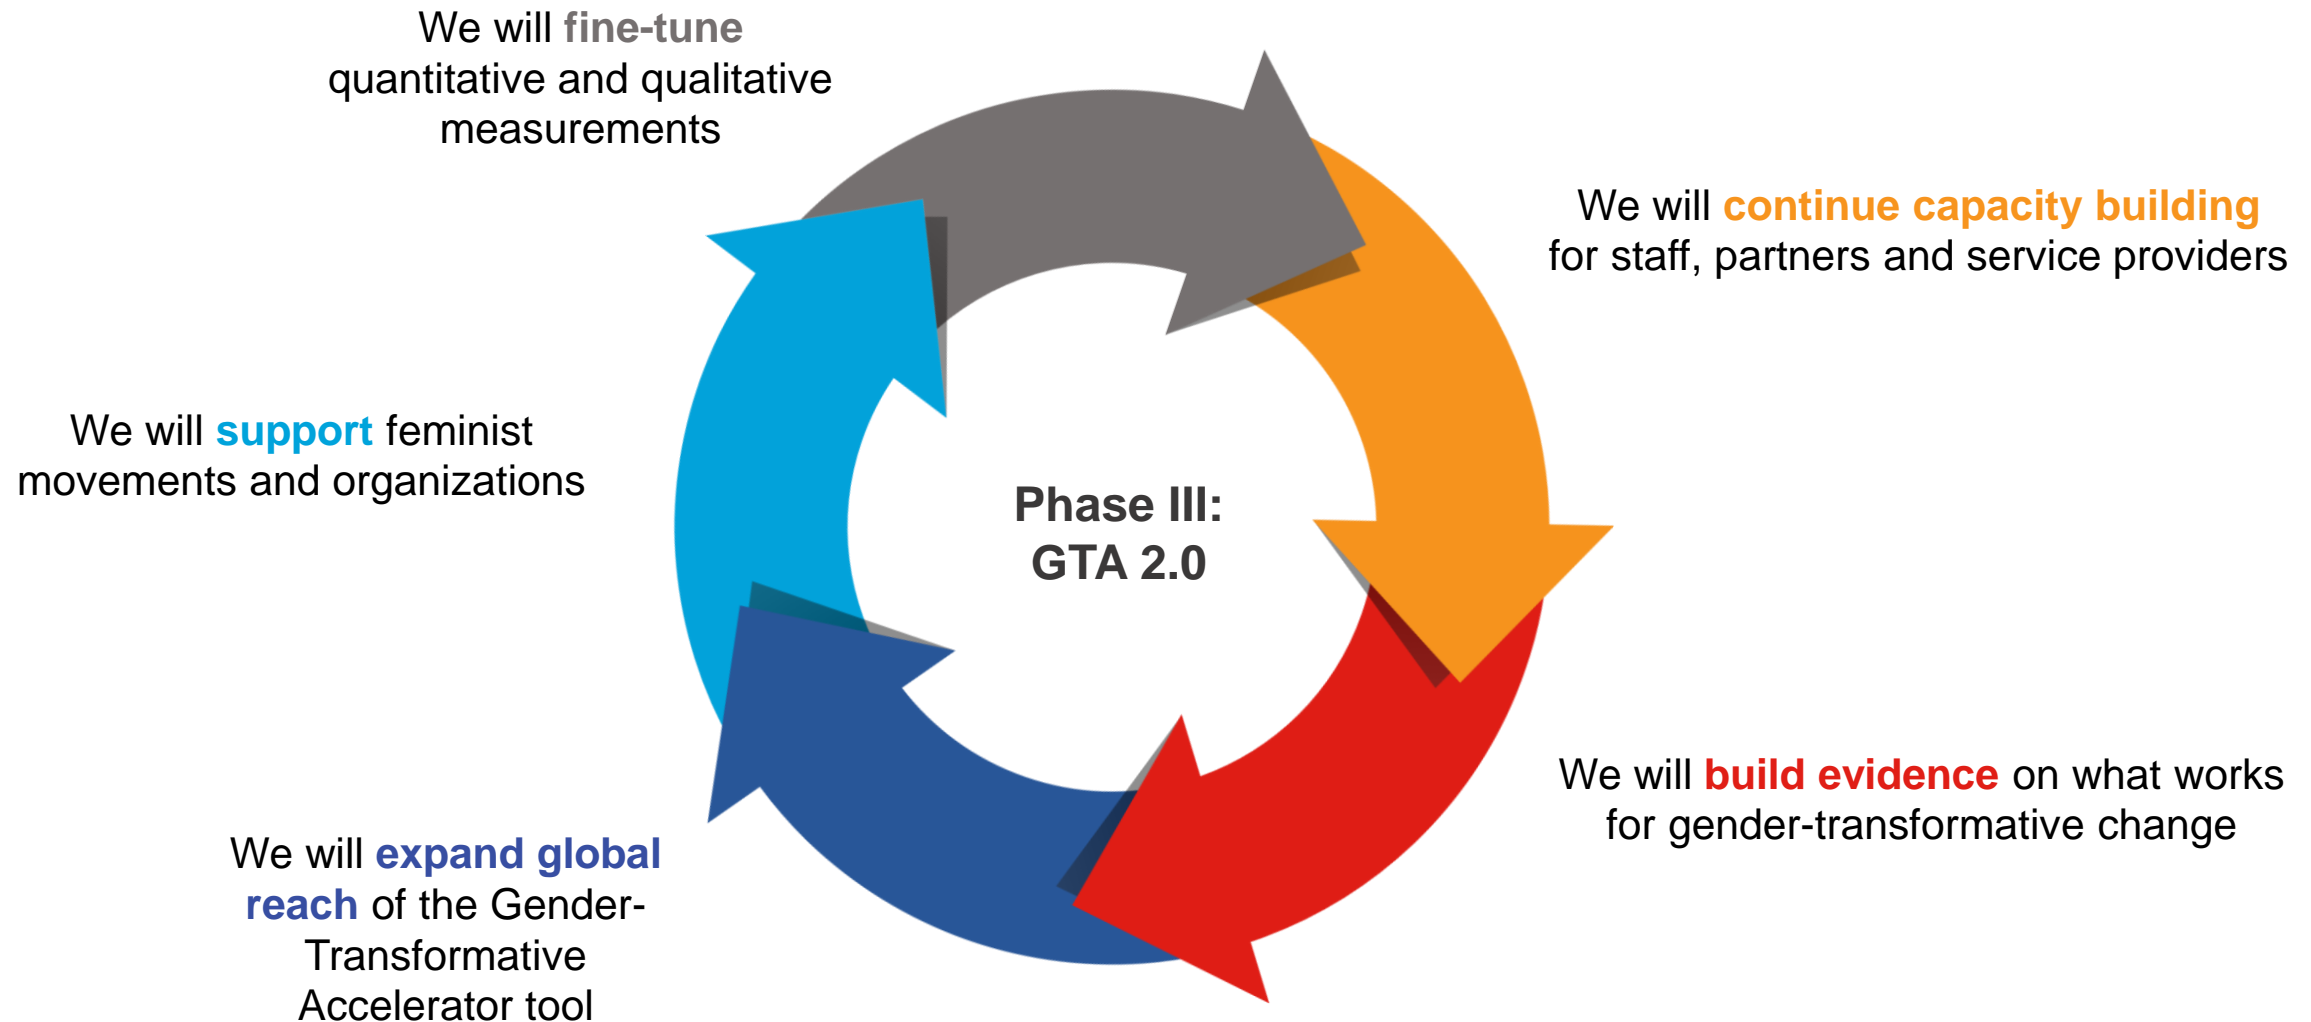

Adolescent Girls' Skills, Agency and Empowerment		Please provide a brief explanation for why you chose this level
Enter an x in the box on the right for the option that applies; select only one option.		
Gender Blind	Programmes make choices for adolescent girls and focus on expanding their skills based on existing roles and life choices as defined by the social and gender norms in their context.	
Gender Aware	Programmes aim to expand choices, skills and opportunities for adolescent girls and to address barriers to participation in education, the workforce, and community decision-making in the interest of marginalized adolescent girls. However, few investments are made to influence systems and communities in support of skilling and equipping adolescent girls in non-traditional roles, e.g. science, technology, engineering and mathematics (STEM).	
Gender Responsive	Programmes work to expand choices, skills and opportunities for marginalized adolescent girls through promoting skills that are not usually associated with traditional gender roles, such as girls' STEM education or boys' caretaking, and to address barriers to participation in education, the workforce, and community decision-making for marginalized adolescent girls.	
Gender Transformative	Programmes equip marginalized adolescent girls with social, health, cognitive and economic assets and promote autonomy and control over their bodies, sexuality and life choices. Programmes work actively to engage marginalized adolescent girls as change-makers at individual, community and structural levels to challenge norms and restrictions. Programmes make tailored investments to rectify basic inequities between adolescent girls and boys, to remove barriers and expand choices, opportunities and access to skill-building and comprehensive sexuality education for all, including through tailored efforts to challenge norms and restrictions for adolescents.

Actioning gender-transformative approaches in India

Mary Thomas
2 May 2023

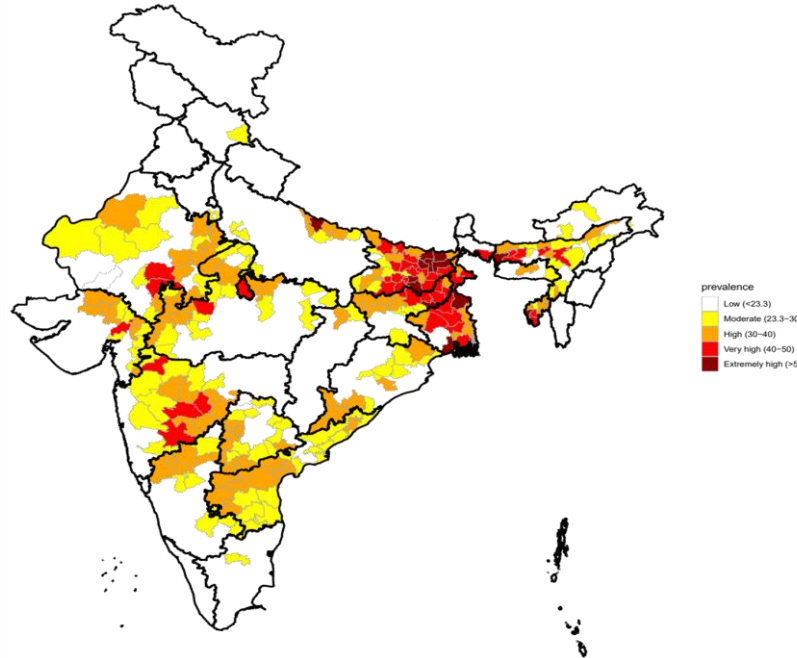

Meet Dipti, An anti-child marriage advocate

Child marriage in India

The child marriage prevalence has halved from 1995 to 2020

Indicators on sex ratio, teenage pregnancy, anemia and GBV are concerning for adolescents

State Wise Child Marriage NFHS 5

Gender Transformative Accelerator - India

01.

Developed a **GTA Roadmap for ECM programme** and identified key approaches for scale

02.

Dedicated **resources, partnerships, capacity building and contextualized tools** to implement GT interventions

03.

Design, pilot and advocate for GT lens to be **integrated within government platforms and initiatives.**

Priorities for GTA Roadmap

- **Integrating GTA Lens within Curricula and Partnerships of Adolescent Programming**
- **Institutionalizing Positive Masculinity Interventions in Communities, Institutions and Government Platforms**
 - Adolescent Girl Centric Platforms (Girl Friendly Panchayats)
 - Cash transfers with plus interventions (financial literacy, life skills and behaviour change communication)
 - Blended platforms to reach out of school on life skills, career readiness and to bridge the digital divide

Integrating GT Lens in Curricula and Partnerships

- Strategic Partnerships with **feminist organizations** and those **working with men and boys** in multiple states
- **GT checklist for curricula** conceptualised in collaboration with HQ
- **Adolescent Toolkits** with a GT lens adapted and contextualized for engagement with multiple stakeholders
- **Comic Books and Digital illustration** developed in consultation with adolescents and inspired by their life stories

Mainstreaming Positive Masculinities

- **1 million boys** engaged on dialogues on harmful masculinities
- **One size does not fit all** - Piloted in 7 states and adapted for different settings(schools, youth platforms and communities)
- Integrated in **flagship schemes, school curriculums and village level councils**
- Initiated a **Community of Practice** internally to drive work on PM and promote cross-learning
- Mainstreaming PM in **adolescent parenting, youth leaving care institutions** and conflict-prone areas

Lessons Learnt

- **Shared understanding of Gender Transformative Approaches** takes time and needs consistent capacity building
- Current monitoring tools **falls short of measuring normative shifts** and gender transformative actions
- GT Approaches are **localised, cost intensive and require long term pilots and evidence-based advocacy** to be integrated within government platforms
- Need for **generating localised evidence** to understand the feasibility and scalability of interventions

Opportunities and Considerations for Phase III

Scale

Integrate GT approaches in government programmes and to leverage resources at scale

Quality

Greater emphasis on Adolescent Girls Leadership and linkages to employability (along with mainstreaming positive masculinities)

Reaching the Last Mile

GT lens to address intersectional issues and multiple forms of exclusion and vulnerabilities

Adaptive Programming

Moving beyond 'minimum package' to ensure mental health and GBV support services, CSE and parental engagement is integrated in multi-sectoral programming and services

Promoting gender mainstreaming in economic empowerment and vocational education to expand opportunities for adolescent girls

The Niger GTA experience

Salmey Bebert
2 May 2023

Gender Transformative Accelerator Experience

3 days workshop in 2021

- Analysing Global Programme interventions (and adjacent) using 'Gender Norms Continuum' tool
- Deeper dive analysis of each priority at each level of the ecological model
- Identification and design of key actions with catalytic potential
- Road map with accelerator actions

Road map GTA Niger: Where are we?

Action 1: Gradually integrate messages and investments into addressing negative and developing positive masculinities into existing interventions.

Action 2 and 3: Invest in capacity strengthening on gender transformative approaches for providers and service managers with a focus on frontline health workers, first responders, and teachers interacting directly with adolescents.

- Workshop for content analysis of tools modules with gender transformative glasses carried out and points for improvement identified
- Some results with the traditional leaders who have started to integrate women into their courses
- Education Sector: Analysis of tools and Gender Module for teacher training to consider gender transformative aspects, carried out. Mentoring program for girls ongoing –
- CSE integrated into highest school for teacher training in Niamey and faculties of education sciences of Zinder and Tahoua
- Child protection sector: mapping carried out, workshop for revision of tools and modules planned

Road map GTA Niger: Where are we?

Action 4: Promote gender integration economic empowerment and vocational education in order to create expanded opportunities for adolescent girls.

Action 5: Design and implement an SBCC programme using radio and social media to promote gender norm change and positive masculinities.

Action 6: Conduct a gender analysis of partner institutions, starting with the National Assembly, to identify gaps and make a capacity building plan (Policy).

- SBC: program to deconstruct gender stereotypes – partnership signed with PMC (survey ongoing to understand context..)
- Ongoing discussions with National Assembly for a partnership

Action 4: Promote gender integration economic empowerment and vocational education in order to create expanded opportunities for adolescent girls, Why ?

Gender stereotypes continue to restrict adolescent girls' ability to imagine a life for themselves beyond what is expected

Need to expand opportunities for girls to see themselves and what they can do is fundamental to transforming gender norms

When girls can see different role models, they can disconnect stereotypes and begin to identify life goals beyond marriage and childbearing

Existence of pilot experiences of girls' economic empowerment investments that can be reviewed and scaled up with particular emphasis on occupations formerly reserved for boys

Main achievements

What have we done?

Out of school adolescent girls: In 2022, **30,668** girls aged 12 to 22 benefited from support :

- ❖ Discovery workshops for most popular professions for boys (wooden carpentry, metal carpentry, car repair, electricity, plumbing, cell phone repair, motor pump and grain mills, manufacture of cosmetics, market gardening)

#formationprofessionnelle
#droitsdelenfant

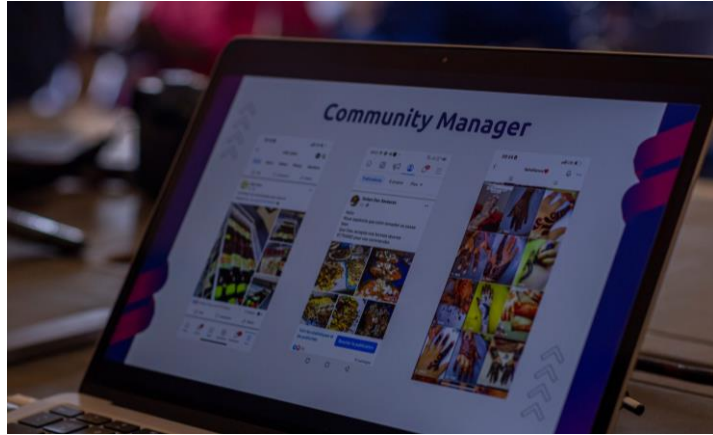

Main achievements

- Mafita initiative, human-centered approach to support girls on projects
- Workshop to build capacity of adolescent girls in participatory video using cell phones
- Itinerant capacity building workshops for adolescent's girls in digital technology
- Mentoring program and training in trades of their choice

Activities with adolescent girls

Main achievements

For girls in school

- Coaching program, mentoring for girls by other girls (academics)
- Competition of excellence with Miss intellects : Miss Mathematics, Miss Literature
- Awarding of prizes to the best female students

Challenges and gaps

- ❖ Appropriation of GTA tool by all stakeholders
- ❖ Common understanding of interventions that change power relation
- ❖ The limit of self-diagnosis (being judge of one's interventions)

Way forward

- ❖ Simplify and popularize GTA tool
- ❖ Generalize its application at every level
- ❖ Continue technical support for measurement strategies and building in accountability
- ❖ Initiate experience sharing

Addressing social norms and other drivers of child marriage: Social and behavior change as a programme approach

Alessia Radice
2 May 2023

Behaviour Change Programmes

Behaviour change programmes are often based on decision-making models that look like this:

MIND

ENVIRONMENT

What drives a behavior?

PSYCHOLOGY

Attitude, interest, self-efficacy, intent, risk perception.

SOCIOLOGY

Social influence, norms, community dynamics, meta-norms.

ENVIRONMENT

Communication environment, emerging alternatives, governing entities, structural barriers

High Prevalence of Child Marriage

Financial

Religious beliefs

Peer pressure

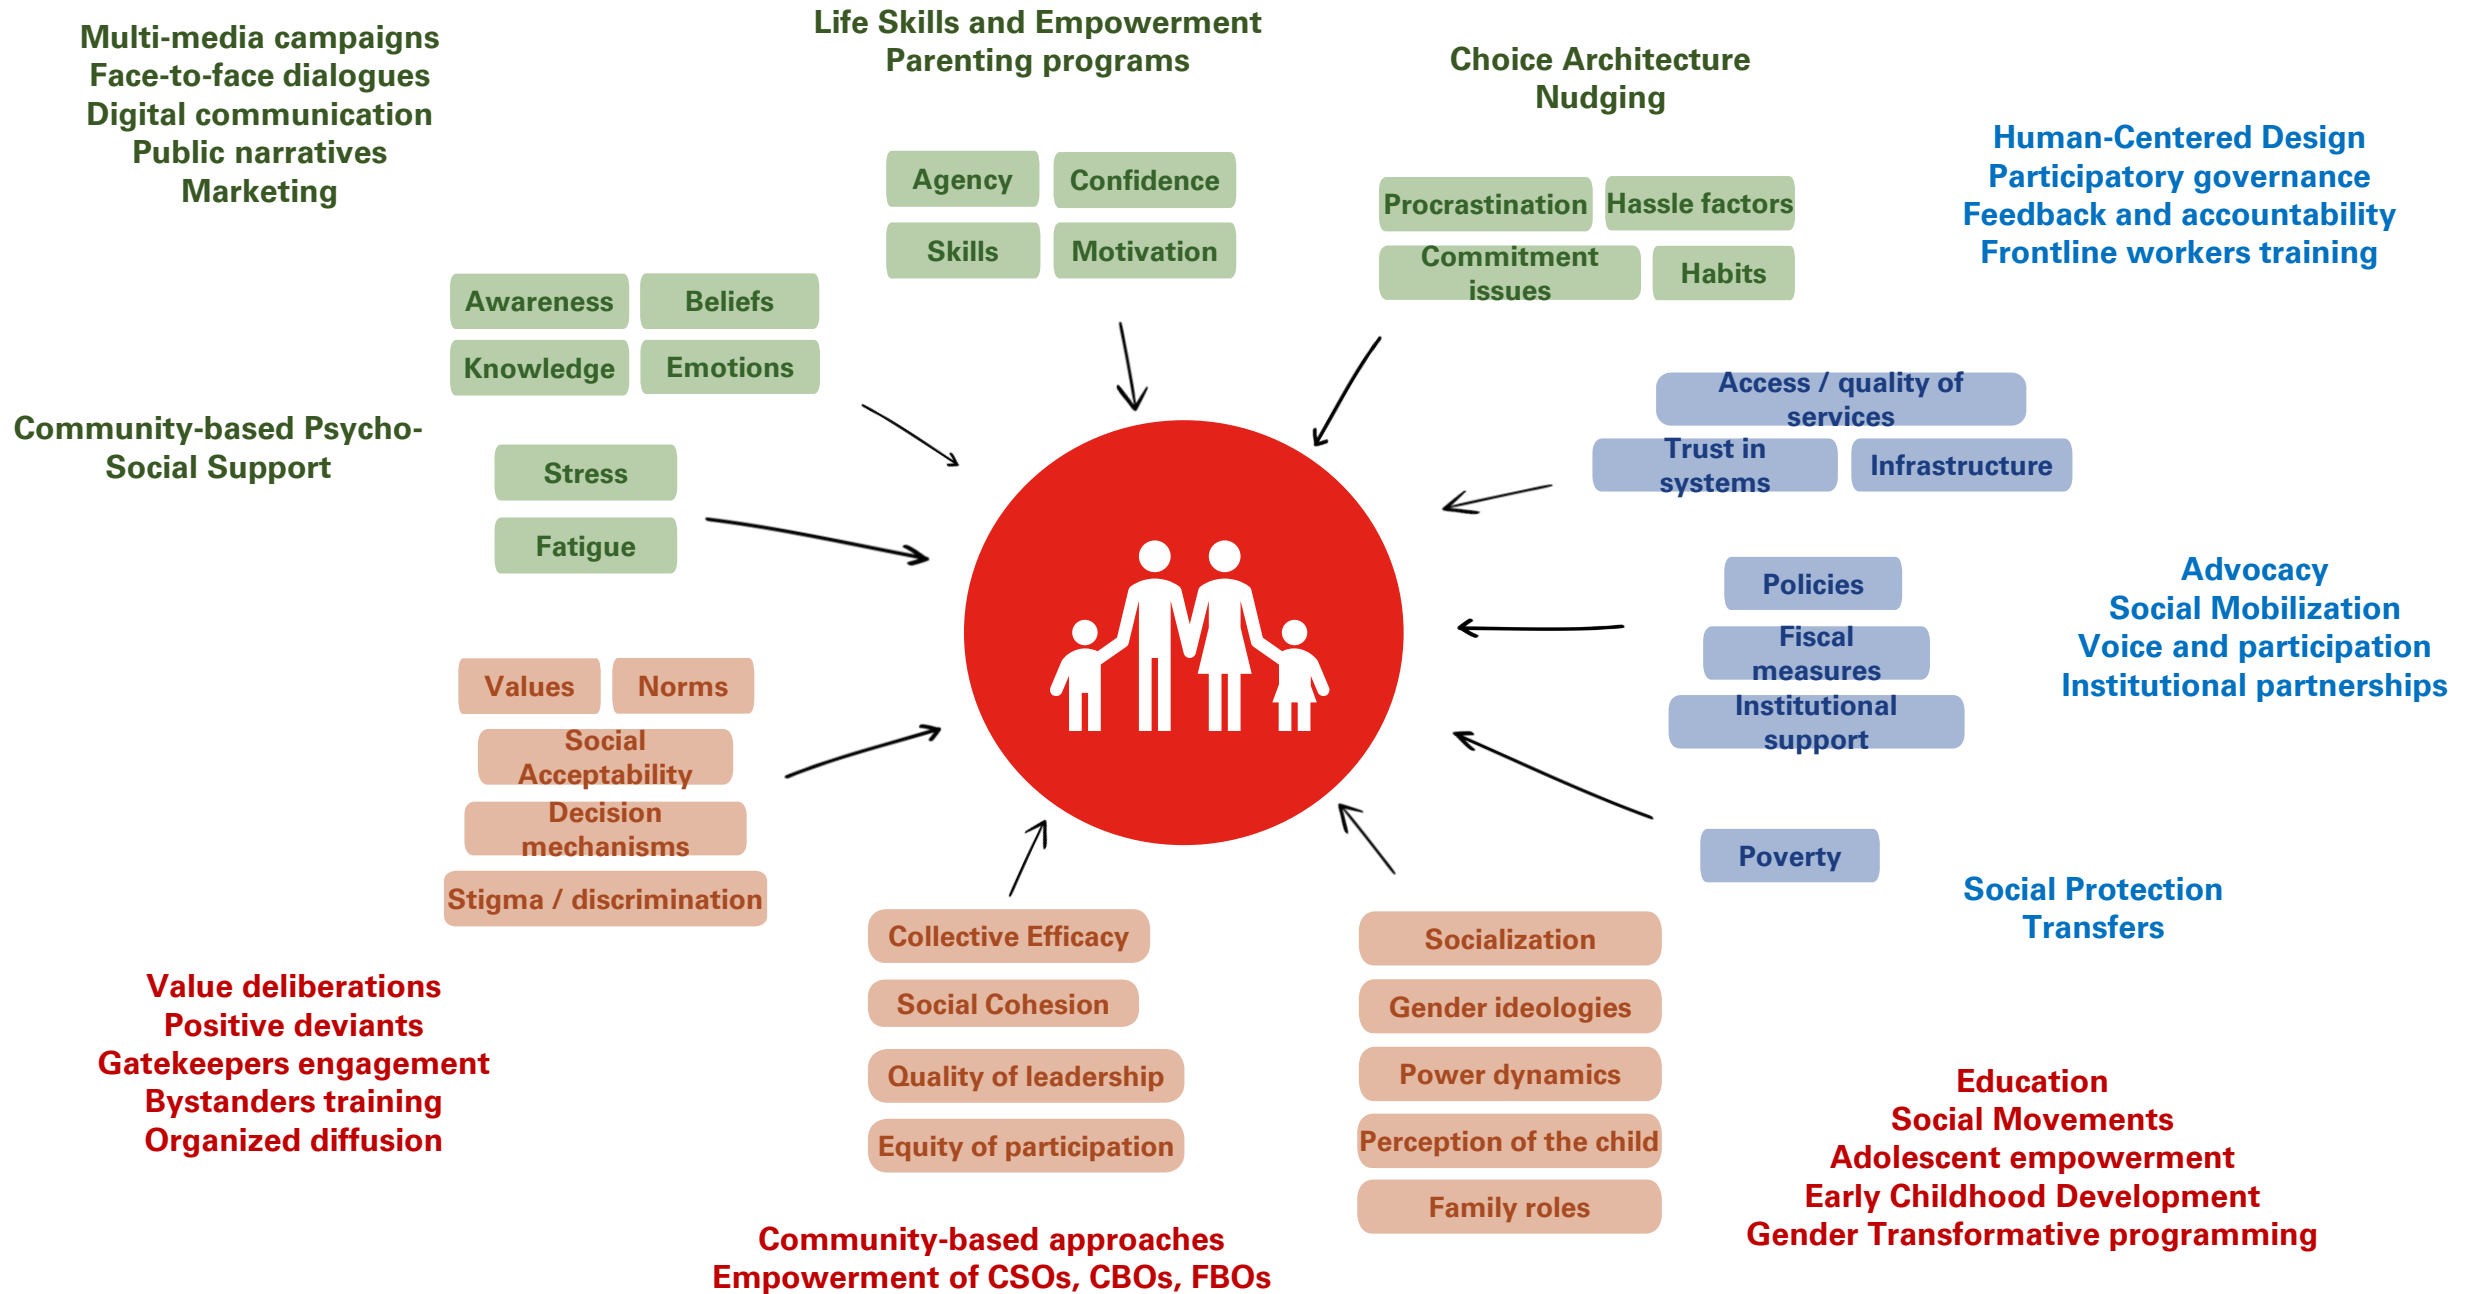

Custom

Positive Deviant

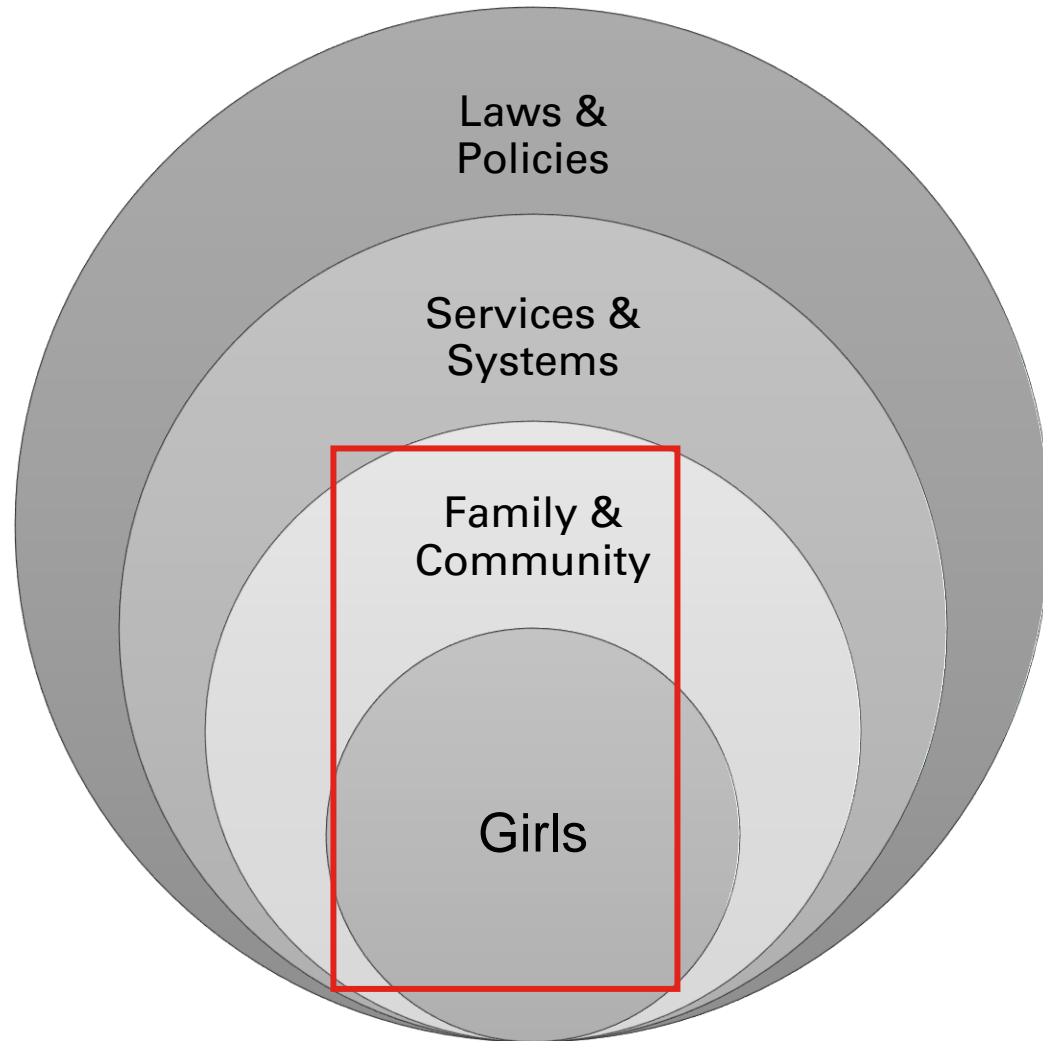

Safety

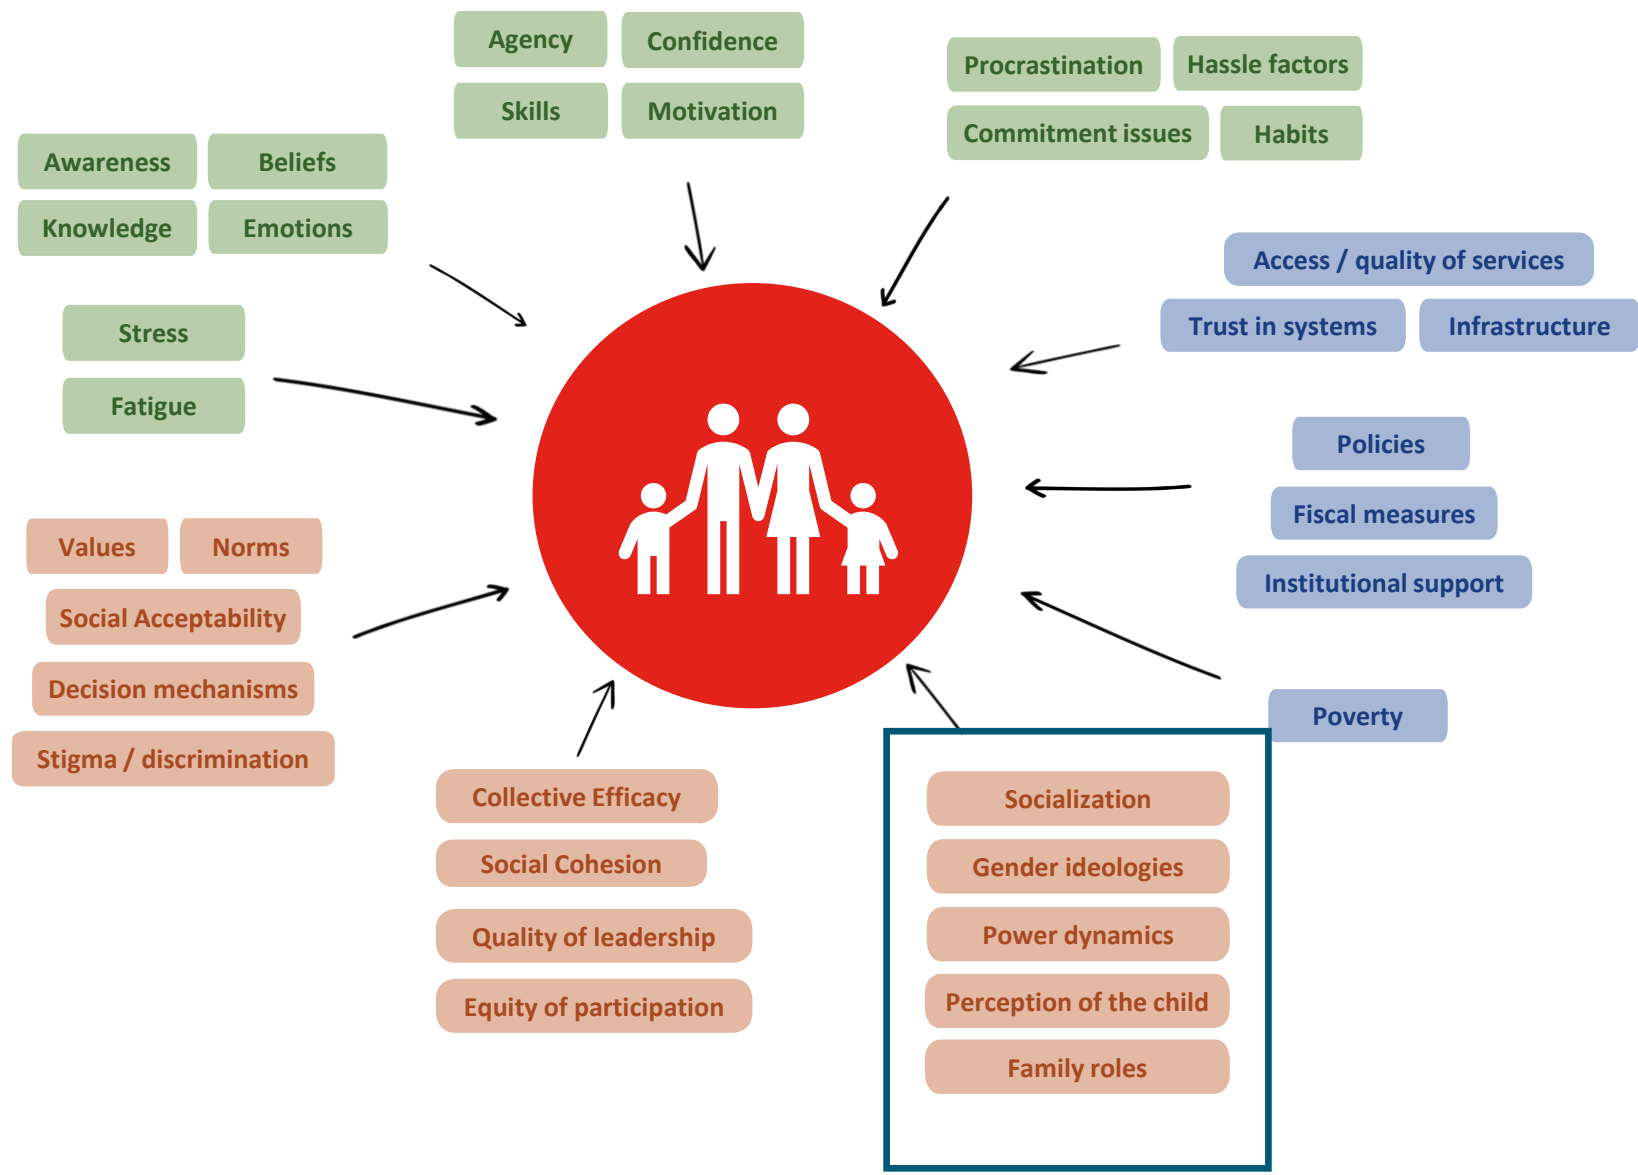

Dispute

Global Programme Results Framework

Meta-Norms

Socialization Process

Gender Ideologies

Power Dynamics

Conflict Resolution

Decision-making Patterns

Family Roles &
Relationships

Perception of the Child

Legal Compliance

Attributes of Norms-Shifting Interventions

Seek Community Level Change

- Move beyond individual level change
- Engages people at multiple levels
- Is community-led/rooted within community groups

Accurately Assesse Norms

- Corrects misperceptions

Create Space for Critical Reflection

Create New Positive Norms

Uses Organized Diffusion

Gender norms

Critical considerations for moving forward

Leyla Sharafi
2 May 2023

Gender Norms are “sticky”

Are **informal rules**, deeply entrenched and widely held beliefs, roles, standards and expectations **governing human behaviours**. They sustain a patriarchal hierarchy of **power and privilege**.

Similar but not the same...

Knowledge &
Awareness

Behaviour
change

Gender norms

Attitudes or
practices

Decision-making is an important measure of power.

MEN'S RECOLLECTIONS OF MALE DOMINATED DECISION-MAKING IN THEIR CHILDHOOD HOMES

Proportion of male respondents who say men were the sole decision-makers in their childhood home regarding large investments and children's education.

Decision-making is an important measure of power.

WOMEN'S RECOLLECTIONS OF MALE DOMINATED DECISION MAKING IN THEIR CHILDHOOD HOMES

There is limited evidence of a generational shift to more equitable attitudes

GENDER ATTITUDES ACROSS AGE COHORTS (MEN)

Men's Gender Attitude Scale combined score (0 to 3) across age groups, drawing again from three items: "A man should have the final word about decisions in his home" (power); "A woman's most important role is to take care of her home and cook for her family" (roles); and "A woman should tolerate violence in order to keep her family together" (violence). A higher number indicates more equitable views. Results are statistically significant at the $p < .05$ level across the age groups.

Parents' attitudes and behaviours shape their sons'

WHEN PARENTAL INFLUENCES OVERLAP

Gender Attitude Scale combined score (0 to 3) among all respondents, regardless of gender; drawing from the restricted sample for which data exist on both mother's outside work and father's involvement in domestic work. The score among those who witnessed these elements of equality for both parents is by far the most equitable. Findings are significant at the $p < .05$ level.

Emerging findings on social norms change in child marriage and girl's empowerment

Programmes *intend* to address social norms

Need to have shared definitions, terminology and ToCs

Prioritize key norms regarding child marriage

Need for consensus building on approaches

Identify relevant reference groups for girls

Use a gender synchronized approach

Need for quantitative measurement instruments

Margaret E. Greene, Jeffrey Edmeades & Manahil Siddiqi, 2023.

Learnings from the **Passages** Project

Advance understanding

Strengthening scale up

Enhancing evaluation
and measurement

Improving implementation

Looking forward to Phase III

How will the Global Programme include a gender norms change approach in the prioritized interventions based on the evidence of what works?

How to make sure that the work on gender norms will be grounded in gender transformative approaches?

Moving beyond awareness raising:

The SBC Playbook for community-led approaches to designing SBC and social norms activities addressing child marriage and FGM in WCAR

Catherine Muller
2 May 2023

Co-creating a contextualized SBC Child Marriage/FGM Playbook

Burkina Faso, Ghana,
Guinee Bissau, Liberia, Niger, Nigeria

PHASE

1

Collective inputs, including
stakeholder co-creation

- **PLAYBOOK DRAFT 0**

PHASE 2

Country workshops to further develop
and test

- **PLAYBOOK DRAFTS 1-7**

PHASE

3

Operationalize, finalize

- **FINAL
PLAYBOOK**

The greatest potential for the
playbook is to demonstrate
**respectful, contextual
approaches** to discredit myths and
address the underlying drivers to
harmful behavior.

Human-centered approaches prioritize
empathy and interventions that align with
existing habits, build upon positive
behaviors, and dispel myths that
reproduce cycles of harm.

How will the playbook be used

FIRST, REFLECT.

(Re)set the relationship

- Options for dramatization, role play, using storytelling or visuals, etc.
- Intergenerational prompts prototype
- local warm-ups that involve resonant with themes or activities (religion, music, theatre, etc.)

SECOND, REVEAL.

Design with the community

- Understanding visible and invisible influence
- Tools that map social networks to uncover opportunities that do not rely on prominent leaders alone
- Influencer mapping; Ghana's flash cards, Nigeria's Stepping Stones, Collective Change spark discussions, etc.

THIRD, REVISIT.

Test with the community, Monitor change

- Introduce interactive SBC tools that a community can use to facilitate conversations on their own, root cause tool, tracking positive practices tool, etc.
- Revisit the community to practice using or iterating on offered tools, allowing them to be flexible for resonance, sustainability

Playbook requirements:

Approachable for communities

Clear structure and tools for implementers

Flexible

Participatory

Ethiopia's Experience in Developing the New Community Conversation Toolkits to Eliminate Harmful Practices

Zemzem Shikur
2 May 2023

Background: Gaps necessitated a revision of the child marriage toolkits

Lacked proper age and sex appropriate as well as mixed group discussions.

Limited consideration of the gender Transformative approach.

Lacked a dedicated M&E component that allows tracking both immediate and intermediate results.

The size of participants was an average of 60 per group which compromised the quality of CC.

CC was development focused rather than linking humanitarian–development nexus.

Limited focus on the topics including gaps in addressing the underlying causes like gender and social norms

Limited clarity of the change pathway and lack of tailored performance tracking, monitoring, and evaluation.

Presentation modality was limited to plenary discussion which lacked the tools to be used for active participation and engagement of all participants.

Process: Human-Centered Approach

Process: Human-Centered Approach

Role Model Academy is the broader approach used to facilitate long-term and sustained change and Safe Space for stressed settings.

Tailored manuals for Adolescent and Adult participants in development settings and a separate toolkit for humanitarian settings.

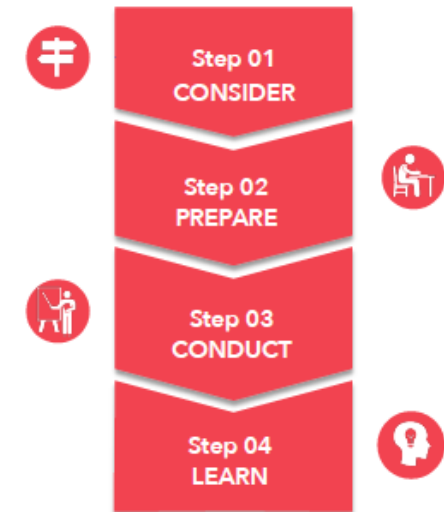

Age and sex appropriate as well as facilitate mixed group discussions. Gender Transformative approach underpin the toolkit.

It has a dedicated M&E component that allows tracking both immediate and intermediate results.

Introduced new concepts around different types of marriage and redefined concepts such as strong family in a way that helps to prevent child marriage.

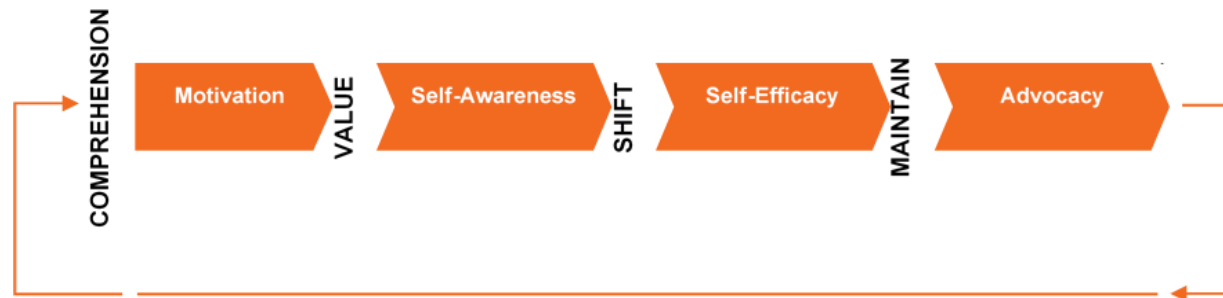

How the toolkit is structured:

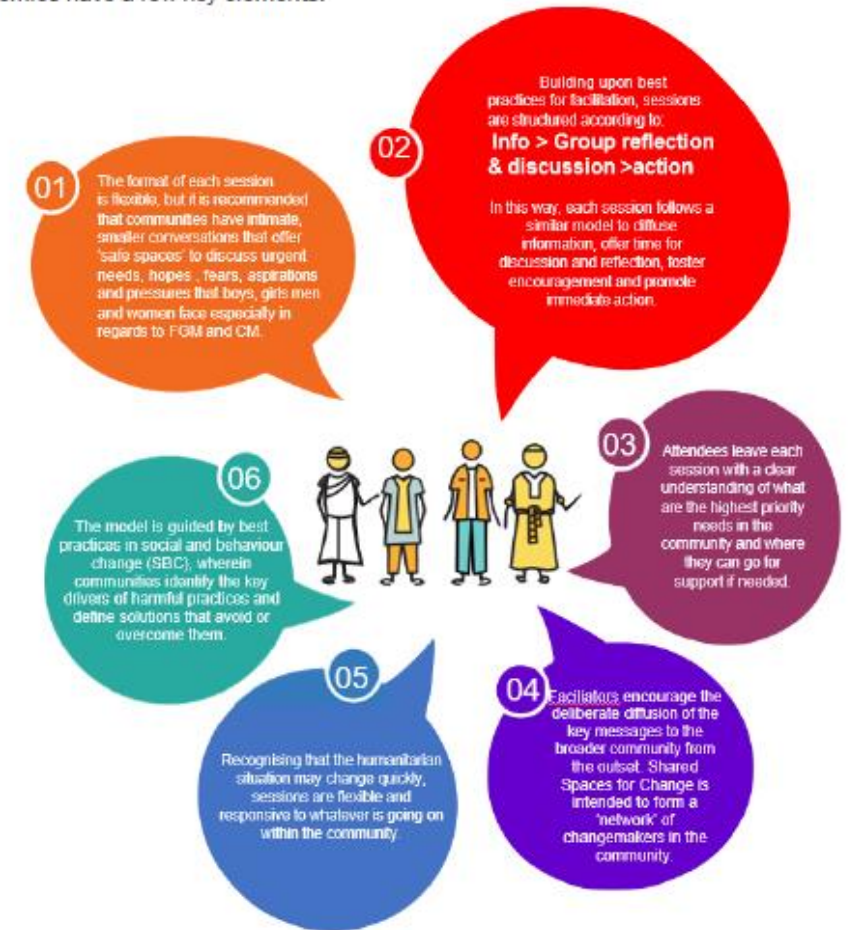

Change Pathway: The Theoretical Framework Underpinning the Role Model Academy

- Four elements - “core pathway” is the theoretical basis for the design of the Role Model Academy sessions.
- Each session is designed to advance participants through a comprehensive, sustainable behavior change journey.
- Over the course of the 12 sessions: as participants unite their attitudes around a desired behavior, social expectations begin to shift around that behavior and thus norm change is catalyzed.

How it works: at a glance

The Academies have a few key elements:

Operationalization

- Facilitators: age 22-35 for adolescents
- Participants: 15 -25
- Sessions: 12 for the Role Model Academy and 10 for the Safe Space.
- Safe Space: 4 -5 participants per sub-group to discuss hopes, fears, aspirations, and pressures.

Conversations for young and adolescent girls and boys are structured around the concept of a “Role Model Academy”: a kind of ‘preparatory school’ for adulthood, family life, personal development, and more equitable relationships that contribute to the well-being of the community.

Conversations for young and adolescent girls and boys are structured around the concept of a “Role Model Academy”: a kind of ‘preparatory school’ for adulthood, family life, personal development, and more equitable relationships that contribute to the well-being of the community.

Conversations for adults are structured similarly around the concept of a “Role Model Academy” where parents and community leaders can identify root cause problems in their community (which prevent them from achieving their “role model community”) and align on practical ways to resolve those problems.

Status and way forward

ToT is provided

Training of facilitators underway in the target communities as well as printing.

Full rollout expected to start in May.

Mentorship support initiated.

Launched and communicated by MoWSA to sub-national areas.

Spur cross-country/regional learnings on the process of developing and implementing CC toolkits.

- It will be the main intervention that will continue to stir social and gender norms at the national level.
- It will be used by members of the National Alliance to End Child Marriage and FGM.
- To be forecasted CC as an area to be evaluated for phase 3 evaluation or country-level evaluation.

Acknowledgment

- It is joint work with the SBC team in ECO and Child protection
- Child Protection and SBC colleagues in ESARO and HQ contributed since the inception

end
child
marriage
A voice. A chance. A future.

unicef
for every child

Session 9

Maximizing impact: Quality implementation and leveraging services and systems

Moderated by:
Karin Heissler, UNICEF WCARO

Speakers:
Yam Lal Bhoosal, Government of Nepal
Deepa Prasad, UNFPA India
Patricia Bahm, Government of Sierra Leone
Moussa Amina, Government of Niger
Humaira Aziz, UNICEF Bangladesh
Meron Negussie, UNFPA ESARO

Leveraging synergies at all levels for multi-sectoral services for the most marginalized and vulnerable girls in Nepal

Yam Lal Bhoosal
2 May 2023

Situation of girls

- Almost **one in three** young women are married before age 18 and **one in ten** are married before age 15
- 32% of girls aged 15-19 become **pregnant by age 19**
- 29% of girls with no education are **married before 15** and 66% **before 18**

Policy Frameworks

Opportunities to Leverage Synergy for Services

- National Strategy on Ending Child Marriage 2016
- Children's Policy
- Development of Road Map of Implementing SDGs, Aligning with 15th Periodic Plan (2019-24)
- Provincial Level Strategies.
- School Education Sector Plan
- National Health Policy Plan

Synergy and convergence is essential at all levels of government to ensure quality services for vulnerable children and **flagship multi sectoral programs** can facilitate that synergy.

Future Directions for Strengthening Synergy

-  **Better coordination** between three tiers of the Government
-  Strengthening **monitoring and reporting** mechanisms at all levels
-  Designing and strengthening **flagship programs** like Rupantaran
-  Services through **case management** process

Session 10

Integrated across the programme cycle: Monitoring, evaluation and learning

Moderated by:
Amy Weiss, facilitation team

Speakers:
Joseph Mabirizi, UNICEF HQ
Manahil Siddiqi, UNICEF Innocenti
Eduard Bonet Porqueras, UNICEF HQ

Monitoring, evaluation, research and learning In the Global Programme to End Child Marriage

Joseph Mabirizi
3 May 2023

- >Routine monitoring data
- >Evaluation findings
- >Research

Gather

Learning

How are we improving trust or confidence in data and evidence collected?

Adapt

Use

How are we using data and evidence to adapt?

How are we making data and evidence available for use?

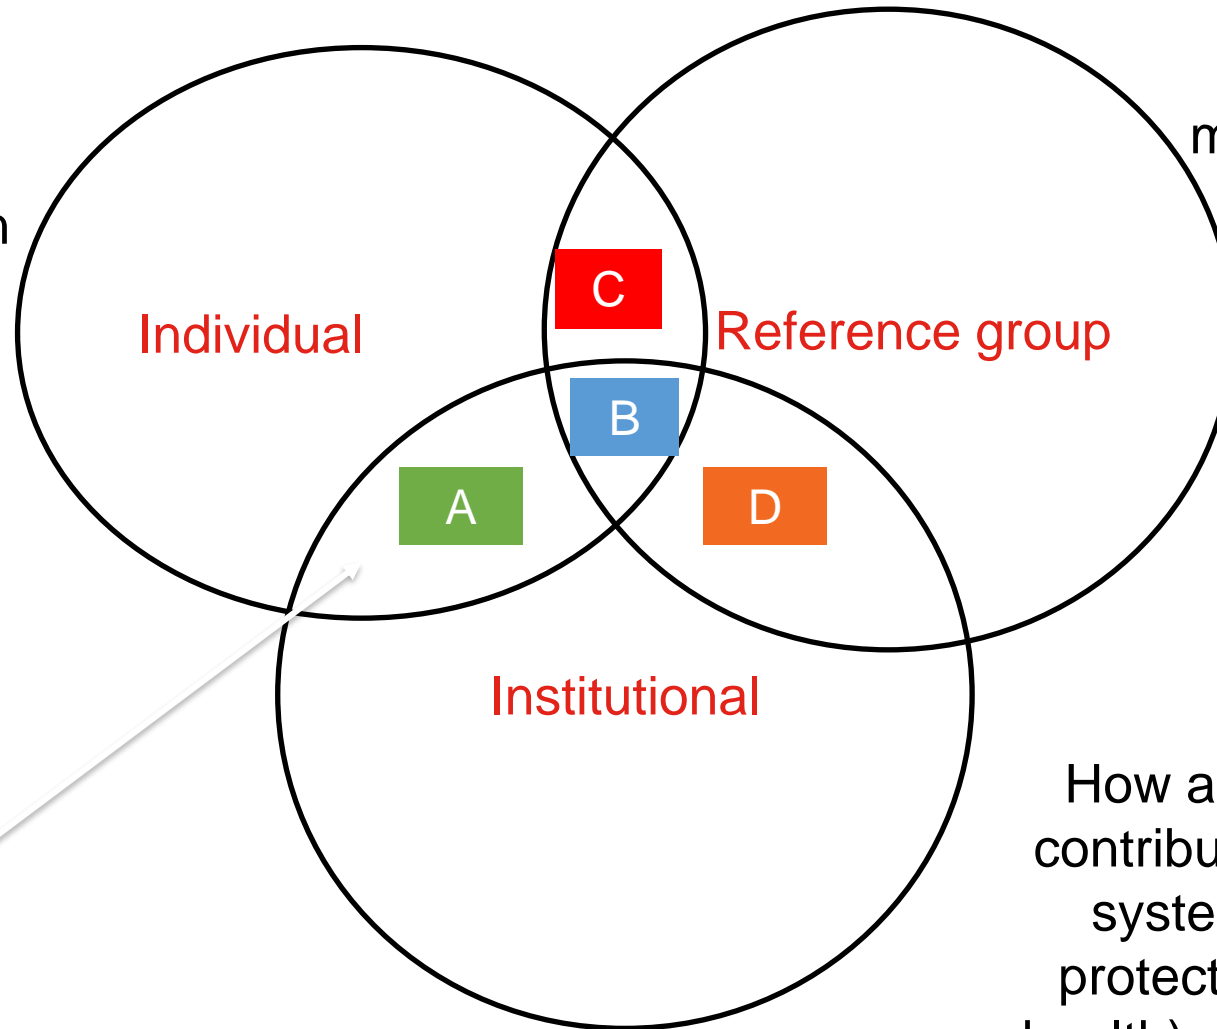

Mainstreaming of ongoing data collection has been ensured through closer coordination with relevant sectors (e.g., Bangladesh, India, Ghana, Uganda)

Consistency in programme data collection to improve availability of good quality data through standardized tools, e.g., Ethiopia, India, Ghana

Established common data systems to ease data accessibility and sharing with all stakeholders , e.g., Bangladesh, India

Closer coordination between UNFPA and UNICEF to review data and evidence and apply it to decision making e.g., Ghana and Nepal

How are you measuring changes in knowledge, attitude, self-efficacy, skills beliefs?

How are you measuring changes in knowledge, attitude, behaviours?

How are we measuring the intersections?

How are you measuring the contribution of policies & laws, systems (education, child protection, social protection, health), government structures, religious & traditional institutions?

Bridging the research to impact gap in Phase III

Manahil Siddiqi
3 May 2023

WHY EVIDENCE MATTERS

to end child marriage

Strengthens programmes, policies and systems

Including effectiveness, efficiency, and equity; and informs scale-up

Enables more efficient use of resources

Important especially when resources are scarce

Produces results

Increase the transparency and accountability of policies, investments and interventions

Promotes credibility of advocacy

~~Evidence as usual~~

**3 R's for evidence impact:
Responsive, Rigour, and Reach**

RESEARCH

research waste

methods and design for
evidence-based
programming leading to
faulty interpretation

MONITORING, EVALUATION AND LEARNING: THE STAR INITIATIVE TO END HARMFUL PRACTICES – ENABLING EVIDENCE-BASED ACTION

Research prioritization:

Identify, synthesize, align and monitor global, regional, and national research agendas

Evidence translation:

Support equitable access, use and uptake of evidence through open-access evidence portal on child marriage prevention and response and evidence workshops, convenings and guidance across languages

Evidence generation:

Provide technical assistance to country and regional offices to support high-quality evidence generation, lead design of multi-country, policy-relevant studies on effectiveness and implementation

Capacity-building:

Enhance research competencies through workshops and training, strengthen research partnerships, strengthen mechanisms for good research practice (ethical and peer-review structures), review programmes in light of new evidence

RESEARCH

3 R's for Impact

IMPACT

Contributing to learning

The UNFPA and UNICEF Evaluation offices

Eduard Bonet Porqueras
3 May 2023

Are we using the information gathered through collaboration and learning activities from monitoring, research, evaluation to arrive at better decisions and make adjustments as necessary?

Learning from evaluation

01.

Integrate learning in evaluation design and process.

02.

Dissemination and promotion of use of evaluation results.

03.

Evaluation management response.

Learning through evaluation in the Global Programme Phase II

- Assessment of Global Programme adaptations to COVID-19
- Impact Feasibility Assessment for the Global Programme in 2022
 - Interventions mapping to assess feasibility of impact evaluation
 - Impact evaluation design of selected interventions - Impact Evaluation Catalyst Fund, 2023
- Evaluation of the Global Programme 2020–2023

- Utilization focused, clear, feasible

GP is designed to prevent child marriage, by addressing the needs of adolescent girls who are most at risk of child marriage

GP design is responsive to changes over time including country contexts

GP has in place mechanisms and practices to capture results and learn from interventions

GP has identified or made efforts to identify scalable interventions, strategies and approaches for preventing child marriage

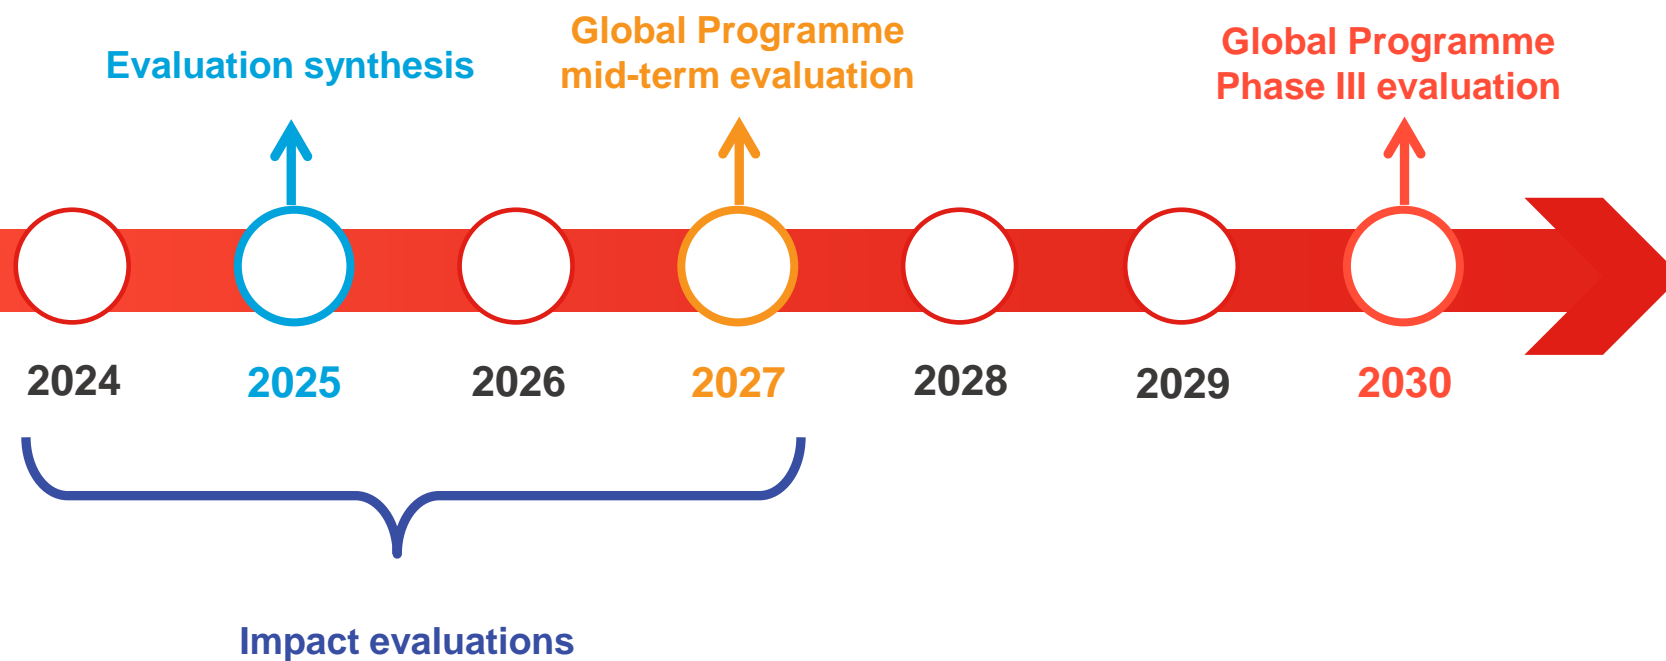

Evaluation Framework elements in the Global Programme Phase III

Ensure that credible and quality evidence from evaluations is generated and used

- For learning and accountability of organizations and stakeholders

- To contribute to global knowledge on what interventions work, and how

- To inform the allocation, timing and predictability of funding and programmatic priorities

Session 11

Crisis-adaptive programming: Practical solutions and adaptations

Moderated by:
Indrani Sarkar, UNICEF MENARO

Speakers:
Angela Baschieri, UNFPA ESARO
Josue Ango, UNICEF Burkina Faso
Haithar Ahmed, UNICEF Ethiopia

Climate change and child marriage

Angela Baschieri
3 May 2023

01.

Impact of Climate Change on Child Marriage

- *UNFPA value proposition on climate change*
- *UNFPA & Queen Mary Scoping Review of the impact of Climate Change on Child Marriage.*
- *Practical solution to programming*

Impact of Climate Change and SRHR

01. Climate change is a major threat to the vision of human-centred sustainable development as outlined by ICPD PoA

02. Climate change is a multiplier of existing health vulnerabilities and gender inequalities and will make the transformative results more difficult to achieve and sustain over the Decade of Action.

- 03.**
- **CC impact on maternal health (direct/indirect)**
 - **CC impacts on FP (indirect)**
 - **CC impact on GBV**

UNFPA and Queen Mary:

Scoping Review of the Impact of Environmental Crisis and Child Marriage

- We reviewed: the academic and 'grey' literature on the link between environmental crises and child marriage.
- We conducted a search of Google Scholar, Scopus and MedLine for both peer-reviewed academic literature and 'grey' literature. A total of 24 relevant articles were identified, including both quantitative and qualitative work.

Contextual factors influencing pathways to child marriage:

Law, governance and policy

Sociocultural norms

Human rights and gender equality

Ability to adapt and respond to crises

Environmental crises are more frequent and intense.

Extreme temperatures / Sea level rise and acidification / Water shortage / Precipitation / Disasters and extreme weather / Soil degradation / Biodiversity loss

Displacement and migration

Loss of resources and impoverishment

Instability and loss of supportive structures and networks

Families and communities lose factors protecting against child marriage and develop coping strategies.

Dowry and bride price are used as a resource / coping mechanisms for families.

Families marry their daughters to reduce cost and secure protection for daughters

Girls lose access to education

Efforts to protect daughters from sexual violence

**The factors driving child marriage are exacerbated.
Child marriage increases and SRHR is negatively impacted.**

FGM / IPV / STIs / Early fertility / Loss of educational opportunities / Social isolation and loss of support / Obstetric and neonatal complications

The review shows environmental crises worsen known drivers of child marriage

Local socio-cultural contexts such as bride price or dowry practices further shape how these factors affect child marriage.

While we present some studies from Sub-Saharan Africa, much of the evidence described in this review is taken from South Asia, and specifically Bangladesh.

Given many of the areas with the highest current rates of child marriage face the gravest environmental threats, action to tackle child marriage must take account of the link identified in this review.

Efforts to adapt to climate change must address the link between environmental crises and sexual and reproductive health and rights, including the link to child marriage presented in this review.

Similarly, action to tackle child marriage should consider how local and global environmental crises may affect the drivers of child marriage and associated harmful practices such as FGM.

Practical solutions and adaptations for crisis-adaptive programming

- *Ensure programme account for impact of environmental crisis on SRHR & harmful practices including child marriage*
- *Strengthen community and household resilience*
- *Strengthen protective system - protect girls from sexual violence during crisis*
- *Strengthen data and studies to ensure understanding of those women and girls most impacted – vulnerability assessment to SRHR/child marriage*

Crisis programming: Practical solutions and adaptations

The case of Burkina Faso

Josue Ango
3 May 2023

Context

Humanitarian overview

- ❑ 1,999,127 IDPs at the end of February 2023, according to government data, CONASUR)
 - 1,167,907 children (58.42%)
 - 479,190 women (23.97%)
- ❑ 292,956 households
- ❑ All 13 regions host IDPs
- ❑ All the areas of implementation of the program are strongly affected by the security crisis: Sahel, Est, Centre-Est, Centre-Nord, Nord and Boucle du Mouhoun

Socio-political and institutional situation

- ❖ High level of inflation
- ❖ Change in Government Priorities: focus on the Security and Defense Sector
- ❖ Institutional instability

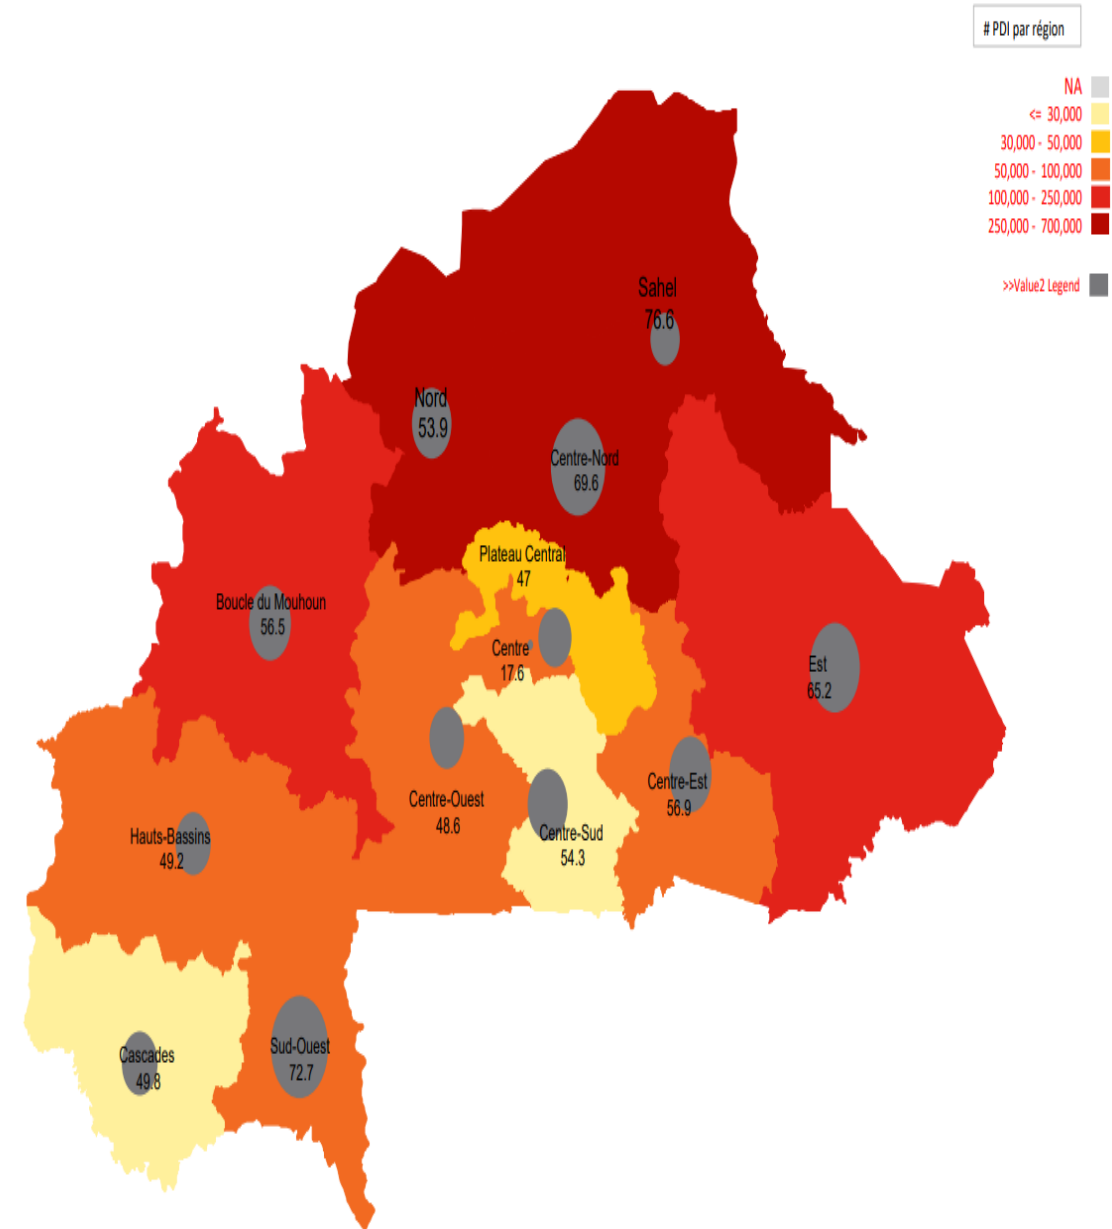

The issue

National scope

- One in ten women is married or in union before the age of 15.
- One in two women is married before the age of 18

Exacerbation due to the security crisis

- The deepening economic crisis has made households poorer
- Considerable reduction in school provision
- Closure of health centres
- Reduction or even cessation of some CM interventions in some implementing areas
- Strengthening certain "religious practices"
- Change of priorities

Adaptation strategies of the child marriage programme

- Adopting a community-based approach: Mentors and Relays recruited from within the community to ensure continued access to services
- The integration of key prevention messages from CM
- Consideration of IDP sites
- Communication approach with a focus on digital
- Use of mainly local media and other platforms such as “QG jeunes” and U-Reporters
- Activation of toll-free numbers
- Empowerment of communities, especially vulnerable and at-risk girls
- Strengthening community-based child protection mechanisms
- Implementation of gender-transformative approaches

Challenges to ensure NEXUS

- Continue and strengthen the mentioned above adaptation strategies
- Develop / Strengthen and maintain local partnerships
- Continue work on changing norms to ensure the sustainability of the action/build resilience
- Strengthening the technical capacities of humanitarian actors on child marriage
- Integrate prevention and response actions on child marriage into the HRP
- Include a CM indicator among the HRP indicators for monitoring the child marriage issue
- Develop technological tools to facilitate monitoring in areas with a high-security challenge: geolocation, data collection, documentation of activities – photos

Crisis programming: Practical solutions and adaptations

The case of Ethiopia

Haithar Ahmed
3 May 2023

Introduction

Female genital mutilation (FGM) and child marriage increases during a crisis (climate events and conflict settings).

In 2022, in Ethiopia child marriage has increased by over 4 percent in drought-affected regions (SNNP, Somali, and Oromia).

Child Marriage has increased in the SNNP region by 18.5% and the Somali region by 53%, however, child marriage has decreased 5.7% in the Oromia region.

Practical steps taken in bridging the humanitarian and development for the prevention of FGM & child marriage programme

Preparedness

Documented risks and community protection mechanisms for preventing FGM & child marriage during climate events (droughts & floods).

Planned corresponding actions to risks identified at the community conversation sessions.

Needs assessment & situational analysis

Alerted child protection teams to include questions in FGM & child marriage and participate in multi-sectoral assessments (such assessments done in Oromia, Afar, and Somali regions).

Mapped number of target beneficiaries, community structure, and child protection workforce who have moved into IDPs for continued programme interventions.

Designing and Planning

Based on identified risks designed four minimum key intervention areas of men-boys engagement, community conversation, religious leaders, empowerment, and safe space for adolescent girls

Re-purposing existing or ongoing tools/documents being developed for responding to emergencies an example is an abridged version of the community conversation manual for humanitarian settings.

Changed programme design at the country level through work plans to responding emergencies in the focus regions and districts.

Domiciled at CPiE HAC indicator related to FGM and child marriage programme - # women, men, girls, and boys reached by social norm change interventions.

Implementation and monitoring

- Collaborated with the Bureau of Women, Children, and Social Affairs to do prevention of FGM & child marriage in IDP sites as target beneficiaries have moved there.
- Collaboration with the CPHA team on joint PD on CPiE & prevention of FGM and child marriage (For example Imagine one day in SNNP, Oromia).
- Documentation via human interest stories related to climate change, conflict, and harmful practices.
- Conducted a trend analysis of child marriage cases reported to government authorities over comparative months and years.

Harnessing the power of communication in bridging the humanitarian and development for the prevention of FGM & child marriage programme

Following links of human-interest stories of girls, we can document in relation to child marriage cases in humanitarian settings.

- [How our Child Protection team in Ethiopia is helping prevent child marriage amid a severe drought \(sharepoint.com\)](#)
- [Child marriage on the rise in Horn of Africa as drought crisis intensifies \(unicef.org\)](#)
- <https://www.theguardian.com/society/2022/apr/30/ethiopian-drought-leading-to-dramatic-increase-in-child-marriage-unicef-warns>
- <https://www.unicef.org/ethiopia/stories/drought-pushes-more-and-more-girls-child-marriage-not-girls-fiinxee>
- <https://www.unicef.org/ethiopia/stories/i-was-forced-marry-man-twice-my-age-exchange-some-cattle>

Challenges faced and corresponding solutions by Ethiopia Country Office in integrating the nexus approach into FGM & child marriage programming

Challenges

Lack of geographical convergencies (most emergency areas are outside FGM focus districts).

Inadequate tools and documents guiding the implementation of HP programming in conflict and climate-affected settings.

Vulnerable and displaced HP para-professionals including community conversation facilitators and Anti-HTP committees.

Corresponding Solutions

- Deliberate focus on new areas due to emergencies (conflict and climate) and developed joint programme interventions with other thematic areas (CPHA) example Imagine One Day and Bureaus of Women, Children, and Social Affairs.
- Re-purposed existing or ongoing tools/documents being developed for responding to emergencies an example is an abridged version of the community conversation manual for humanitarian settings.
- Continued HP interventions at IDP camps through the Bureau of Women, Children, and Social Affairs. Registration of girls (with phone access) from Somali and Oromia IDP sites to be included in the IVR.

Challenges faced and corresponding solutions by Ethiopia Country Office in integrating the nexus approach into FGM & child marriage programming

Challenges

Lack of information, data, and knowledge by communities and most government agencies and the link between vulnerabilities to HP incidences in relation to emergencies.

De-prioritization of HP interventions by government and development as not lifesaving in conflict and climate change settings.

Lack of additional funds for HP programme to respond to conflict and climate change

Corresponding Solutions

- Deliberate push and inclusion of FGM as a push factor to child marriage into multi-sectoral assessment done for IDPs resulting from conflict and climate change. Conducted a trend analysis over comparative months and years.
- Made internal push on FGM and child marriage as part of vulnerabilities emanating from conflict and drought through availing necessary data to back.
- Flexibly used Global Programme fund. For NYHQ to push for additional donors (OCHA-CERF).

Way forward for Ethiopia Country Office in integrating the nexus approach into FGM& child marriage programming

Conducting a post-emergency setting assessment to examine the impact of climate change and conflict on HP programmes, lessons learned, and recommendations.

Establishing new friends and donors in relation to climate change, conflict, and HP. For NYHQ to push for additional donors (OCHA-CERF).

Strategic positioning of Prevention of child marriage at the center of child protection and gender-based violence in emergencies and other allied sectors (nutrition, health, and education).

Development of key messages of child Marriage in crisis settings.

Session 12

Launching Phase III: Developing a global communications campaign

Speaker:
Jo Weston, Wunderman Thompson

Creating a movement of public and private support to propel us through to 2030

Developing a global communications strategy for Phase III

Jo Weston
3 May 2023

01 CONTEXT

The challenge we've been set
and how we plan to address it

OUR BRIEF

THE ASK FROM UNFPA-UNICEF

Develop and execute creative communications to launch and sustain Phase III

1 Highlight what has been achieved to date

2 Present the ambition for the next 6 years

3 Acquisition and retention of partners

Clear and compelling, multi-country, multi-channel campaign that maximises political & financial support

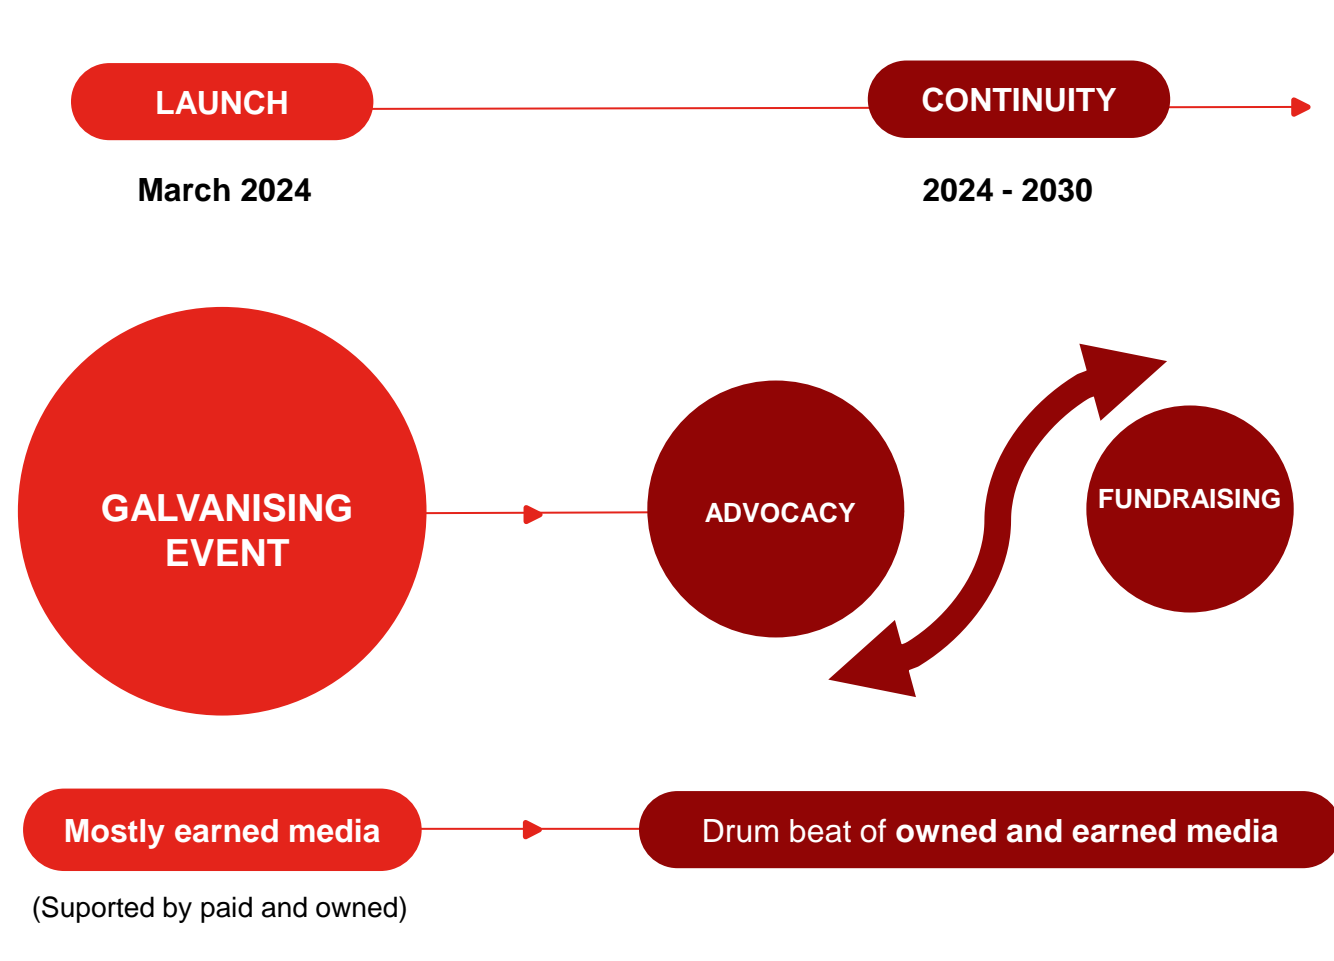

OUR APPROACH

WHAT WILL THE CAMPAIGN LOOK LIKE?

Business Brian

"I want to make my mark. My personal measure of success is the impact I have."

PHILANTHROPISTS

Altruistic Amanda

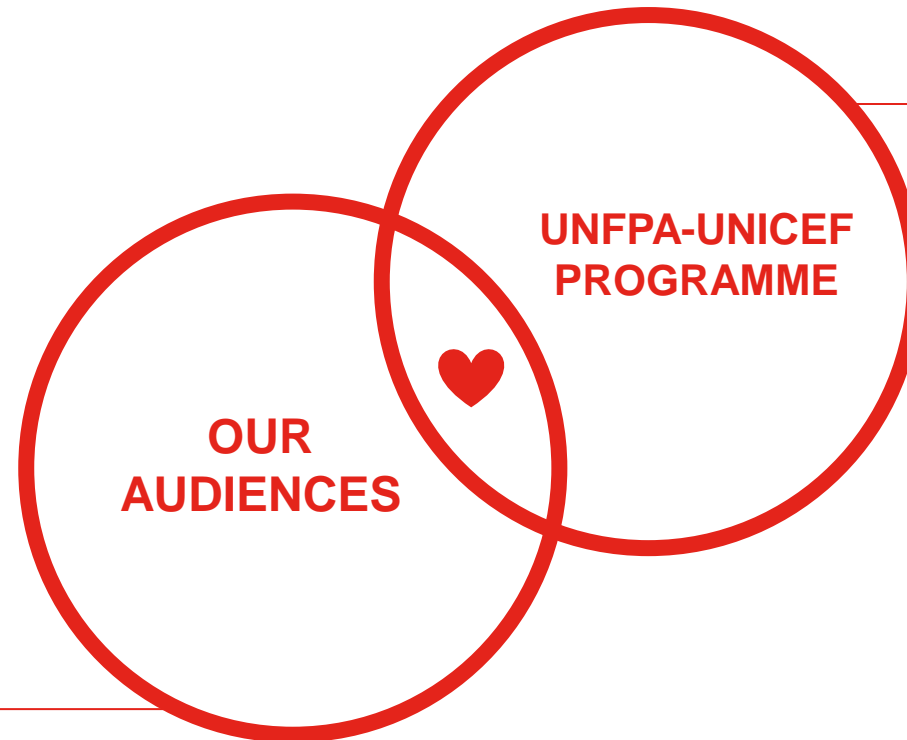

"I've been so fortunate in life. I want to give something back."

KEY INSIGHTS

THE COMMUNICATIONS CHALLENGE

In the midst of a global polycrisis, our audiences are busy and preoccupied.

They have a broad interest in sustainable development goals but **ending child marriage, isn't necessarily a priority.**

UNFPA-UNICEF have the biggest, most specialized programme to end child marriage, taking a **systemic, gender transformative approach to addressing gender inequality at the root cause.**

We need to break through the noise and connect with issues our audiences care about

ELEVATOR PITCH CHALLENGE

If you had to articulate
the value that the
programme brings in
ten words or less,
what would you say?

CORE VALUE STATEMENT

Girls are at the heart of our strategy.

Without girls we cannot end child marriage or achieve such a broad and deep impact across other SDGs.

WHEN GIRLS HAVE THE POWER OF CHOICE, WE ALL THRIVE

It's about giving girls a say in their future.

This is about girls understanding the power they already possess and becoming agents of change in their own right.

When girls can choose the life they want, they are more fulfilled.

Crucially, the positive effects ripple out across families and communities, local societies and economies.

HOW WE WANT TO SHOW UP

KEY PRINCIPLES

SENSE OF URGENCY

Time is running out, help us reach our goals and act now.

HOLISTIC VALUE

We need to address the root causes and power structures that perpetuate gender inequality on a personal, local and national level.

SENSE OF HOPE & EXCITEMENT

We've got a big ambition to end child marriage completely by 2030 and we are pushing forwards.

RESULTS-DRIVEN

We've already done so much, 25m child marriages have been avoided in the past 10 years.

Session 13

Leaving no one behind: Addressing intersecting vulnerabilities

Moderated by:
Germaine Haddad, UNFPA ASRO

Speakers:
Emilie Filmer-Wilson, UNFPA HQ
Elikem Vera Awuye, International Needs Ghana
Patricia Grundberg, UNFPA Mozambique
Ruth Kalaba Mekwi, YWCA Zambia

Leaving no one behind

In programming to end child marriage

Emilie Filmer-Wilson
3 May 2023

Why LNOB for Child Marriage?

01.

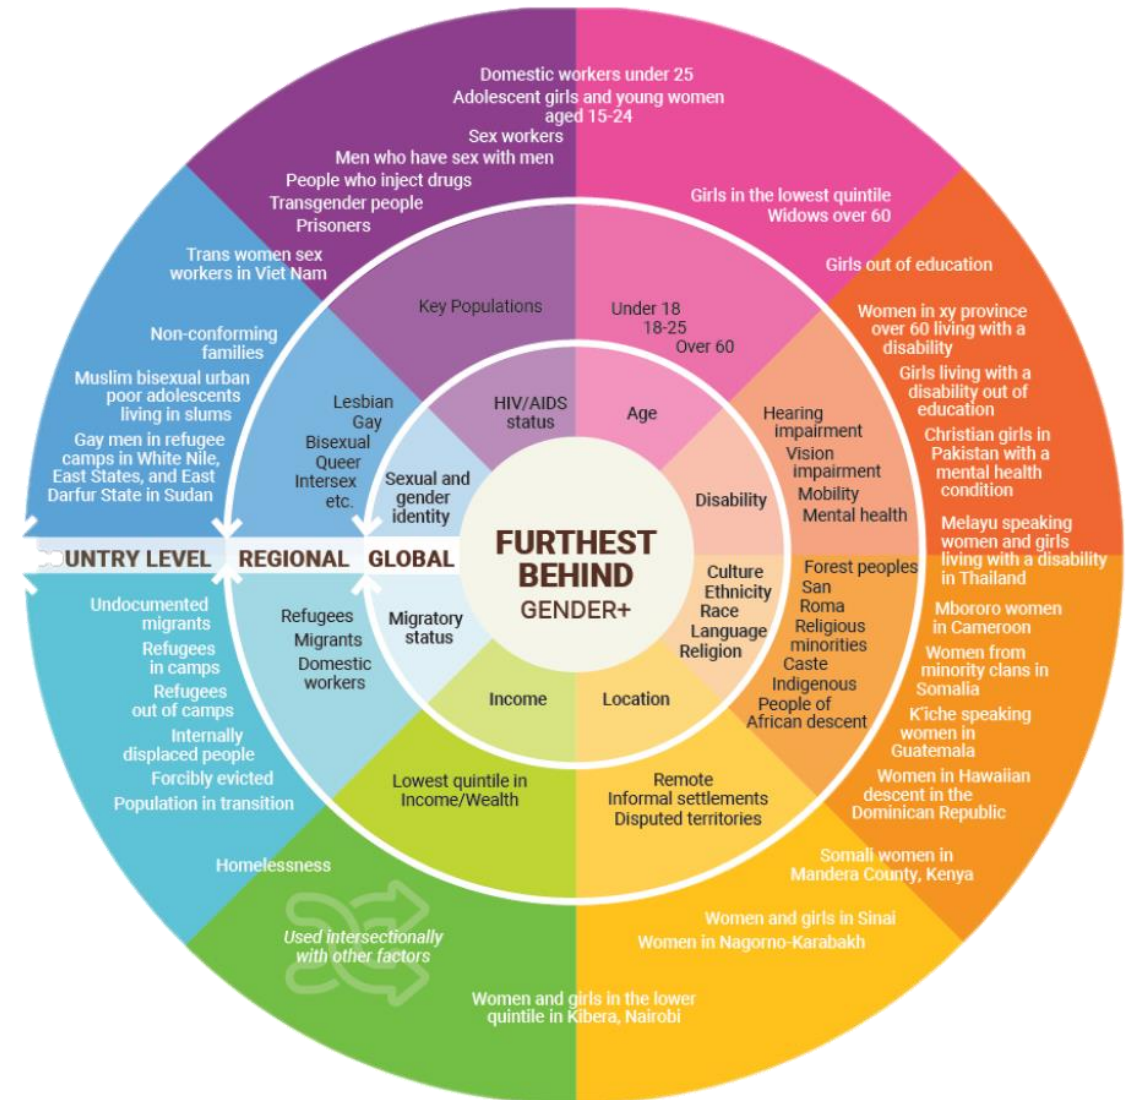

Critical to achieve SDGs: Unless address inequality, we will not reach the SDGs;

02.

LNOB is not an accident: Being left behind is often result of deliberate exclusion & discrimination. Requires targeted action;

03.

Right and smart thing to do: It is a human rights issue.

Key Findings from evaluations and assessments regarding LNOB

Challenges in Advancing LNOB

Three most facilitating factors

- Our **leadership** prioritises those furthest behind
- We have **skills** available in the country office for prioritising those furthest behind
- We have **funding** available for reaching those furthest behind

Three most inhibiting factors

- We do not have **sufficient funding** available for reaching those furthest behind
- There is not **sufficient data** or information available on certain groups
- The **political context** does not favour reaching those furthest behind

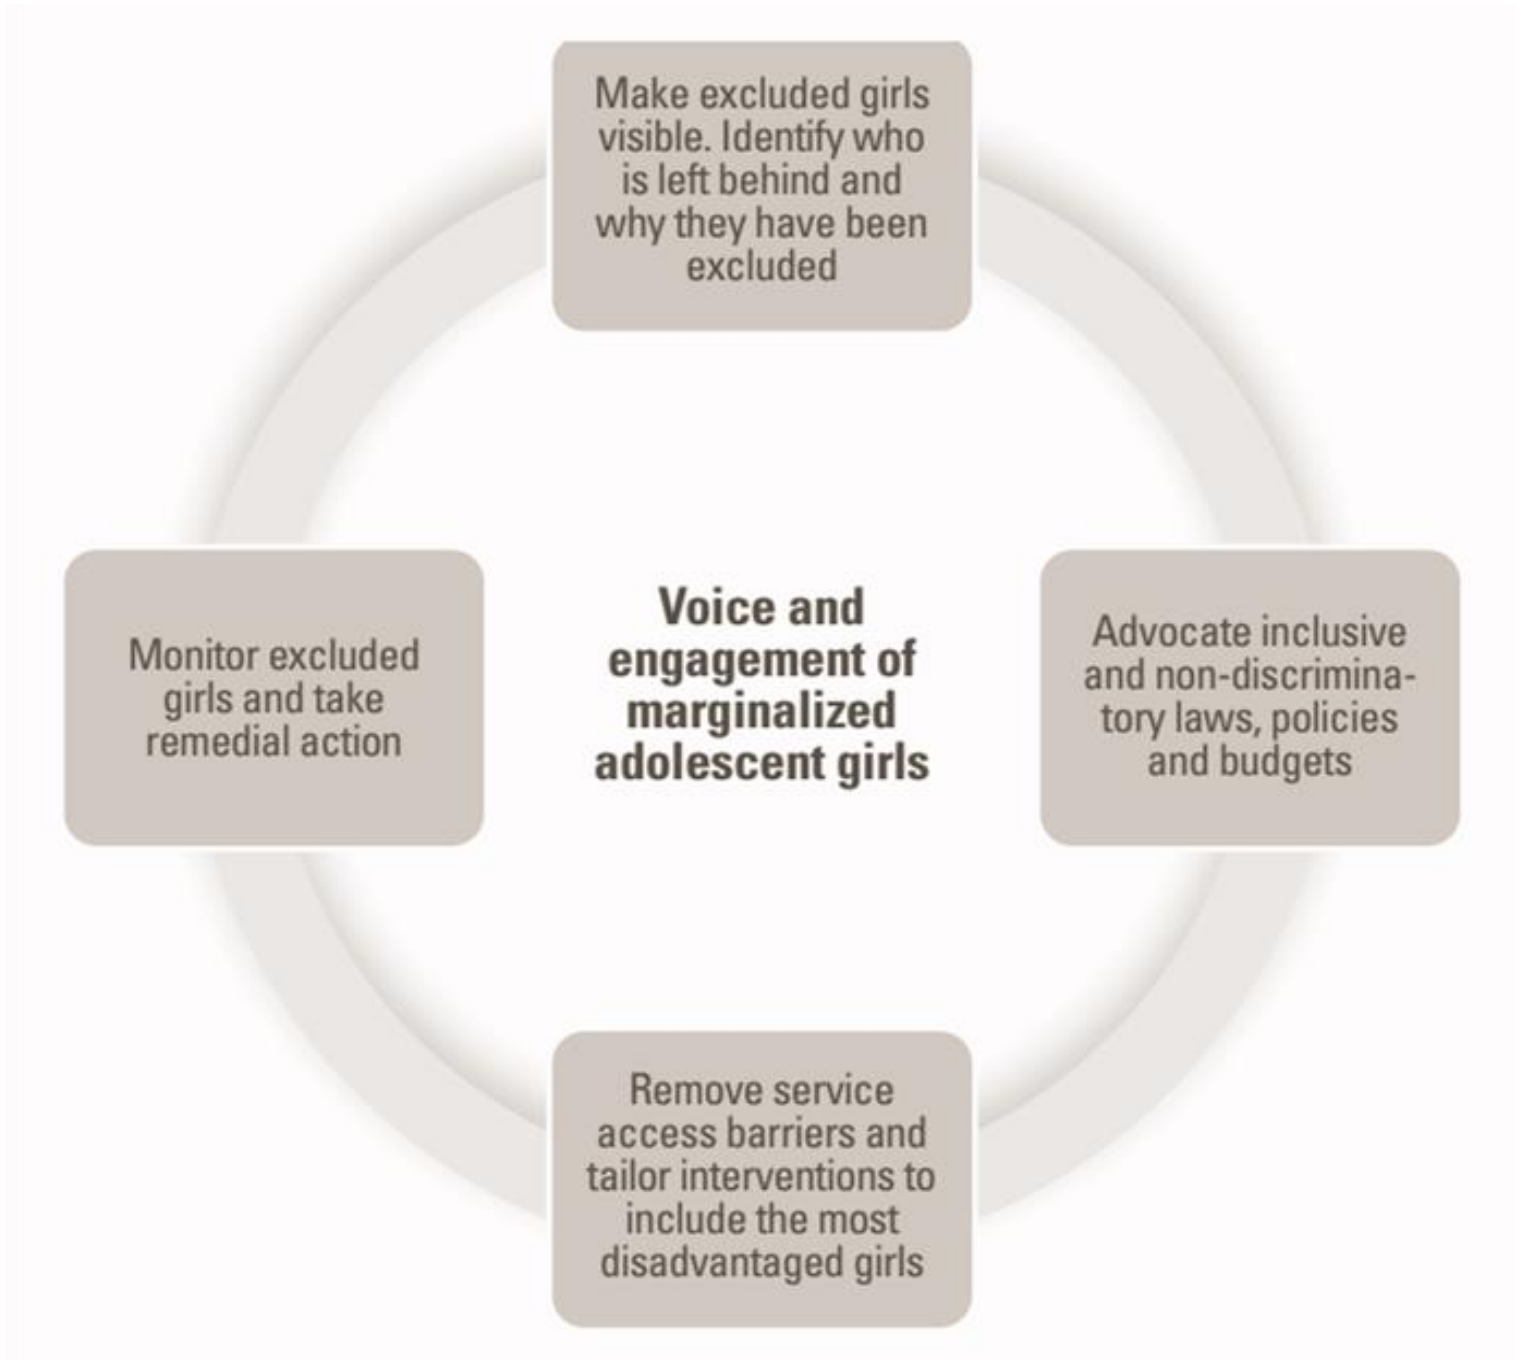

Challenges in Advancing LNOB

- **Prioritizing left behind groups is costly** and often not aligned with donor priorities of reaching a large number of people. Evidence on cost-effectiveness is needed.
- **Working with left-behind group requires to step out of the comfort zone:** it can be work intensive and little rewarding for staff. There is a tendency to continue business as usual with a new “mantra”: LNOB
- **Monitoring:** UNFPA’s approach to monitoring LNOB is not well understood at RO and CO level
- **Limited staff capacity at country level:** colleagues wear multiple hats and lack time to network and effectively use the knowledge available
- **Risk appetite of UNFPA not clear:** Head office support for advocating on sensitive issues and dealing with backlash is considered

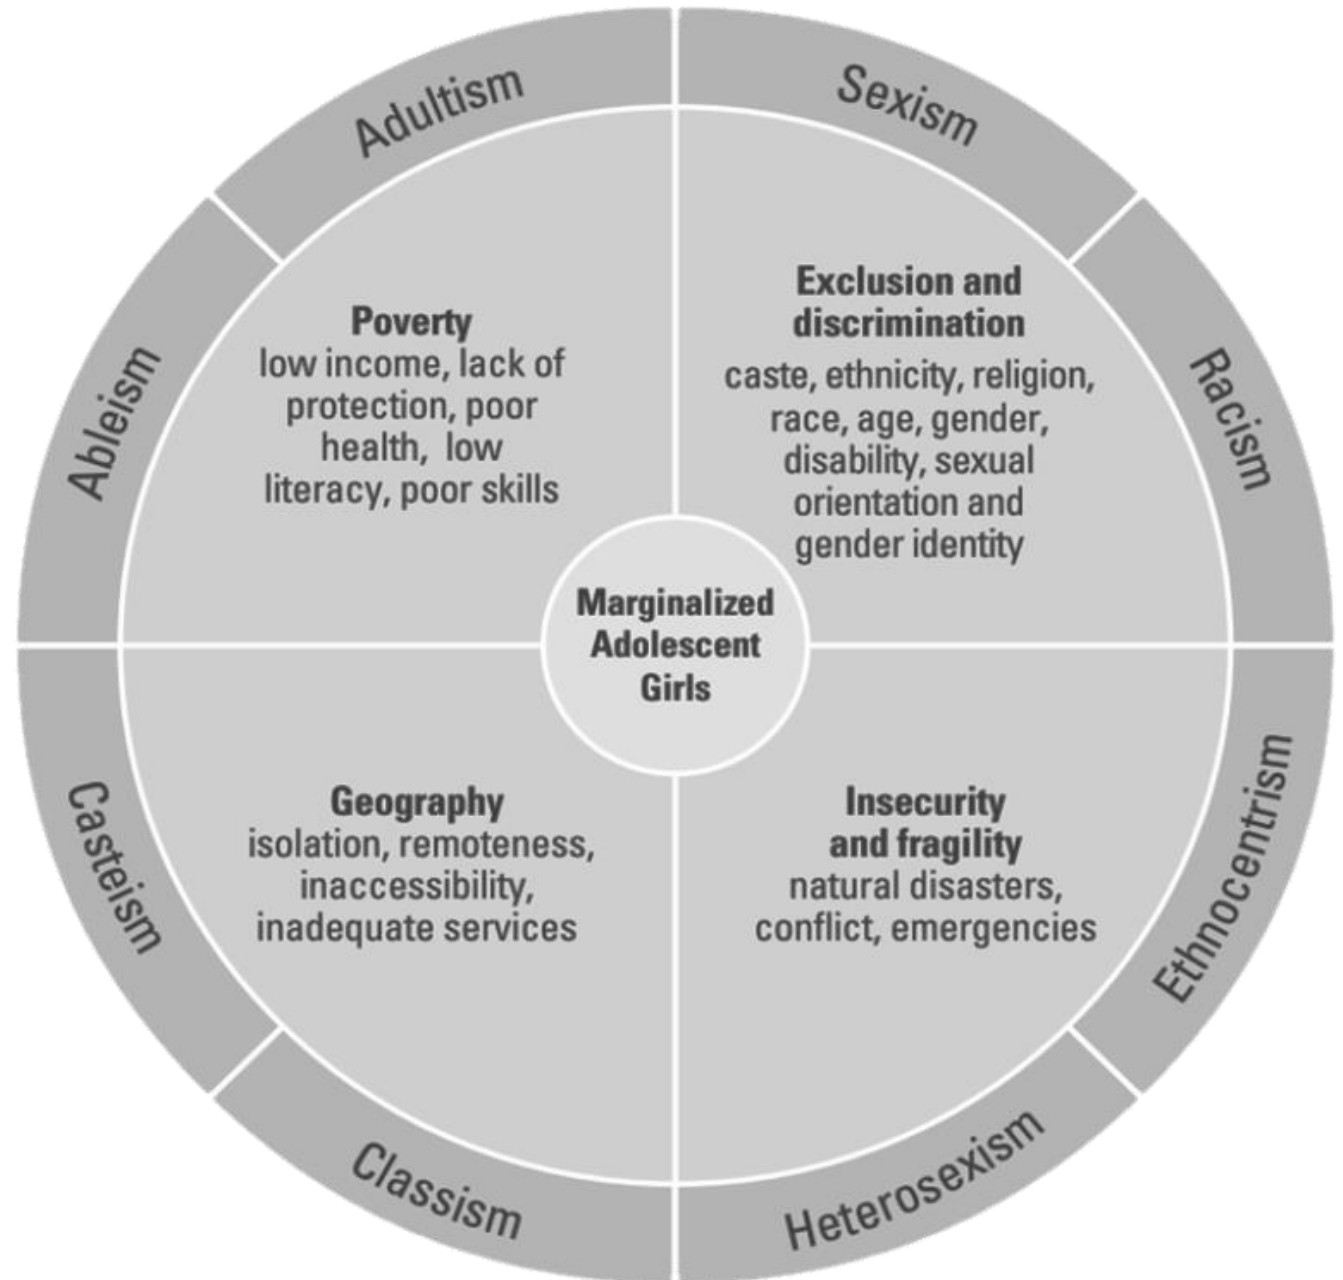

A human rights-based approach to efforts to LNOB

1. **Make the invisible visible:** disaggregate data to extent possible & invest in studies for new data
2. **Strengthen voice & participation & partnerships**
3. **Address root causes:** discrimination, social norms, stigma, xenophobia, racism, gender inequality
4. Take an **intersectional** approach
5. **Enabling national environment:** policies, laws (remove discriminatory laws, enact child marriage laws)
6. **Institutionalize accountability** in systems, regulatory structures and oversight mechanisms: Secures a feedback loop that bring to light systemic discrimination and ensures redress for violations
7. Engage with **international human rights mechanisms**, including treaty bodies, Special Procedures and UPR, to uphold human rights for all and create space for dialogue & partnership
8. Make **funding available**
9. **Mainstreaming** and **targeted approach:** specific programmes for specific groups **with indicators**

Programming cycle for **leaving no adolescent girl behind**

Intersections of power, exclusion & discrimination

Promoting Adolescents Safe Spaces (PASS)

Multi-component community-based programme aimed at providing intensive support to the most marginalized adolescent girls in Ghana

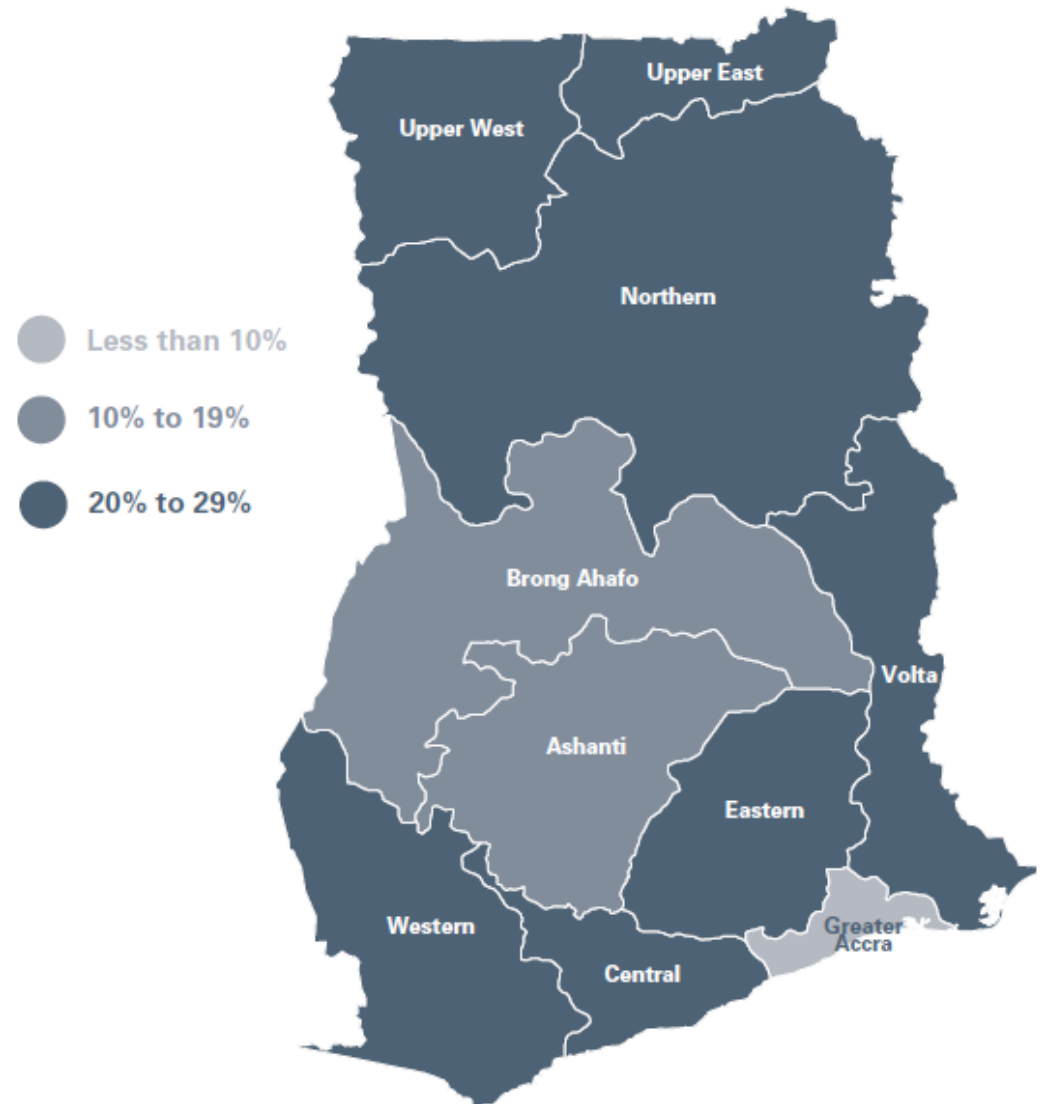

Vera Elikem Awuye
3 May 2023

Context in Ghana

- One in five young women married in childhood
- Highest levels of child marriage are seen among those who are both poor and have little education
- Some regions have made slower progress in reducing child marriage than others within the past decade

FIG. 2 Percentage of women aged 20 to 24 years who were first married or in union before age 18

Overview of PASS

- Jointly implemented by the NGO NORSAAC and the NGO International Needs Ghana in partnership with UNICEF and UNFPA since 2019
- Reaching a cohort of 4,300 adolescent girls in the four regions with high prevalence of child marriage and adolescent pregnancy every year

STRATEGIES

- Establish safe spaces for the most marginalized adolescent girls
- Deliver customizable life skills and comprehensive sexuality education for at least 31 contact hours over 9-12 months
- Refer girls to formal systems and services across sectors, including support to return to schools
- Provide economic empowerment skills and vocational training (in pilot stages)

STRATEGIES

- Engage boys and young men as allies to challenge gender stereotypes and promote positive masculinity
- Engage parents and caregivers in dialogues and create platforms to promote intergenerational conversations with adolescents
- Promote the engagement of traditional and religious leaders and community level structures
- Strengthen partnerships to invest and strategize to end child marriage
- Conduct baseline and end-line surveys to measure changes over time

ACHIEVEMENTS

- 25,000 adolescent girls received intensive support through safe spaces
- 3,800 adolescent boys and young men engaged in targeted sensitization and awareness raising sessions
- 24,000 community people engaged with community-based reflective dialogues
- Improved partnerships and collaborations among government, CSOs and INGOs

LESSONS LEARNT

- Intentional targeting by vulnerability, sex and age is key to reach the most marginalized and to provide age- and context-appropriate content
- Structured sessions on a weekly basis through safe spaces are essential
- Peer mentorship to monitor girls and sustain safe spaces
- Stakeholder engagement and community mobilization before/during the implementation
- Engagement of traditional and religious leaders to develop local community reforms/byelaws are effective for sustainability

WAY FORWARD

- Increase the reach and scale of the PASS initiative and facilitate access to services, with stronger linkages to government- and INGO-led initiatives
- Expand safe spaces programming to the communities affected by the Sahel crisis and other emergencies
- Apply a gender-transformative approach by strengthening and expanding a component of men's and boys' engagement
- Provide more girls with skills and vocational training in male dominated areas and/or favorable job markets
- Generate outcome- or impact-level evidence to inform effective programming

The Change Maker

“

If I hadn't lost my hearing, I wouldn't be where I am now! It leads me to unearth my potentials and to have a mentality that to succeed.

I want to be an artist, so that I can be able to communicate to everyone using picture and also a fashion designer to make good fabric for the people

”

Salmu Alhassan (16)
Joined PASS Programme in 2020

2023

FROM COHABITATION TO EMPOWERMENT

Intersecting vulnerabilities: Child marriage and early pregnancy

Country example from Mozambique

Patricia Grundberg
3 May 2023

Country context

Very youthful population

30.8 million inhabitants whereof **79%** below 35 y/o.

Child marriage

Rates ranging from **41-53%** depending on source used (incl. DHS, census, IMASIDA, InVic).

Early pregnancy

53% of girls have given birth by age 19. Childbirth 2nd leading cause of death among girls aged 15-19.

School attendance

Few girls complete primary education, and young women's illiteracy rates is nearly double that of young men.

The Global Programme in Mozambique

Strong synergies and complementarities with broader ASRH-programme Rapariga Biz (RB):

- Same 2 provinces whereof 6 convergence districts;
- Holistic & multi-sectoral approach involving: 1) mentorship in safe spaces; 2) youth-friendly SRH/GBV services in health facilities, schools and community levels; 3) in and out of school CSE; 4) economic empowerment; 5) community mobilization and SBC.
- Participants selected through vulnerability criteria incl.: pregnant/married girls, girls in poor/remote areas with limited access to services, girls with fistula, disabilities or HIV.
- Since inception in 2016, over 900,000 girls reached, with rates of child marriage and early pregnancy of less than 1%.

Policy advancements (through UPR):

Approved:

- Safe abortion – legal since 2014 (access remains a challenge)
- Decree 39 (night school for pregnant girls) – revoked in 2018
- **National Child Marriage Law – adopted in 2019**
- VAC in school mechanism – approved by the Ministry of Education in 2020

Currently under development:

- **National Action Plan for Children (PNAC III) – will include child marriage**
- Retention and reintegration of pregnant girls in school – ministerial instruction

Key ASRH & CSE interventions

01. Peer-to-peer mentorship and out-of-school CSE

Girls (RB) and boys (GPECM) 10-24 y/o peer-to-peer mentorship sessions and out-of-school CSE in safe spaces at the community level.

02. Youth Friendly Health Services (YFHS)

Financial and technical support to YFHS, incl. provision of contraceptives and training of service providers.

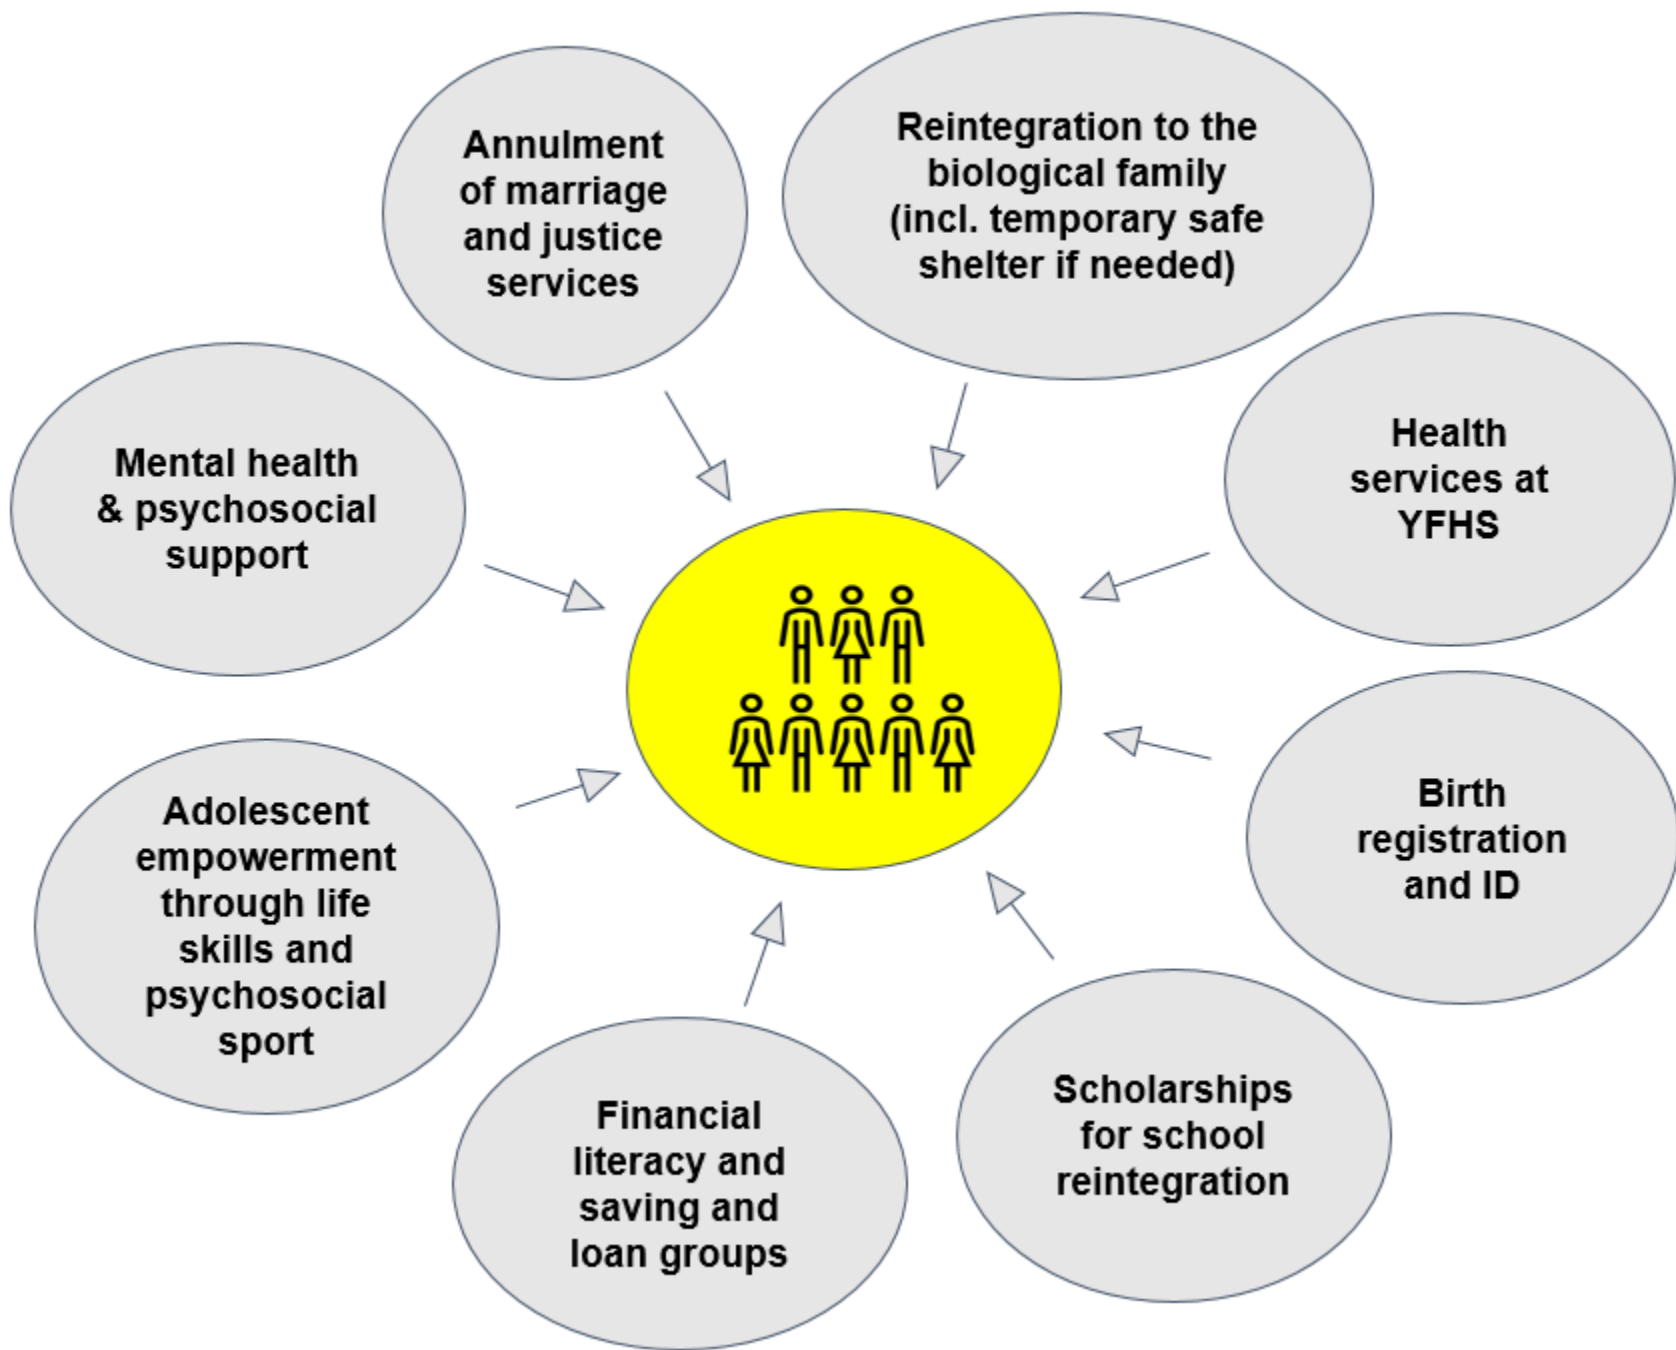

03. Mobile brigades & school health corners

Training of school ASRH councellors and provision of contraceptives. Referalls from school level to services providers/YFHS.

Health facilities including YFHS largest entry point for case identification of girls in early marriage/union within GPECM districts: out of **845** cases identified between January to mid-March 2023, **over 65%** were identified at a health facility (compared to 4% from the police and justice sector together).

SERVICES OFFERED BASED ON VICTIMS/SURVIVORS CENTERED APPROACH

Leaving no one behind

The case of Zambia

Ruth Kalaba Meki
3 May 2023

Overview

- An estimated 15% of the world's population live with some form of disability.
- In addition, pregnant and married girls also face significant obstacles, including increased risk of complications during pregnancy and childbirth, and limited opportunities to continue their education and pursue their goals.
- In Zambia, these challenges are compounded by poverty, cultural norms, and inadequate infrastructure and resources.
- YWCA with support from various donors, including UNFPA, has created and expanded opportunities for the empowerment of adolescent girls aged 10-24 years through Increase scale and reach of child marriage programmes.
- In addition to government initiatives, YWCA is working to provide additional support to pregnant, married or girls with disabilities, including out-of-school adolescents.

In leaving no one behind, the programme targets the following...

01.

Marginalized girls and boys in hard to reach in communities

02.

Adolescents with disabilities

03.

Married, pregnant, separated or widowed girls

Key Strategies

- Addressing discriminatory gender and socio-cultural norms that negatively affect women and girls
- Empowering marginalized adolescents by enhancing their life skills that build their health, social and economic assets
- Capacity building of traditional and community leaders to become champions of ending child marriage campaigns, as custodians of tradition
- Community Dialogues with parents/guardians and community members

Key successes

20,740

Adolescents (12,660 girls, 8,080 boys) empowered with life skills in 2022 alone

277

Traditional leaders became advocates for ending child marriages campaign

26

Adolescents with disabilities were reached through safe spaces

73

Community leaders actively participated in raising awareness about discriminatory social and cultural norms.

Lessons Learnt

01.

Multi-sectoral responses expands reach for those left behind

02.

Sustained community engagement is key towards addressing stigma and discrimination

03.

Constituency development funds and social cash transfers a key entry points towards narrowing gaps among those left behind

Iliza Azyei, UNFPA Bangladesh
Gaia Segola, UNICEF Mozambique

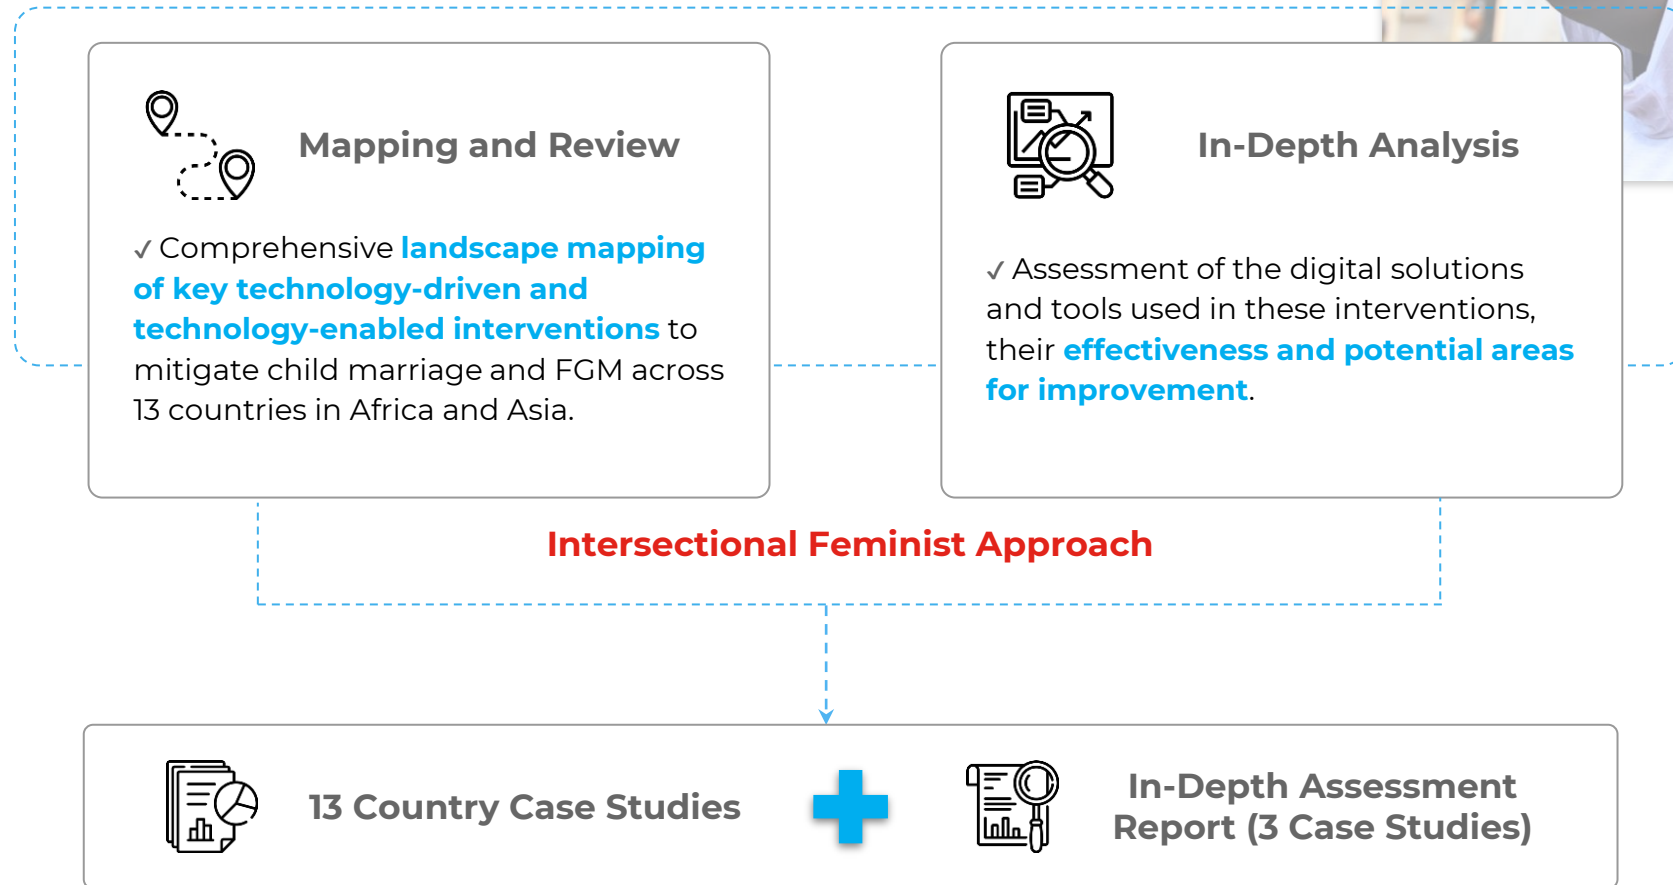

Using technology-based interventions to mitigate child marriage and female genital mutilation

Innovation for acceleration and scaling up

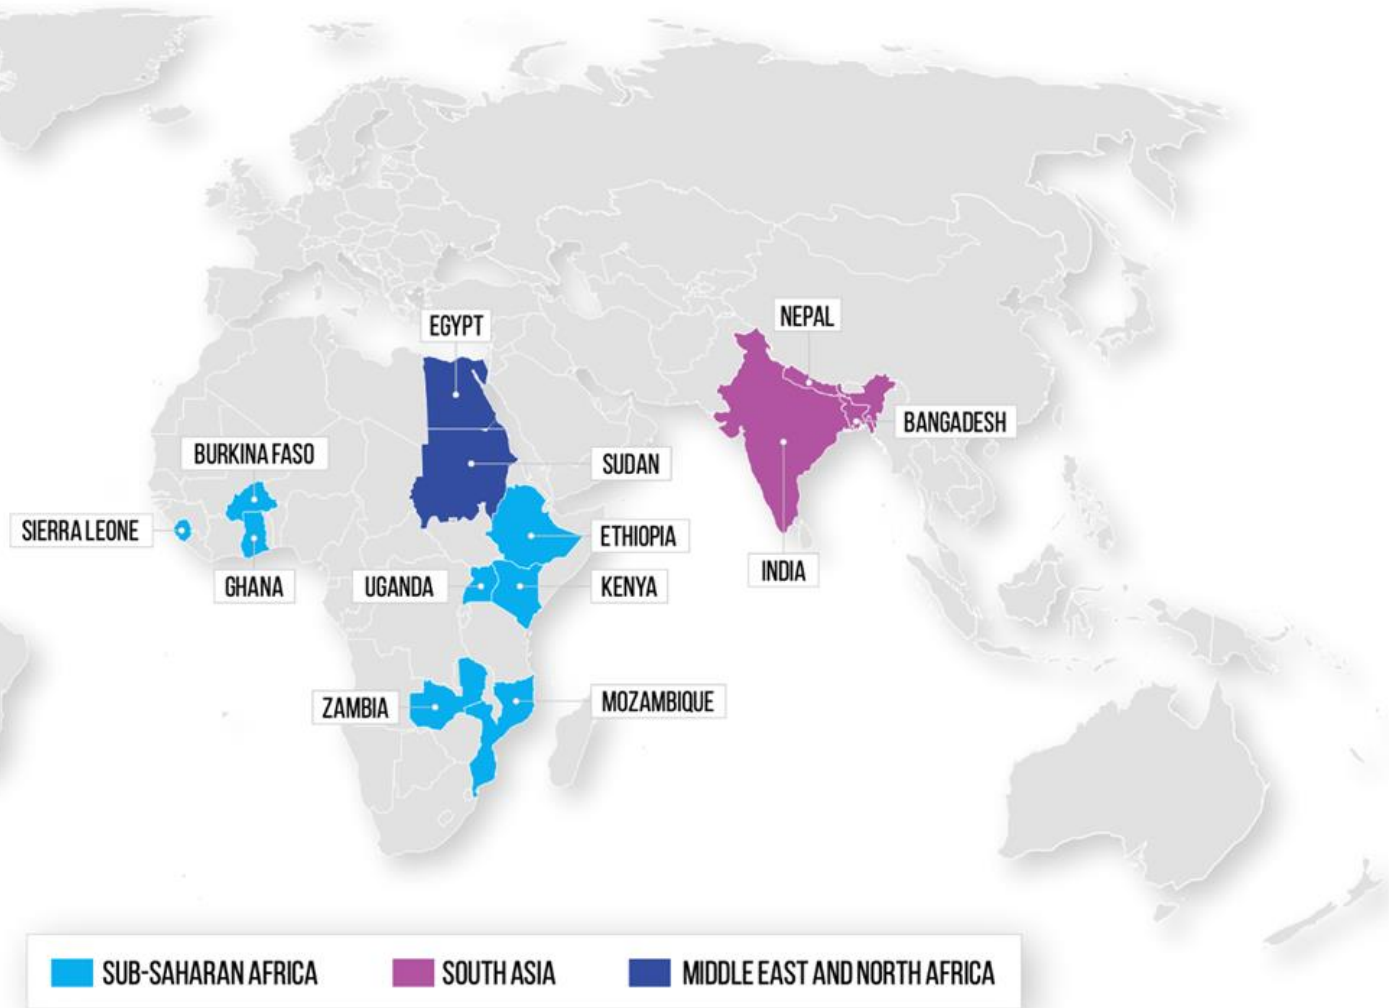

Anna Spinardi
4 May 2023

Review of Technology-based Interventions to Mitigate Child Marriage and Female Genital Mutilation

Countries of Focus

Note: This map is stylized and not to scale. It does not reflect a position by UNFPA or UNICEF on the legal status of any country or area or the delimitation of any frontiers.

OVERALL CONTEXT IN AFRICA

On a global average, the majority of cases of FGM take place on the **African continent**, where almost 140 million girls and women have been affected by this practice.

Regarding child marriage, West and Central Africa have the highest prevalence, with nearly 60 million (37%) married before age 18, and 12% before age 15.

SNAPSHOT OF THE TECHNOLOGY LANDSCAPE IN AFRICA

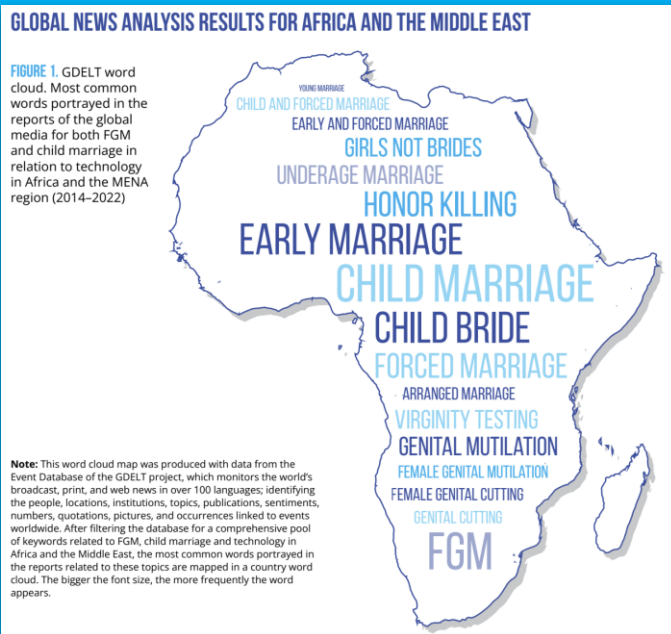

TABLE 1. DIGITAL ACCESS AND GOVERNMENT SUPPORT IN AFRICA

	Internet users ²⁸ (proportions of the adult male and female populations)	35% of men 24% of women
	Mobile phone ownership ²⁹ (proportions of the adult male and female populations)	82% of men 69% of women
	Level of government support for digital literacy ³⁰ (scale 0–3) ^a	Medium: 2.2

OVERALL CONTEXT IN THE MIDDLE EAST

In the Middle East and North Africa (MENA), almost 50 million girls and women have undergone FGM in five practising countries, accounting for one quarter of the global total. Around 40 million girls and women alive today are affected by child marriage in the region, or 700.000 per year (6% of the recorded numbers around the world).

SNAPSHOT OF THE TECHNOLOGY LANDSCAPE IN THE MIDDLE EAST

	Internet users ³⁵ (proportions of the adult male and female populations)	61.3% of men 47.3% of women
	Mobile phone ownership ³⁶ (proportions of the adult male and female populations)	90% of men 82% of women
	Level of government support for digital literacy ³⁷ (scale 0–3) ^b	High: 2.7

OVERALL CONTEXT IN ASIA

In South-East Asia and the Pacific, the rate of girls married or in unions before the age of 18 ranges between 11 - 33%, with a general decrease over the last decade. Data on the prevalence of FGM among countries in the region is limited and rarely included in worldwide reporting.

GLOBAL NEWS ANALYSIS RESULTS FOR ASIA

FIGURE 4. GDELT word cloud. Most common words portrayed in the reports of the global media for both FGM and child marriage in Asia (2014–2022)

Note: This word cloud map was produced with data from the Event Database of the GDELT project, which monitors the world's broadcast, print, and web news in over 100 languages; identifying the people, locations, institutions, topics, publications, sentiments, numbers, quotations, pictures, and occurrences linked to events worldwide. After filtering the database for a comprehensive pool of keywords related to FGM, child marriage and technology in Asia, the most common words portrayed in the reports related to these topics are mapped in a country word cloud. The bigger the font size, the more frequently the word appears.

LEVEL OF
IMPACT

46

Have **individual-level empowerment** as their main area of impact

41

Have **family and community engagement** as their main area of impact

FEMINIST
LENSES

27

Have applied an **intersectional feminist approach**

Key Findings and Recommendations

Phase 1: Mapping and Review

Key Findings

01. Stakeholders involved

The most impactful interventions are **multi-sectoral initiatives**, which involve a variety of partnerships across different stakeholders.

02. Tech features

The majority of these interventions employ a **combination of both traditional and modern tools**, and the re-use and adaptation of these technologies was necessary due to COVID-19 constraints, which served as a catalyst to look for alternative, innovative channels to reach communities.

03. Impact areas and key achievements

The main achievements of these technological interventions rely not only on the effectiveness of their products, but also on factors resulting from a combination of **context-based social, economic and technological development** at local and regional levels.

04. Intersectional feminist approach

Of the 27 interventions where this data was collected, nearly all organizations conducted **consultations with experts and/or local leaders**; 15 have adopted **monitoring and evaluation** activities; 13 carried out **consultations with the populations** targeted; and 6 have been designed and/or implemented by a **women/girl-led organization**.

05. Opportunities and challenges

Several challenges remain that hinder these interventions' greater reach, use and effectiveness: **the cost, the digital gender gap, and the deeply ingrained patriarchal culture**.

Key Recommendations

01. User-centred design

Know the people you are designing for.

02. Design for scale and build for sustainability

Interventions can and should go beyond the pilot population to impact the most difficult to reach and vulnerable groups.

03. Being collaborative

Sharing information, insights, strategies and resources across projects, organizations and sectors.

By highlighting innovative ways to address these harmful practices, this study seeks to contribute to the achievement of gender equality and the empowerment of women and girls worldwide in both policy and practice.

Deep Dive

Linha Fala Criança (Mozambique Case Study): Key Findings

Overall Context in Mozambique

Mozambique has one of the highest rates of **child marriage** in the world, affecting one in every two young women in the country. In 2022, the country had 4.4 million child brides, with 1.6 million (17%) married before the age of 15.

MOZAMBIQUE CASE STUDY

MOZAMBIQUE OVERVIEW

	Child marriage prevalence ²⁴⁶ (girls married before the age of 18 years, as a proportion of all girls)	53%
	FGM prevalence ²⁴⁷	–
	Internet users ²⁴⁸ (proportions of the adult male and female populations)	30% of men 19% of women
	Mobile phone ownership ²⁴⁹ (proportions of the adult male and female populations)	37% of men 26% of women
	Level of government support for digital literacy ²⁵⁰ (scale 0–3) ^a	High: 3

Linha Fala Criança (Talk-Child Helpline)

- *Linha Fala Criança (LFC)* is a non-profit organisation dedicated to protecting and ensuring the well-being of children in Mozambique through the **'116' emergency telephone helpline**.
- LFC operates predominantly through **telephone lines**, although other means of communication, such as **television** and **social media platforms** are also used to reach children and the overall population in Mozambique with support on issues such as **domestic violence, family issues, relationships and sexual abuse**.

Topic	Key Findings
Context Awareness	Understanding unsuccessful efforts and the issues with existing hotlines in Mozambique (e.g. police line) was fundamental for LFC to achieve the success it has in the country today.
	LFC's free nature of the call , as well as the possibility to make anonymous reports has a significant impact on the ability and willingness of the target population in using intervention.
	Users shared less fear of reporting cases after becoming aware of the helpline.
Digital Inequalities	To mitigate problems related to its technological component (e.g. use of mobile phones and access to network to make calls), LFC installed physical reporting boxes in the schools, which proved to be a valuable alternative tool given the high number of children in remote areas that did not (or do not) have access to phones.
	LFCs use of alternative communication channels and activities (such as television and campaigns in schools) has allowed more people to become aware of the line and on the need to protect children's rights.
Data Governance	LFC has strict protocols for the protection and security of the data collected and stored, increasing the reliability and credibility of the intervention in Mozambique.
Collaboration	LFCs strong network of collaboration with local institutions across Mozambique is one of the most important components to the success of responses to reports on violations of children's rights.
Funding and Revenue	LFC faces challenges in expanding its infrastructure (e.g. being 24/7) and human capacity to have more counsellors answering calls and providing more in-person support.

Lessons Learned

Prioritize girls' and women's **voices** during the design, piloting, implementation, evaluation and scalability of **every** initiative.

“Rupantaran” (Transformation) Social and financial skills programme

Apekchya Rana Khatri
4 May 2023

Life skills-based curriculum endorsed by government

Jointly developed by UNICEF and UNFPA
15 topical issues identified and validated in consultation with adolescents

Developed on the basis of - desired knowledge, attitude and skills; and behavioral outcome and impact of behavior

Change in knowledge, skills and attitude monitored through pre and post test

Radio Delivery- from 7000 to 70,000

Blended approach - reach girls/families for continuous information flow, knowledge enhancement and services uptake

Rapid assessment - to know the situation of adolescents during lockdown (3,000 adolescents)

Adaptation of Sessions - content expanded to address emerging concerns expressed by adolescent girls, including their mental health and online safety.

Delivery - via local radio broadcasts in combination with personal follow-up from peer leaders, either by phone or home visit.

Information Delivery

- Video/Audio Content
- Text Based Content
- Illustration content
- Downloadable content

Learning Activities

- Quiz: Q and A
- Quiz: Flip the card
- Puzzle: Match the following
- Puzzle: Sequence the process
- Games: Snakes and Ladder
- Games: Geo Location Pin
- Infographic

Reach and Scale

Context - 753 local levels in the country, 679 have a broadband connection. 5,554 ward offices, 5,032 community schools, and 4,027 health posts have access to broadband internet

Need to digitalize - alternative mechanism of delivery, ease of access and efficient path to scale.

E-learning Platform: platform with content management module, scenario-based learning module, and knowledge management module

High impact program through an e-learning platform with a potential to impact the lives of millions of beneficiaries.

Key steps

1. Stakeholder consultation

2. Knowledge, Attitude and Practice (KAP) matrix

3. Consultation with adolescents and parents

4. Product development

5. Product pretesting

6. Product dissemination

Mobilizing for change: Youth-led, feminist and women-led organizations take the lead

Moderated by:
Shadia Elshiwly, UNFPA HQ

Speakers:
Ellen Alem, UNICEF HQ
Chiagozie Udeh, UNFPA ESARO
Faith Mwangi-Powell, Girls Not Brides
Gugulethu Sihlali

Engagement with feminist-focused and women/girl-led CSOs in the Global Programme

Ellen Alem
4 May 2023

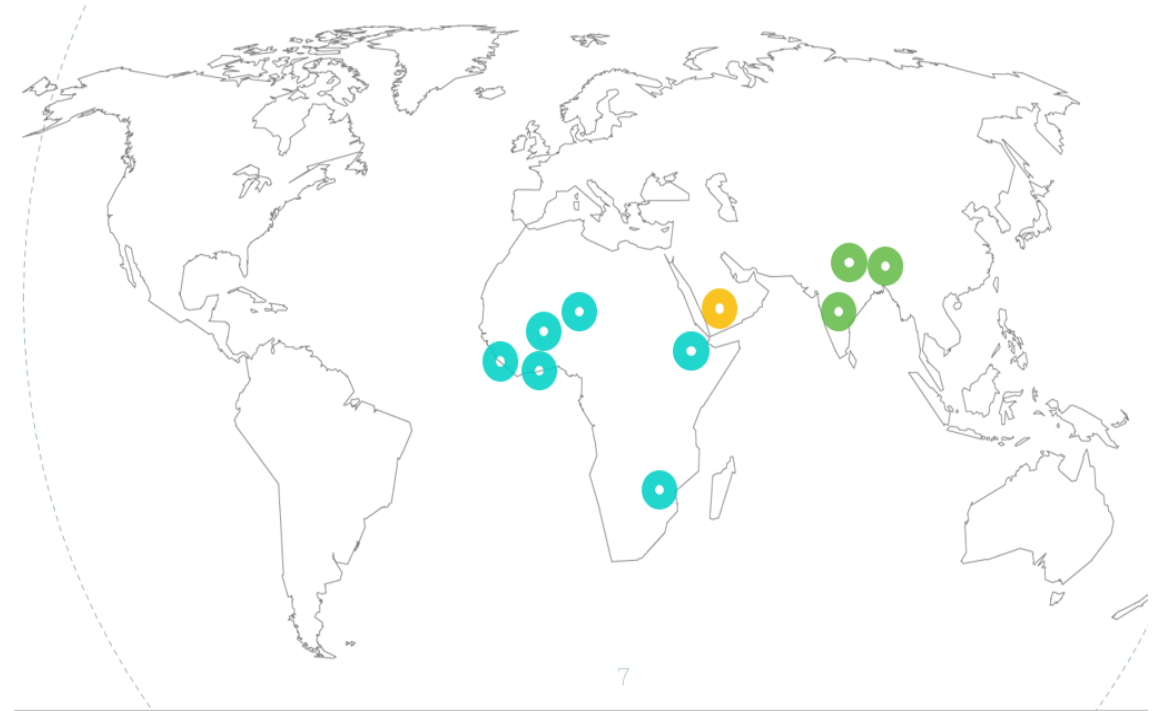

- The Global Programme aims to support, foster and enable feminist organizations and those that are youth or women/girl led to pursue a gender transformative approach & advance gender equality
- The Global Programme worked with over 165 CSOs by 2021, around half of which focus on women's rights

Women's and/or Girls' Organisation (WGO) is a registered or informally organised group or network led by a woman/girl, whose leadership and staffing is made up of women and/or girls, comprising minimum 50% of board, executive positions, and staff/volunteers, with a mandate to advance gender equality and women's and/or girls' rights and empowerment. Women/Girls' led organizations can include organizations with less than 50% of board, executive positions, and staff/volunteers in exceptional crisis contexts where it is difficult or not safe for women/girls to take up public positions. (IASC)

134 // 10

- 134 CSOs that are part of the Global Programme in 10 countries were listed, of which 86% were assessed and **ranked**
- Online resources, strategy documents, annual reports, commentaries of external parties... were reviewed
- Self-assessment survey administered (24 open ended and multiple-choice Qs)

Structural and **Substantive** qualities of an organization

Structural

- Mission and Vision
- Policies and strategies
- Learning and evaluation
- Leadership and team
- Representation and empowerment

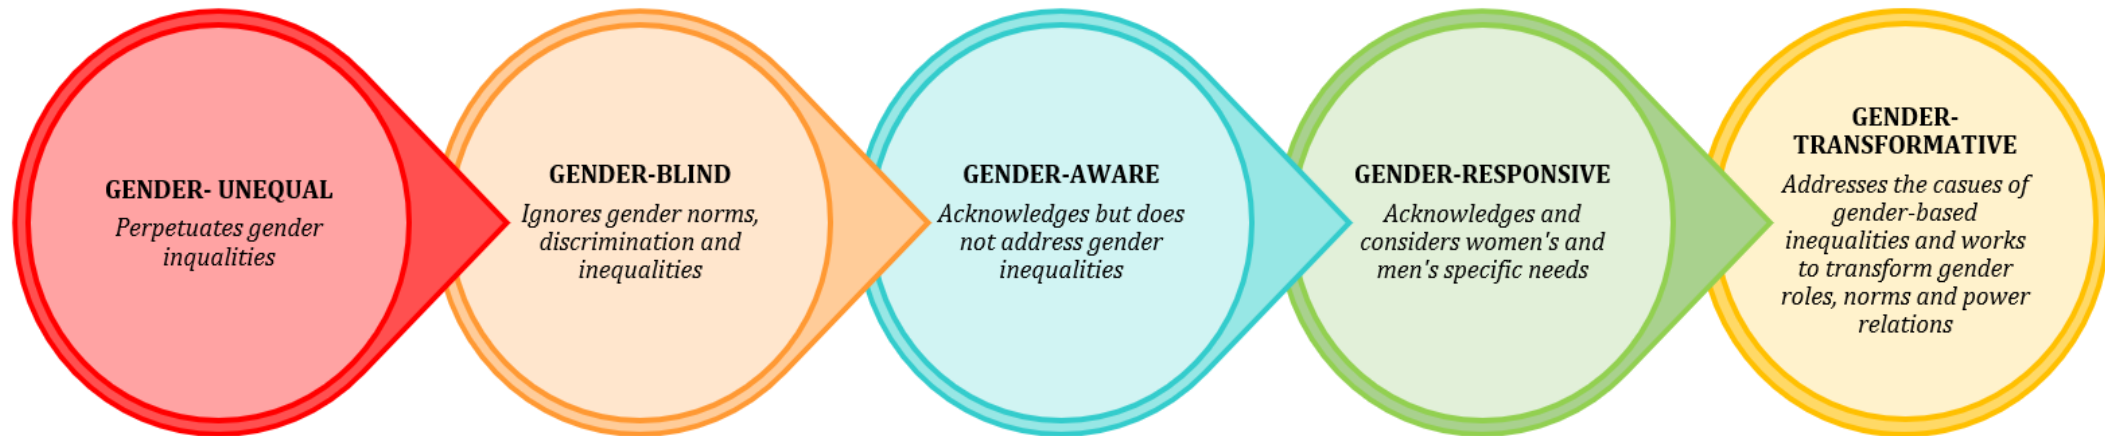

Substantive

- Activities
- Systemic change
- Knowledge generation
- Networks and coalitions
- Representation and empowerment

Rating scale applied on structural and substantive dimensions

Ranking based on rating

Gender-transformative (GT): 20%

Gender-responsive (GR): 36%

Gender-aware (GA): 19%

Gender-blind (GB): 10%

Gender-unequal (GU): 1%

Not-assessed (NA): 14%

Over 50% of CSOs have as a core part of their vision & mission, the advancement of the rights of women and girls through a gender transformative lens

analysis and utilization
of findings**

Mobilizing youth-led organizations working on climate change and the SRHR agenda

Chiagozie Udeh
4 May 2023

01. Climate change

UNFPA takes a multi-prong approach to climate change anchored around four pillars of its value proposition

Joint Youth Working Group on SRHR and Climate Change

01.

Established in 2021;

02.

Brings together a strong network of young climate and SRHR advocates from the different youth networks working across climate change, health and SRHR;

03.

Drives our global, regional and national climate advocacy and action based on the goals of ICPD.

Youth NDC Review

- Worked with 6 selected young people from all regions of the Global South from our JYWG and YOUNGO to review the NDCs through a youth lens;
- Produced a youth report after their review of Nationally Determined Contributions (NDCs) in their respective regions through a youth lens;
- Fully-funded to COP27 and main drivers of ICPD-based advocacy messages at COP27 negotiations using the findings of their review;
- Crucial part of UNFPA evidence building and knowledge generation on these intersections and conducted a global survey ahead of COP27 with fascinating results;
- They are getting ready to engage robustly and meaningfully in the next review of their NDCs at their various countries to ensure its integration of the SRHR agenda;
- Part of the consultation and validation of the UNFPA Climate Change and CSE module and now empowered as trainers in their various communities.

Workshops at COY17

- Supported the 17th Global Conference of Youth (COY) organized by YOUNGO just ahead of the commencement of the COP27;
- Panel session on climate change and SRHR in addition to two other workshops on NDC and Gender-Climate;
- Part of the final text of the Global Youth Statement submitted to the COP27 Presidency;
- UNFPA held about the most attended workshop at the COY17 on SRHR and climate change.

Global Youth Statement at COP27

- Provide accessible, flexible and sustainable financing that will enable youth, especially young women and girls, to implement NDCs in thematic areas that affect their rights, including gender equality and sexual and reproductive health and others.
- Recognize UN Women's Generation Equality Forum's 5-year action journey to implement the agreed actions outlined in the Feminist Action for Climate Justice Global Acceleration Plan for Gender Equality and reaffirm existing and adopt further commitments in line with the Global Acceleration Plan published by UN Women and Generation Equality partners.
- Promote the importance of regionally-driven collaboration between environmental civil society organisations, supported by multilateral norm-settings to allow better coordination of civil society movements, strengthening their nationally established programs and participation in multilateral environmental forums where they can present their own identified region-based climate justice solutions, programmes and potential ways forward.

Climate Justice and Human Rights

- Commit to the full, effective and meaningful implementation of the Agreed Conclusions and outcomes of the 66th Session of the Commission on the Status of Women (E/CN.6/2022/L.7), convened under the theme of “Achieving gender equality and the empowerment of all women and girls in the context of climate change, environmental and disaster risk reduction policies and programmes”.
- Commit to implementing grassroots, local and community outreach programmes to disseminate information on climate and disaster preparedness, safe water and health sanitation, including quality comprehensive sexuality education.
- Promote climate laws and policies that enhance social protections, and provide key services such as quality health care, including access to sexual and reproductive health and rights.

Working with youth networks to strengthen **national-level data and research** to support the evidence base to determine the impact of climate change on SRHR, gender-based violence, and harmful practices including child marriage and inform future policies.

Global NDC Review 2022

36/111

1/111

mention child marriage

“Climate change may also lead to a higher risk of early marriage as a means of reducing economic burdens for families”- Vietnam NDC, 2021: p14

Mobilizing change to end child marriage

With the help of youth, feminists and women-led organizations

Gugulethu Sihlali
4 May 2023

Contextual background

Adolescent girls are forced into child marriages because of arraying factors that are often framed as consequences of these factors rather than an imbalance in power. Therefore child marriage is not a consequence of poverty or gender equality but rather a result of an evident power imbalance. (e.g Ukuthwala and religious sectors)

Youth is NOT a Concept

Women are NOT a Concept

- Intersectionality Theory (feminist movement and agency)
- Proportional representation
- Distribution of power to these organizations.
- Why should we support and give space to these organizations?

Child Marriage is a result of unequal power.
Men being able to take away the agency of
children is because of unequal power.

#EndChildMarriages&GenderBaseViolence

Mobilizing partnerships with youth, feminist and women-led organizations to accelerate change to end child marriage

Faith Mwangi-Powell
4 May 2023

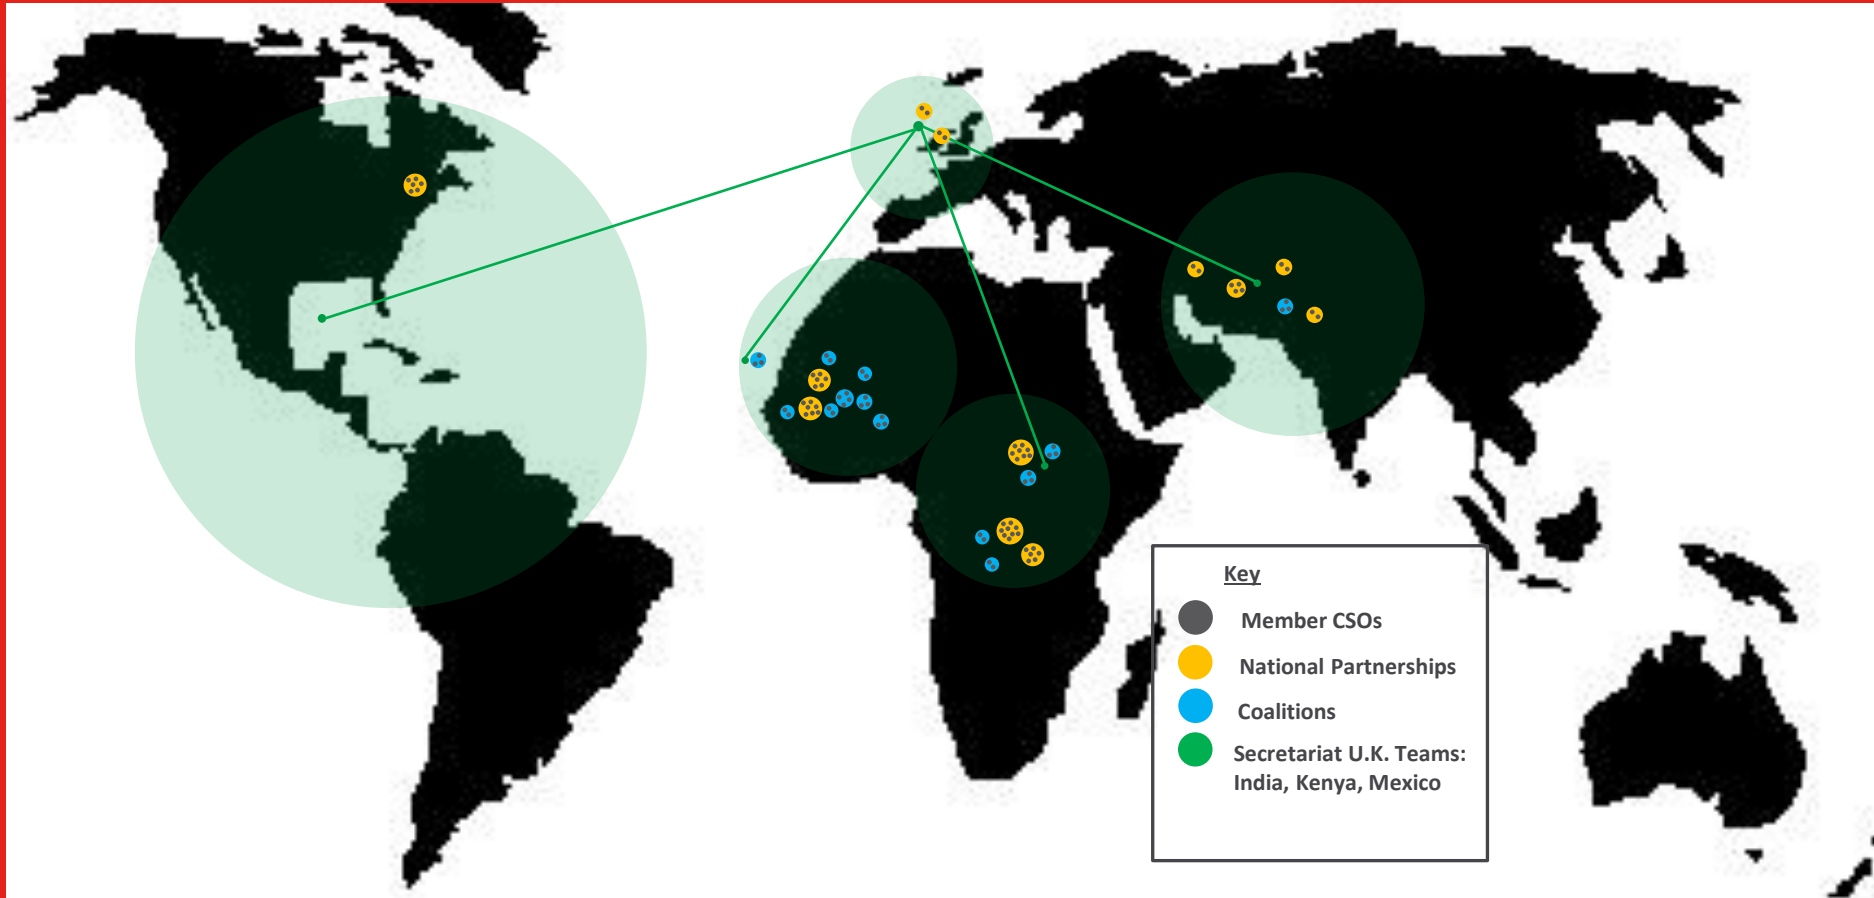

Objectives of the session

Identify ways to expand partnerships with youth, feminist and women-led organisations to mobilise change to end child marriage.

Reflecting on these questions:

- What are successful examples of mobilising youth, feminist and women-led organisations to end child marriage and prevent adolescent pregnancies?
- What contributed to the success of these examples?

About *Girls Not Brides*. The Global Partnership to End Child Marriage

Mobilising partnerships with youth, feminist and women-led organisations

Why women/youth-led?

- Fosters agency
- Directly affected by the issue
- Young people can break generational cycle of CEFM
- Ability to reach stakeholders at scale in some countries, young people make up half of the population
- All can be strong agents of change
- Creativity and credibility to the table

What does success look like?

- **Africa:** Youth activists trained to act as champions & working with government structures to organise mentorship sessions in and beyond schools, created child protection committees
- **Asia:** 2,100 adolescent girl leaders and their peers implemented 100 (what?), reaching 13,224 community members and local decision-makers in 28 districts
- **LAC:** Indigenous adolescents, youth and women leading community-led, urgent action to end child marriage and presented to member states

What contributed to the success?

Inclusion

Safe spaces

Dialogue

Ownership and
leadership

Funding

“Women and young people are critical change makers for ending child marriage and they must be central to our response as key allies and partners”.

Session 16

A key intervention to address child marriage: Gender-responsive social protection

Moderated by:

Miho Yoshikawa, UNICEF Ghana

A key intervention to address child marriage: Gender-responsive social protection

Lauren Whitehead
4 May 2023

SETTING THE SCENE

DRIVERS OF CHILD MARRIAGE

Poverty

Gender inequality

Lack of access to education

Insecurity and crises

Cultural norms

Wealth inequity

POTENTIAL IMPACTS OF SOCIAL PROTECTION

Economic empowerment

Household poverty reduction

Multi-sectoral linkages to services

Social behavior change

Systems strengthening

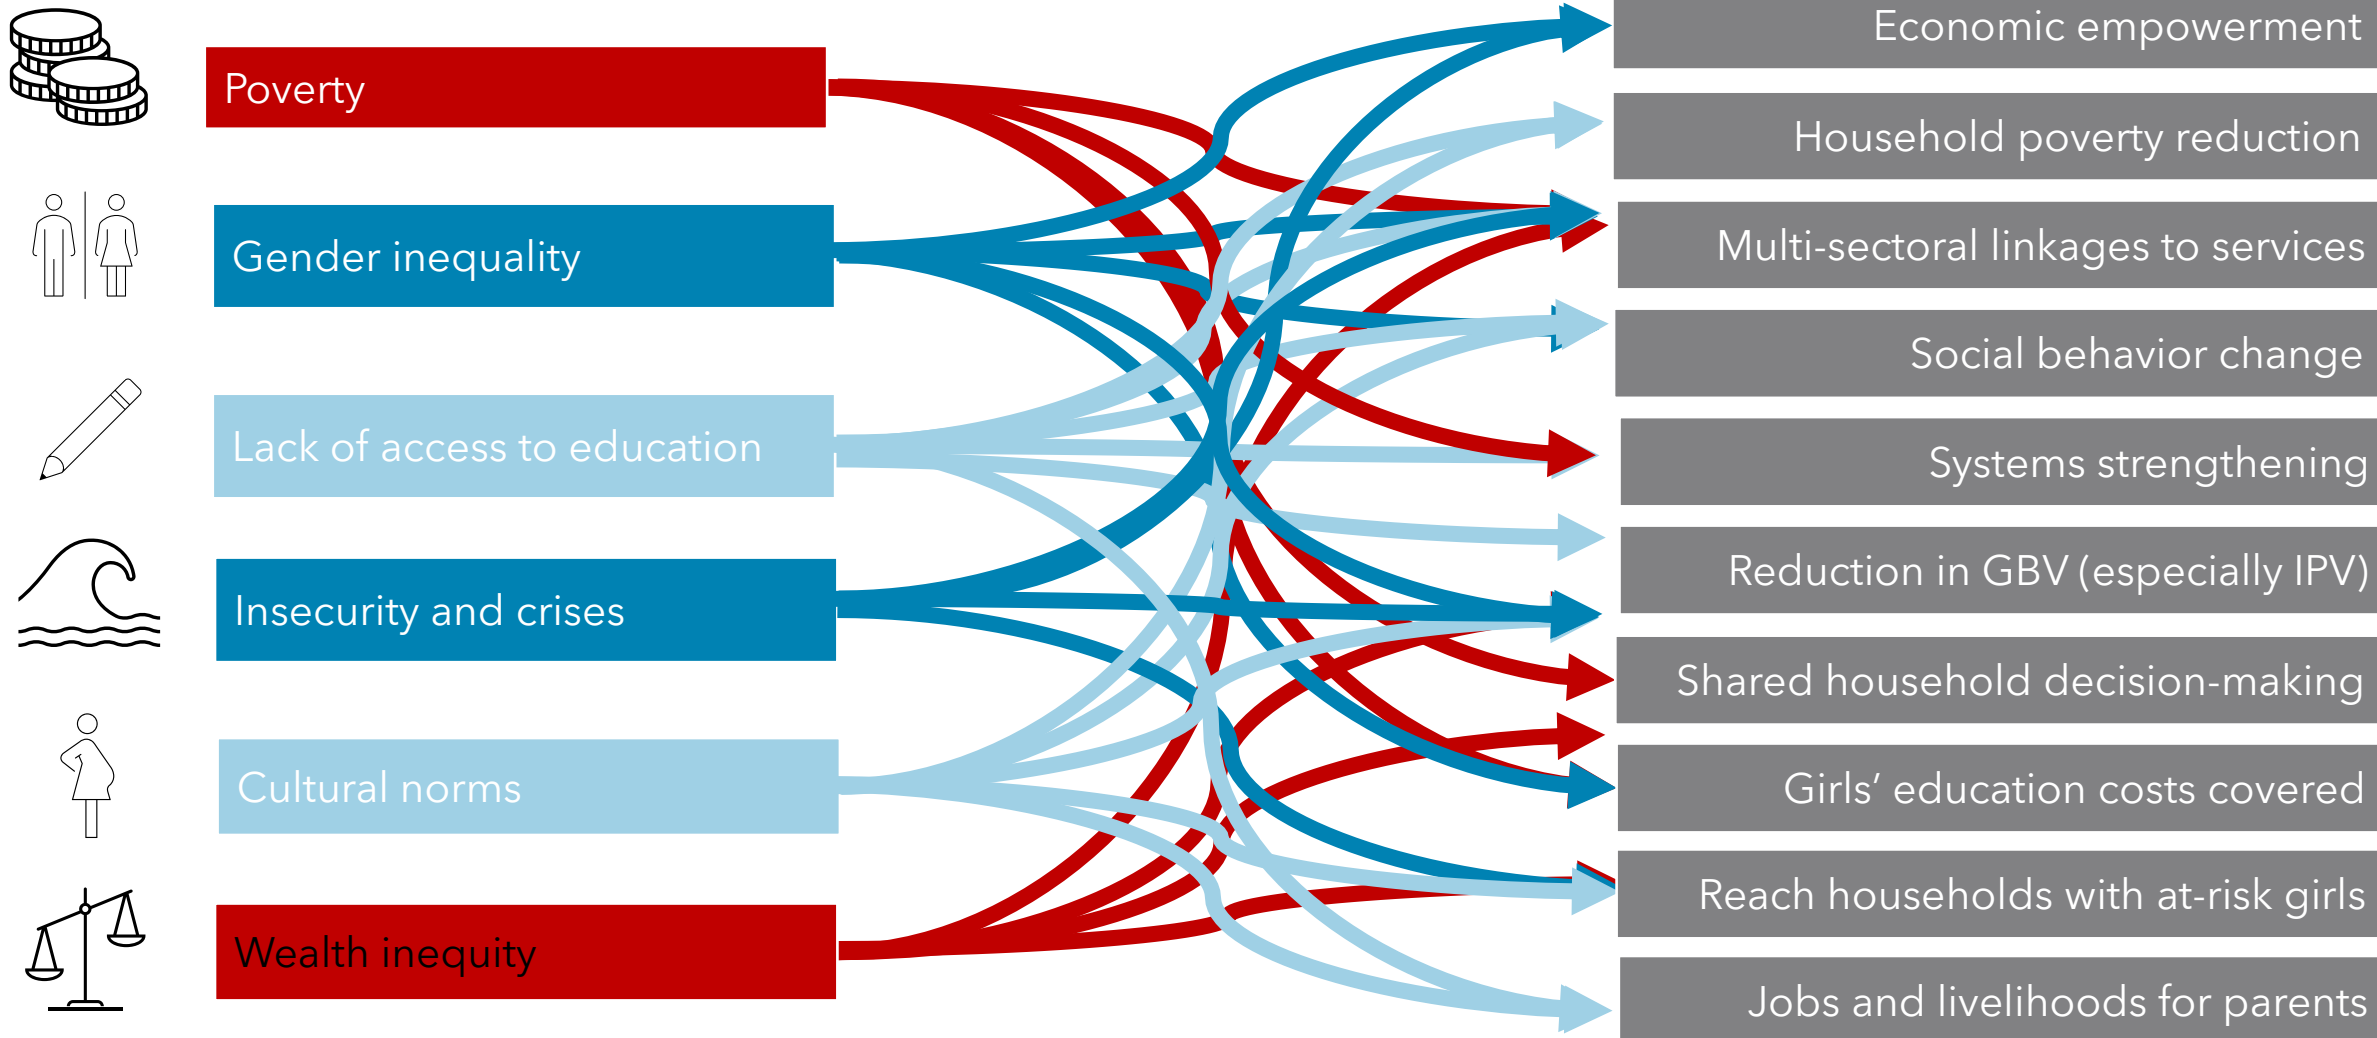

Reduction in GBV (especially IPV)

Shared household decision-making

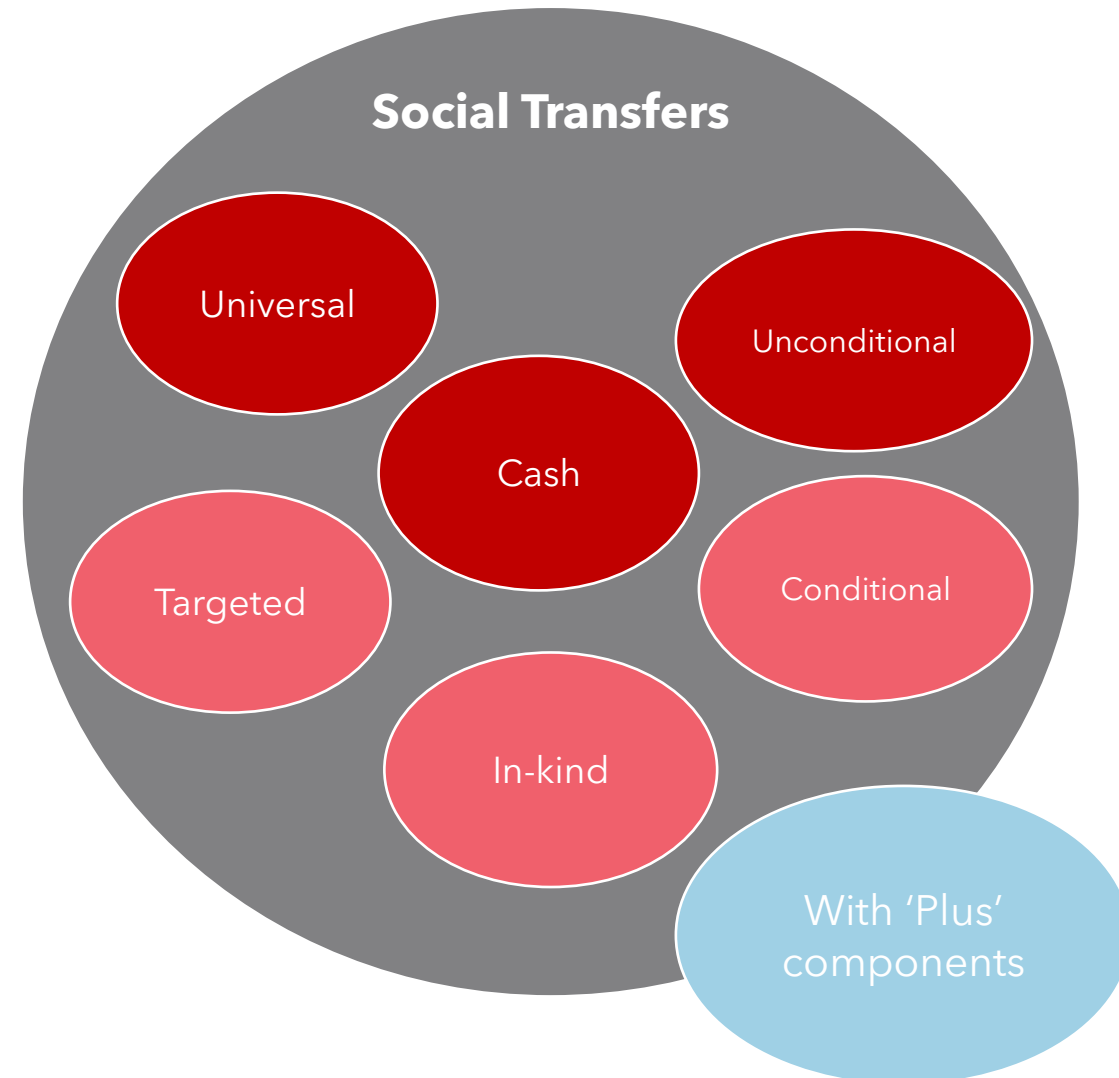

Girls' education costs covered

Reach households with at-risk girls

Jobs and livelihoods for parents

THE UNIVERSE OF SOCIAL TRANSFERS

Caution on conditions!

Schooling conditionalities in CCT= lower child marriage,

however:

- ✓ conditions can easily penalize the most vulnerable
- ✓ costly to monitor compliance and to scale
- ✓ reinforce punitive control of the poor
- ✓ should be facilitated with accompanying measures
- ✓ often lack evaluation comparison to UCTs
- ✓ can be achieved with alternatives such as nudges, SBC, messaging, labelling, contracts/pacts

WHAT CASH CAN AND CANNOT DO

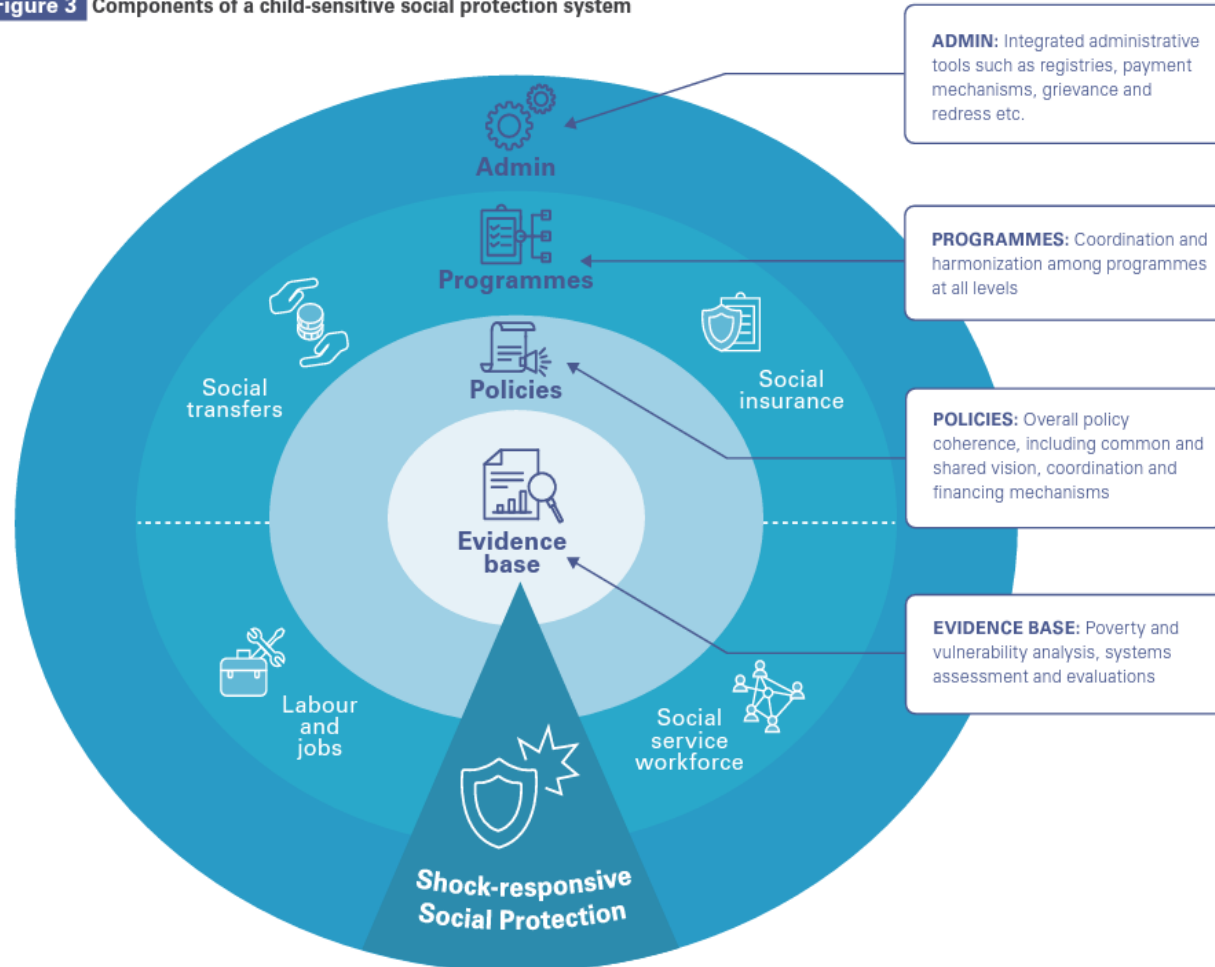

- Reach **unregistered households**
- Guarantee rolling or dynamic **enrollment**
- Always include **case management**
- Automatically address **social norms**
- Legally **target** at-risk girls as minors
- Solve all problems as a **silver bullet**

- Reduce monetary **poverty**
- **Target** households/families of at-risk girls
- Lower **GBV risks**, especially IPV rates
- Balance household **control of finances**
- Increase **decision-making** of women
- Link to **labor and jobs** for sustainability
- Most impactful if **longer term** and **sufficient for living costs**

SOCIAL PROTECTION BEYOND CASH

Figure 3 Components of a child-sensitive social protection system

UNICEF, 2019

Cash transfers are just one component of social protection that can be leveraged for child marriage outcomes.

Others include:

- In-kind transfers
- Social insurance
- Social service workforce
- Labor and jobs (livelihoods)
- Social registries and MIS
- Social service delivery
- Multi-sectoral service linkages
- Cash plus programmes
- Humanitarian cash transfers

A system in crisis is only as good as the system before the crisis.

BENEFITS OF LEVERAGING SOCIAL PROTECTION

Social protection can address two of the strongest drivers of child marriage: **poverty** and **gender inequality**

Almost half of the world is covered by a social protection benefit.

■ Covered by at least one SP benefit ■ Not covered

Nearly \$800B was spent on social protection globally in 2021.

Gentilini, U. 2021. A game changer for social protection? Six reflections on COVID-19 and the future of cash transfers. World Bank Blogs.

ILO. 2021. World Social Protection Report.

UNICEF. 2020. Global Annual Results Report: Gender Equality.

BENEFITS OF LEVERAGING SOCIAL PROTECTION

SCALE	Reach, esp. rural populations	Global financial investments
TARGETING	Social registries to target families of at-risk girls	Targeting of women and girls, married and unmarried
SOCIAL SERVICE DELIVERY	Integrated social service delivery	Management Information Systems
SHOCK RESPONSE	Humanitarian contexts	Adaptive crisis response
CASH PLUS	Case management and social service workforce	Information, SBC, Nutrition, Health, SRH, Skills, Livelihoods

But intentional design is critical.

SOCIAL PROTECTION TO CURB CHILD MARRIAGE

CASH TRANSFERS	Ethiopia Productive Social Safety Nets Program
CASH PLUS PROGRAMS	Mozambique Child Grant 'Cash and Care' Pilot India Cash Plus + MNREGA (livelihoods) + Targeted Services Kenya Adolescent Girls Initiative - Kenya (AGI-K)
TARGETING AND SERVICE DELIVERY	Ghana Integrated Social Services (ISS) with LEAP CT
LINKAGES TO SERVICES	Nepal Beti Bachau Beti Padau Scheme ('Educate a Girl, Save a Girl')
SKILLS TRAINING AND JOB MARKET PREPAREDNESS	Zambia Sustainable Women's Livelihoods Program
SOCIAL BEHAVIOR CHANGE COMMUNICATION	Benin 'Cash Plus Care - Programme multi-sectoriel'

GLOBAL PROGRAMME: GOVERNMENTS OF ETHIOPIA AND GHANA

Case study: Ethiopia's Productive Safety Nets Program (PSNP)

- Between January-April 2021 and the same period in 2022, child marriage increased by 119% across regions worst hit by drought
- PSNP has been found effective in mitigating poverty-related incentives to marry off girls, and in increasing their school enrolment
- Providing income to households indirectly contributed to the creation of an enabling environment where girls have access to the information, life skills and support networks

Case study: Ghana's Livelihood Empowerment Against Poverty (LEAP)

- Young women married under the age of 15 in Ghana are 9 times more likely to experience sexual IPV compared to women who were not- the highest likelihood among countries with comparable data in Africa
- LEAP reduces IPV and has potential to reduce child marriage further through multiple pathways, including integrated social services

GOVERNMENT OF BENIN

CASH PLUS CARE - PROGRAMME MULTI-SECTORIEL

30.7% of girls are married before 18

• **Increased access of girls to integrated services**

- +57,000 girls/adolescents received child marriage prevention and care services in 2022
- +39,952 schoolgirls with school kits are kept in school and protected from child marriage
- 100% of intervention villages have a village monitoring committee active against VFE/ME

• **Community engagement of parents and religious leaders**

- 94% of children surveyed know how to report VFE or ME compared to 40% at baseline
- 96% of parents know at least 3 disadvantages compared to 22% at baseline

• **Social mobilization of adolescent girls and boys**

- of boys/adolescents educated on positive masculinity including SSR, GHM (+ 26,700 in 2022)
- of children/adolescents and young people (+ 88,000 in 2022)

Lessons Learned

- Cash plus care is a viable model
- Cash can be used to keep girls in school with complementary components (e.g. school kits)
- Parents and boys must be engaged
- Religious leaders are critical influencers
- Community sensitization and mobilization

SOCIAL PROTECTION IN THE GLOBAL PROGRAMME

How can the Global Programme move to action?

Collaborate

- Partner with social protection colleagues who coordinate with Ministries of Social Protection and related ministries

Advocate

- Elevate compelling evidence on prevalence of child marriage among beneficiaries of social protection programs; data is key

Target

- Leverage social registries for targeting existing and at-risk girls

Data

- Collect data on girls who are enrolled in social protection program households, enrolled in school, and married

Reporting

- Incorporate reporting of child marriage in grievance response mechanisms for beneficiaries

Linkages

- Develop linkages to support services, referrals, and across ministries

CREATE LASTING IMPACT FOR GIRLS!

SOCIAL PROTECTION IN THE GLOBAL PROGRAMME

In Phase III, together we will:

- **Harness the potential of social protection systems**—policies and programs—to reduce poverty at scale for adolescent girls
- Leverage **strong social policy and social protection influence** with **national and local governments** to drive policy shifts
- Utilize UN's **coordination mandate across ministries** to support children, including adolescent girls: Ministries of Social Protection, Education and Health
- Test integration of **social and behaviour change** as part of **cash plus** social protection programming
- Generate and disseminate **evidence** on leveraging social protection service delivery and systems

Research Priorities

What are beneficial pre-conditions of cash transfer programs that most impact the effect of social protection on child marriage?

How can social protection support girls at risk in humanitarian and crisis contexts?

What cash plus components work best and why?

How can other aspects of social protection beyond cash be leveraged?

What alternatives to conditions work best to reduce child marriage and why?

EXISTING EVIDENCE - UNICEF INNOCENTI

TYPES OF INTERVENTION	AREA	TYPE
Effective	Income and economic strengthening	Cash transfers, vocational training, favourable job markets
Promising but requires further research	Systems strengthening	Training to build the capacity of workforce across sectors

The evidence suggest that cash transfers may help to delay marriage, particularly in the context of sub-Saharan Africa (SSA).

Economic approaches show the most definitive patter of success in preventing child marriage!

Cash transfers

'Plus' Component

- Can alleviate several of the economic and social drivers of child marriage through distinctive pathways, such as improved household economic security and increased access to education.
- Can also decrease violence against women and girls; decrease adolescent girls' sexual debut; and delay adolescent pregnancy.
- Together with cash, can also contribute to girls' health and wellbeing, to their sense of agency, and to a greater say in the decisions that affect them.

Ethiopia's experience for successful approaches to leverage gender-responsive social protection to end child marriage

Tilahun Woldemeskel
4 May 2023

Evidence in the Pathways of PSNP Contribution to Prevention of Child Marriage

Family poverty or economy is one driver which pushes girls from school as well as increases the vulnerability of girls to child marriage.

Studies conducted by different organizations including Young Lives, IFPRI, and Innocenti revealed that the social protection program especially PSNP has contributed to reducing school dropout.

The cash support provided for continuous years also contributed to enhancing family resilience to shocks related to food insecurity ultimately reducing the use of CM as a negative coping mechanism.

The main mediator between PSNP and the prevention of child marriage is its contribution to school retention or reduction of school dropouts.

Evidence in the Pathways of PSNP Contribution to Prevention of Child Marriage

More than 900 thousand girls benefit from the programmes both economically and in protection services

The cash plus programme which includes the increased role of social workers in the provision of case management and linkage with various services enhanced protection of girls.

Identification of girls and boys to various challenges including irregularity of attendance and school dropout and providing guidance and counseling services to families.

The mandatory SBC session which includes CM and FGM provided an opportunity for raising awareness as well as increasing mutual accountability.

How improved economic security can decrease the risk of child marriage in three key ways

First, the qualitative data finds that greater influx of cash reduces families' financial burdens, improving their ability to keep girls in school and alleviating economic pressures to marry them in order to cope with poverty and income shocks, particularly over the short term.

Second, qualitative research suggests that participation in the PSNP has somewhat affected the allocation of work within the household with implications for girls' time use and child marriage outcomes. There is some indication that increases in demands on adult labour as a result of PSNP participation draws adolescents into labour activities (both on the public works sites and domestic tasks).

Third, it has been suggested anecdotally that parents may retain girls in the household to maintain (or enlarge) transfer sizes, as these are based on household size

What contributed to its success in preventing child marriage?

PSNP-5 design document clearly incorporates the prevention and mitigation of Gender and HTPs in PSNP-5 intervention regions/woredas across all outputs.

- Linkages to available social services facilitated for core PSNP clients with an emphasis on PDS and TDS.
- Focus on the workforce as well as community capacity on SOCIAL DEVELOPMENT, GENDER AND NUTRITION MAINSTREAMING IN PSNP.
- Integration of childcare centers (as an early childhood development intervention) along with public worksites.
- Integrated dedicated SBC sessions on child marriage and FGM. Capacity on gender and social development adequately integrates the issues of CM and FGM as well as other GBV.

Efforts to leverage large-scale social protection programmes to end child marriage

The National Costed Roadmap to End Child Marriage and FGM/C (2020–2024) identifies poverty as one of the drivers of child marriage. Outcome 3 and output 3.3 were designed to tackle the economic drivers of child marriage, as follows:

- **Output 3.3:** Improved economic services and opportunities for families of vulnerable adolescent girls to engage in income-generating activities (IGA) and access employment opportunities, and providing alternative livelihoods for circumcisers.
- **Output indicator 3.3.1:** Number of families of vulnerable adolescent girls referred to economic services/support programmes.
- **Definition and method of calculation:** Number of families that have adolescent girls in all the target intervention areas that are referred to the PSNP, IGA programmes. Disaggregated by: Type of service referred to and by region.

Strengthen the evidence base for effective advocacy.

Specific evidence on consideration of child marriage prevention and formulate the argument on

- its contribution to addressing inter-generational malnutrition.

- its contribution to economic development, GDP, and enhanced resilience.

Engaging the donors of the PSNP programmes.

Leveraging entry points including the donors (world bank and ADP) of PSNP

Challenges to leverage large-scale social protection programmes to end child marriage

- Multi-stakeholder interest and influencing requires massive effort.
- It requires political leadership beyond MoWSA to influence the programme and integrate KPI on CM in its result framework.
- Shortage of trained community service workforce.
- Limited availability of evidence that shows the added value of addressing CM to the objective of PSNP.
- The dilemma of whether attaching conditionalities with social protection considering that it is a right in itself.

Recommendations to leverage large-scale social protection programmes to end child marriage

- Strengthening the argument on the niche through investing on specific evidence-generation efforts.
- Advocacy at different level including donors of GPECM and UNJP-FGM programmes to influence those supporting PSNP programmes.
- High-level advocacy with key government ministries including MoA, MoH both by members of the National Alliance and UN Agencies.

Evidence on the two-way relationship
of PSNP core objective and child
marriage is critical

How can large-scale social protection and integrated social services play a role in preventing and reducing child marriage? Ghana's experience

Saphia Tamimu and Miho Yoshikawa
4 May 2023

Many Ghanaians face multiple vulnerabilities

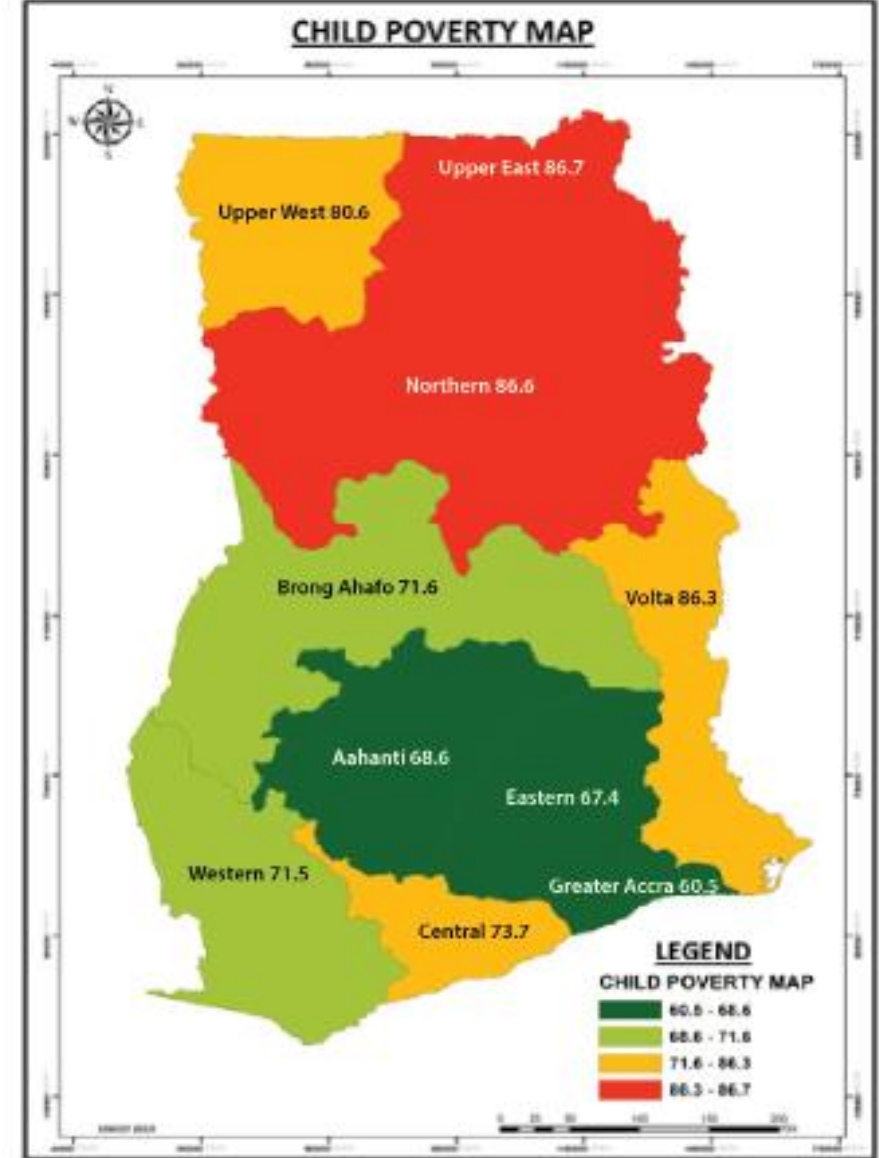

Poverty in Ghana

Multidimensional poverty is extremely high, with increasing inequality and clear disparities in access to services

7 in 10

Ghanaian children don't have access to three or more key services

Child marriage in Ghana

Linkages between child marriage and IPV

Programmatic approach

- Adopted a **system-strengthening approach** to address multidimensional and monetary poverty and root causes in an integrated manner
- Implementing two flagship initiatives: **the LEAP cash transfer programme**; and **the Integrated Social Service (ISS)**
- **National multi-sectoral coordination structure for ending child marriage** in place
- Coordinating the implementation of **the National Strategic Framework for Ending Child Marriage 2017-2026**, with LEAP and ISS incorporated
- Rolled out the Gender-Transformative Accelerator Tool in 2022 and **further integrating a gender-transformative approach into LEAP and ISS** for adolescent girls' responsive system

LEAP Cash Transfer Programme

The Livelihoods Empowerment Against Poverty (LEAP) programme is Ghana's flagship social protection programme that provides unconditional bi-monthly cash transfer to extremely poor households with a main objective of alleviating short-term poverty and encouraging long term human capital.

Increase access to healthcare services (inc. free health insurance)

Increase basic school enrolment, attendance and retention

Facilitate access to complementary services to improve welfare, livelihoods and labour productivity

Mitigate shocks that may occur from humanitarian crisis

Coverage: Over 344,185 households (1,827,035 individual beneficiaries) in all the 261 districts across the country.

Integrated Social Services (ISS) initiative

Implemented by 7 government agencies to strengthen service delivery mechanisms across sectors to address multiple vulnerabilities of children and their families in a holistic manner. **“Child marriage and adolescent pregnancy” integrated into the ISS as one of the seven primary protection concerns.**

Capacity building on case management procedures

Rollout of Social Welfare Information Management System (Primer)

Multi-sectoral referrals and service delivery

Strengthened delivery of cash+ services to LEAP beneficiaries

Integrated planning, budgeting and reporting at the district level

Social behaviour change and community engagement

2019

2020

2021

2022

2023

Started in 6-9 districts

Scale up in 60 districts

Scale up to 100 districts

Scale up to 160 districts

Scale up to 170 districts

Results – ISS and LEAP

01.

261 districts

Include child & social protection and health activities in their annual action plans with indicators aligned with key SDGs

02.

Over 6,500 social service workforce

Across 160 districts were trained on the Inter-sectoral Standard Operating Procedures

03.

175,245 people, including 90,473 children

Benefited from tailored case management and multi-sectoral referrals

04.

over 4 million people

reached by the Ghanaians Against Child Abuse (GACA) social drive and the Child Protection Community Facilitation Toolkits

05.

76% (approx. 1,388,000 people)

Cash transfer (LEAP) beneficiaries enrolled in the National Health Insurance Service (NHIS)

06.

Over 700 social workers

Use SWIMS to facilitate case management, document cases and report data on seven priority protection concerns, including child marriage and adolescent pregnancy

Lessons learnt based on evidence

Identification and reporting: Low number of reported high-risk child protection cases, such as SGBV and child marriage

Quality of services and referrals across sectors: Improved coordination and collaboration across child and social protection, GBV, education, health and justice

Social behaviour change (SBC): A less of a change in attitudes as regard to child marriage in rural communities and among less educated families

Positive impacts of LEAP on educational outcomes and reduction in IPV: LEAP has led to reduced likelihood of girls missing schools and improvement in their attendance as well as reduction in IPV among households

Public Finance Management (PFM): Need for strengthening the PFM to ensure sustainability and national ownership of ISS

Opportunities and consideration for the Phase III

- Improve **identification, reporting and referrals across sectors**, especially for stronger linkages with education and justice
- Increase **access to and quality of services**, including through the study on social protection and child marriage
- Further integrate a **gender-transformative approach** into programming (e.g. Gender analysis of existing community engagement initiatives with support from STAR)
- Ensure **the most marginalized adolescent girls access cash transfer and complementary services (cash+)** with more inclusive eligibility criteria and dynamic enrolment
- Strengthen **emergency preparedness across systems** and ensure the integration of child marriage as a key priority, including in emergency cash transfer
- Ensure **sustainability and national ownership** by restructuring the ISS governance structure, developing financing plans for ISS and exploring Public-Private Partnerships (PPP)

About Ministry of Women & Child Development

The Ministry of Women and Child Development (MWCD) is the **nodal Ministry** that works in **Mission Mode** to facilitate comprehensive support to women and children. MWCD is committed to facilitate policy, schematic and individual assistance for women and girls to ensure holistic approach of the life-cycle continuum of a woman.

Vision for the Future

Action oriented
Mission Mode of
Ministry of Women
and Child
Development

Scheme integration
and support for
women's life cycle
continuum

The future is
women- Naari
Shakti in Amrit Kaal

Inter-ministerial and
State-level
convergence

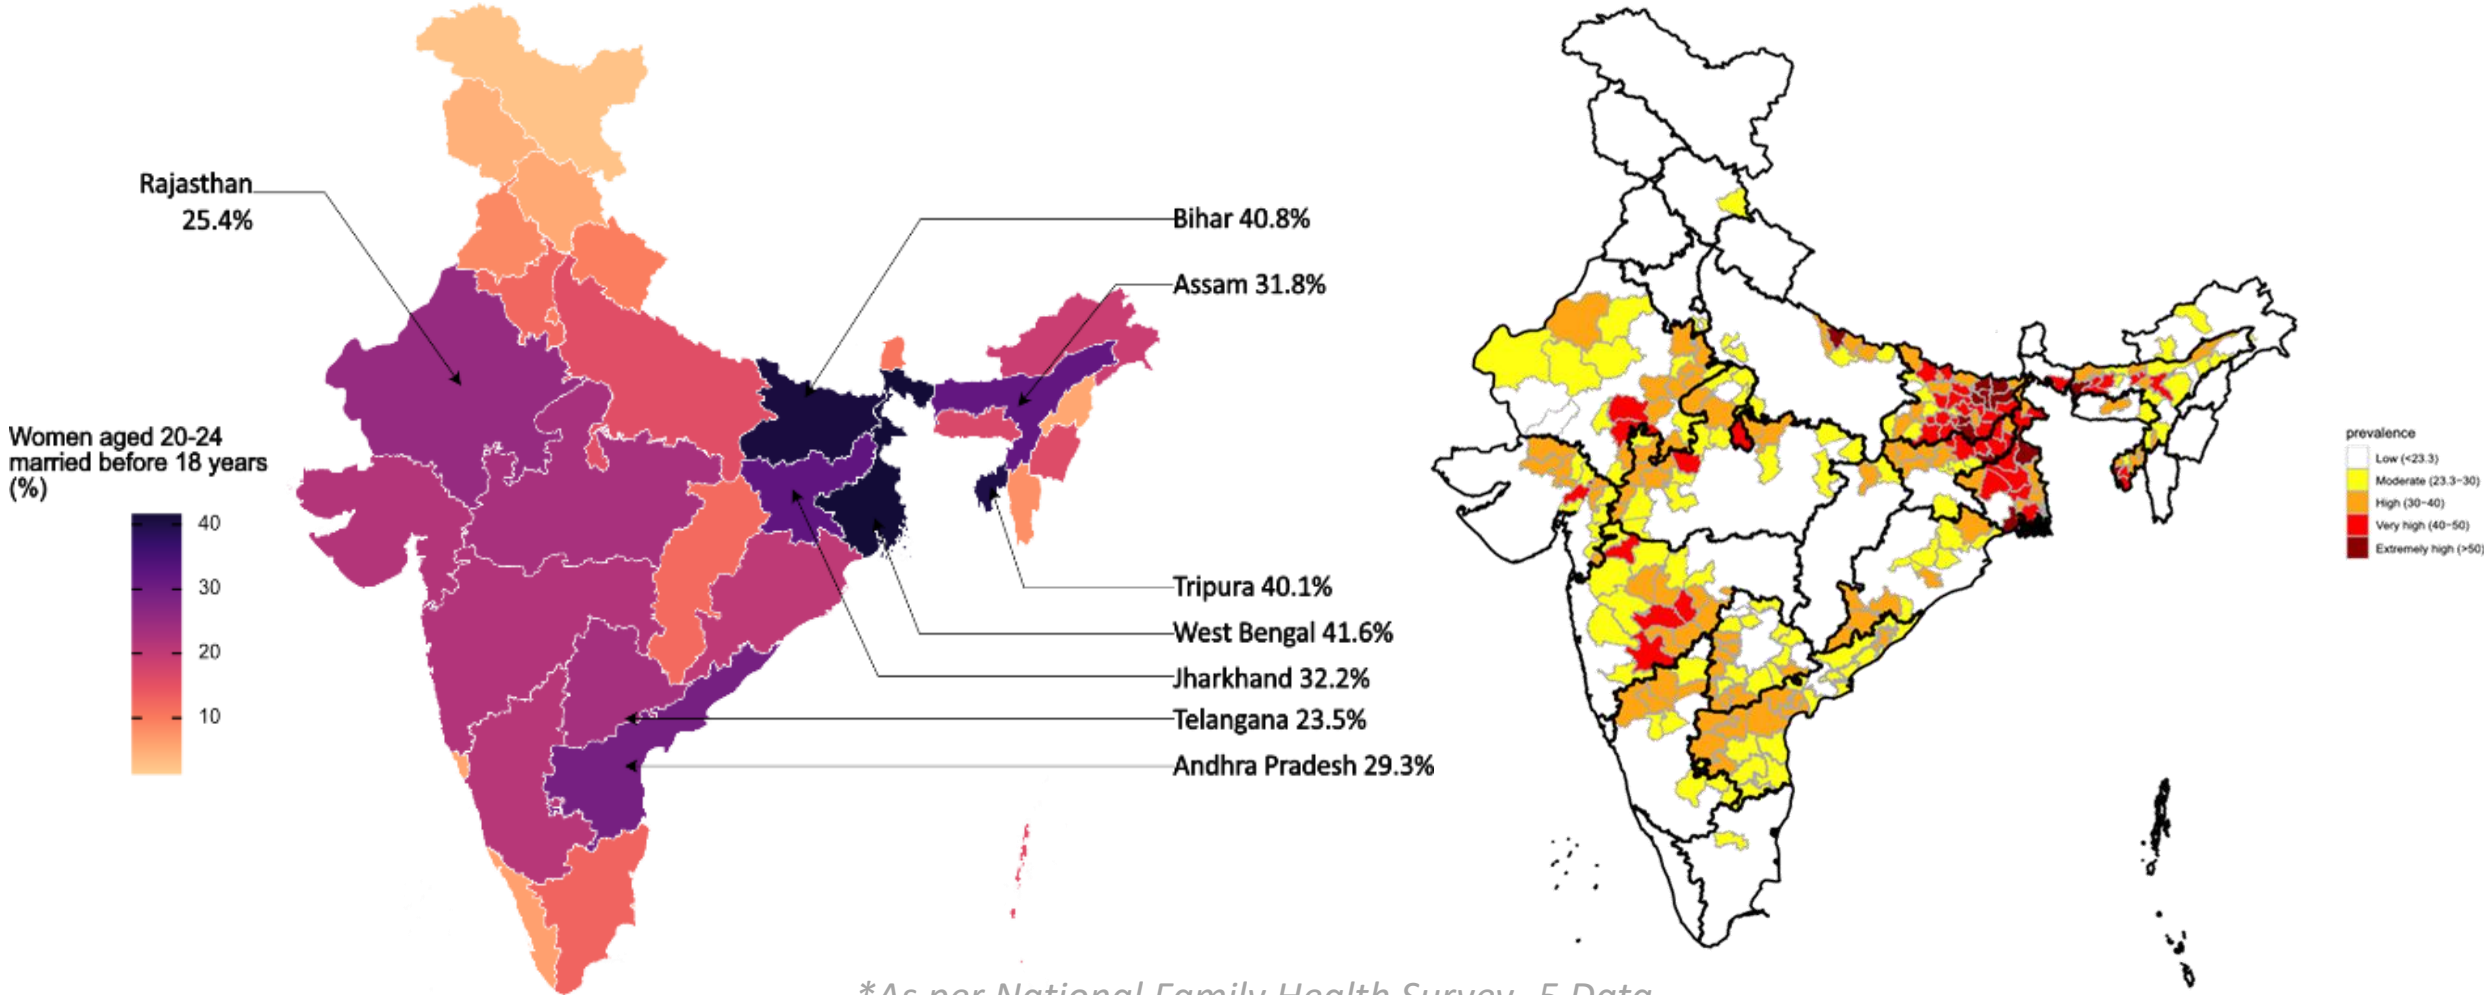

*Our Prime Minister has
"heralded a renewed age of
'Naari Shakti' in the run-up to
'Azadi ka Amrit Mahotsav' to
'Amrit Kaal'*

Child Marriage Heat Map*

Percentage of Women 20-24 years, married before 18

High Burden Districts

*As per National Family Health Survey- 5 Data

Child Marriage Trend*

The child marriage rate has been declining from NFHS 1 to NFHS 5

The steepest decline was witnessed from NFHS 3 (2005-06) to NFHS 4 (2015-16).

The rate of decline from NFHS 4 to NFHS 5 (0.7% per year) has been lesser than NFHS 3 to NFHS 4 (2.06% per year)

Mission Shakti: Integrated Women Empowerment Programme

The **objective** is to provide to all women and girls including differently-abled, socially and economically marginalized and vulnerable groups, in need of care and protection, with **short term and long-term services** and information for their **holistic development and empowerment**.

Beti Bachao, Beti Padhao

(Save Girl Child, Educate Girl Child)

A **flagship scheme** of the Government of India started in **2015**

To address the issue of **decline in child sex ratio (CSR)** in the country

Along with related issues of empowerment of girls and women, over a **life cycle continuum**

Through a nation-wide media, advocacy and outreach campaign

Along with multi-sectoral interventions in selected gender critical districts.

The scheme, which was earlier operational in 405 districts, was expanded in 2022

to cover all the districts of the country

through multi-sectoral interventions

scope widened to include of **development and participation** of girl child, in addition to protection and promotion

aim expanded to include **Skilling, Higher education, Reducing dropout, and Menstrual Hygiene**

Activities for Addressing Child Marriage under Mission Shakti

Ending child marriage is a core focus area under Sambal Component of Mission Shakti via BBBP, One Stop Centres, and Women Helpline

Mandatory Monitoring

Tracking child marriages and taking strict actions to stop them

Community Participation and Inclusion

- Special efforts to include men and boys on discussion around child marriage, gender roles, gender-based socialization, etc.
- Bal Sabhas for mobilizing and bringing together adolescents to end child marriage, violence against girls and other related issues.

Reward and Recognition

Felicitate champions who helped stop Child Marriage

Innovation

- Prevention of Early/Child Marriage to promote girls to complete their education and fulfill their dreams.
- Special efforts for prevention of child marriage on Akshaya Tithiya, organised on a massive scale in different parts of India
- Promotion of Simple Weddings (or group weddings) at right age to protect parents from financial burden of ostentatious marriage ceremonies.

Convergence With Housing & Urban Affairs

Form community watch groups for identifying the illegal practice of sex selection, child marriage.

Convergence with Education

Systematic career counselling to be provided to girls to plan their future and avoid early marriage.

ACTION PLANS Under Mission Shakti

**Hub for
Empowerment
of Women**

To facilitate inter-sectoral convergence of schemes and programs for women and girls with the mandate to create an environment in which they realize their full potential.

**National/
Central Level
(NHEW)**

**State/ UT level
(SHEW)**

**District level
(DHEW)**

Central, State and District action plans are an important tool to work in a focussed manner to end child marriage and need to be:

costed and funded appropriately

implemented with a gender-transformative approach

covering all strategies, policies and programmes to end child marriage

within and across different ministries and departments at all levels

Action Plan Features

National Annual Action Plan to be prepared by the **Central Committee**

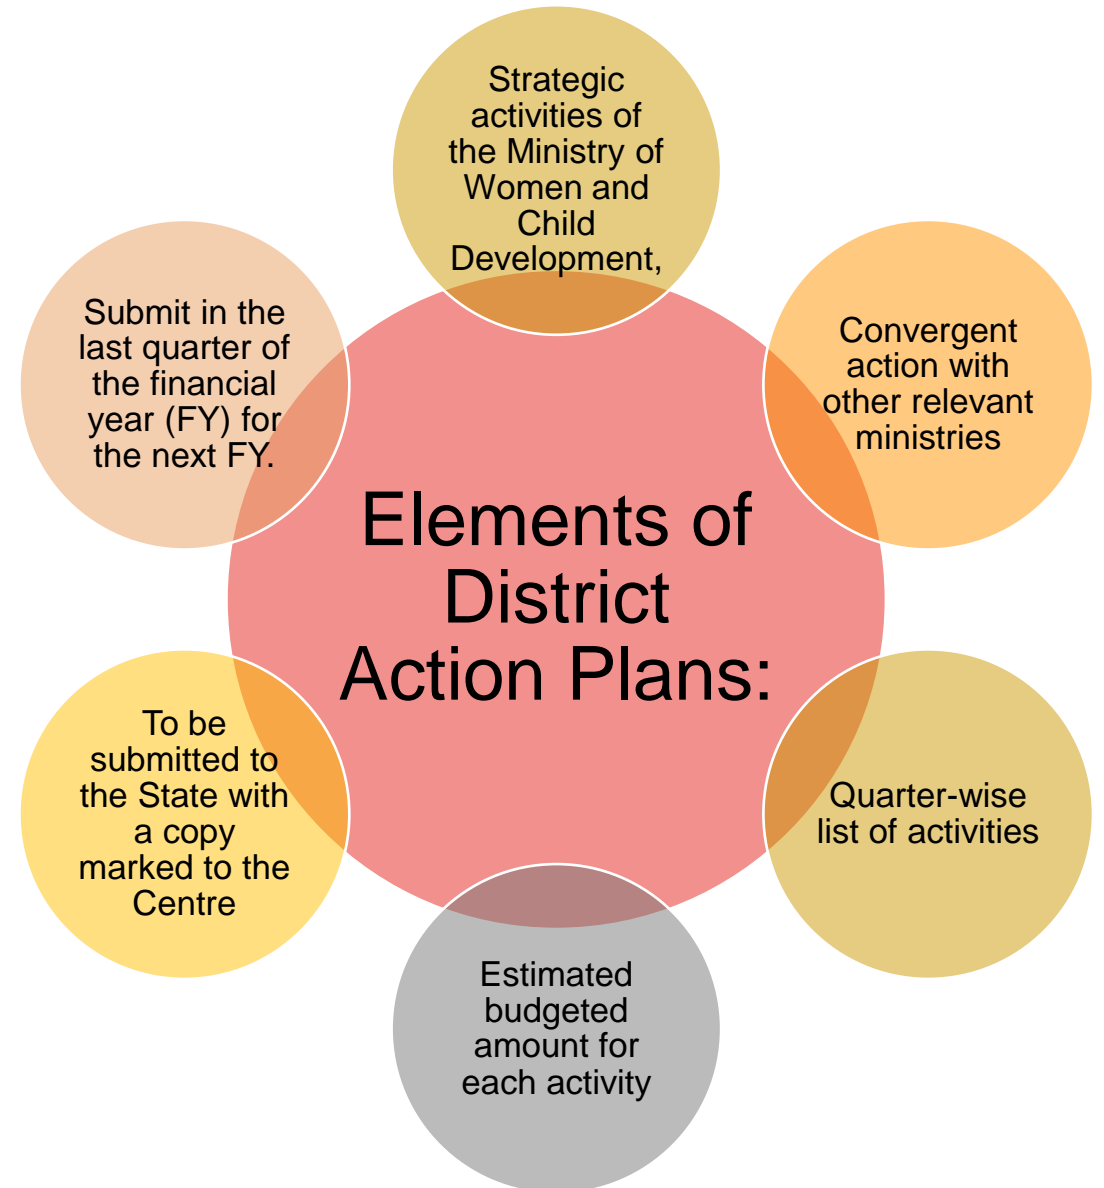

- headed by the **Secretary, MWCD**
- blueprint for other action plans

State Action Plans to be prepared by **State Level Committee**

- headed by **Chief Secretary**
- finalised by Central Committee

District Action Plans to be prepared by **Mission Shakti District Committee**

- headed by District Magistrate/District Collector
- constituting officers in charge of WCD and other nodal departments.

Other Schemes for Empowerment of Girls

Influencing national policies to leverage sector-wide approaches for ending child marriage

The Uganda experience

Lydia Najjemba Wasula
4 May 2023

Ministry of Education and Sports

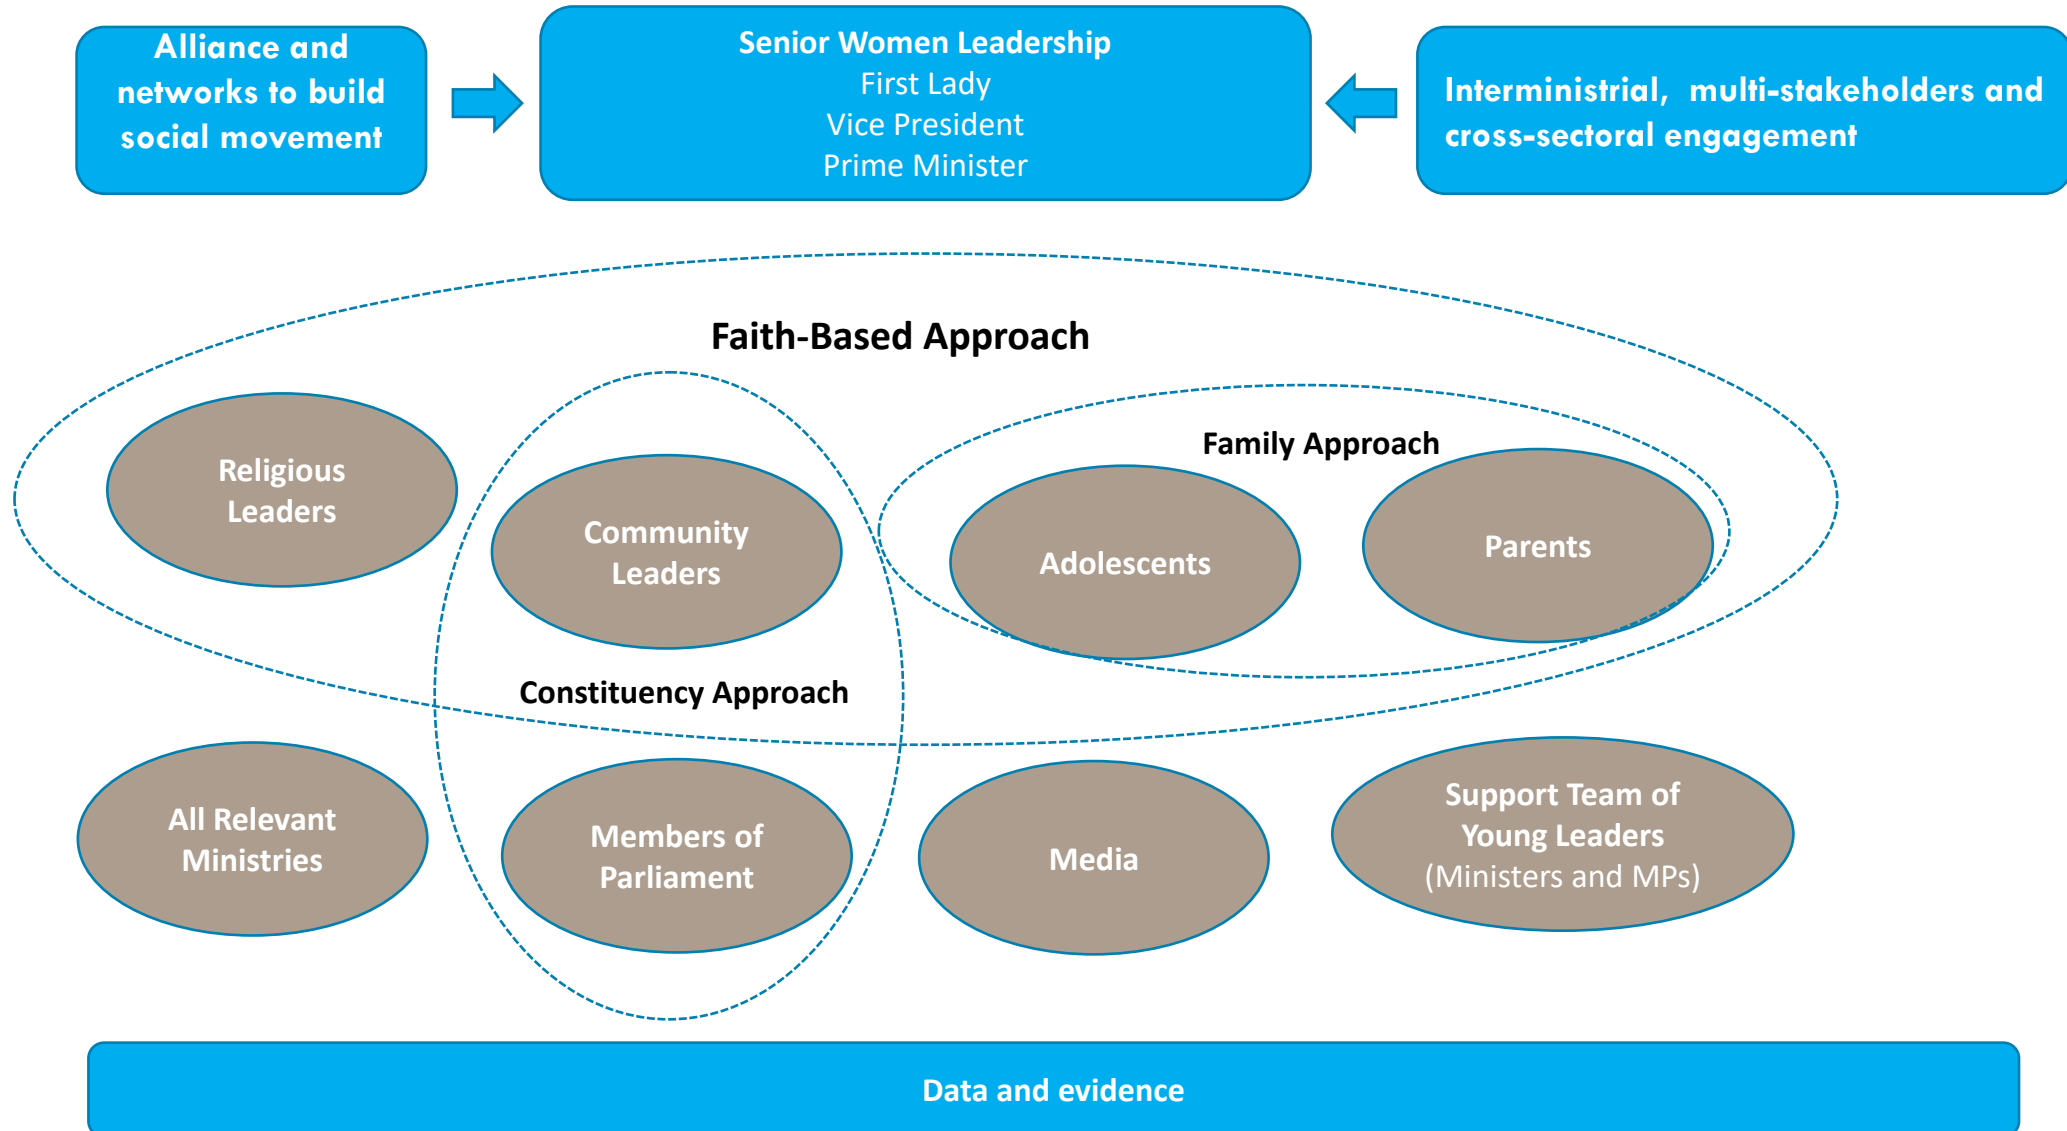

**REVISED GUIDELINES FOR THE
PREVENTION AND MANAGEMENT OF
TEENAGE PREGNANCY IN SCHOOL
SETTINGS IN UGANDA**

Uganda context

- Uganda's teenage pregnancy rate stands at 25% with an estimated five million child brides.
-
- Pregnancy contributes 25% to the school dropout rate Most girls who get pregnant are forced to marry
- Only 8% of the girls that drop out of school are given a second chance to re-enroll (MoES, 2015)
- Prolonged closure of educational institutions due to COVID 19 resulted in increased teenage pregnancies and child marriages as widely reported in the print and Electronic Media
- In 2021, about 31,566 teenage girls got pregnant monthly an equivalent of 1,052 daily – the highest in the last five years
- The right to education is nationally recognized in Uganda, but the policy frameworks are discriminatory, preventing pregnant girls from continuing with education

Re-entry of pregnant girls to school

Key achievements

- **Revised Policy guidelines (2020)**, allow pregnant girls and child mothers re-entry to school, address stigma and discrimination and standardised support for re-entry
- **13,880 child mothers were re-enrolled in school since reopening of schools after**
- **High level commitment and support**
- **A social movement to end teenage pregnancy and child marriage**
- Recovery learning, **abridged curriculum, retooling** of teachers
- **Implementation** of Re-entry guidelines
- National campaign, go back to school campaign, peer to peer support

Lessons learnt and key take aways

High level political leadership and commitment provided a platform for all key actors engage, discuss bottlenecks and make recommendations for re-entry guidelines

Dissenting voices from religious and cultural leaders, shifting positions from political leaders on practicality of implementation –need for continuous evidence-based advocacy engagement focusing on addressing contentious issues

Reluctance of pregnant adolescents, child mothers, etc. to return to school-Implementation of a 3-pronged approach national campaign – regional high-level consultations, P2P support and SBC interventions

Data and evidence for is key for influencing policy advocacy and getting stakeholders on-board

Building allies, multisectoral partnerships and consensus for policy development and implementation

An assessment of the level of integration of national and sectoral policies and plans on ending child marriage in government budgets of selected African countries

Mona Aika
4 May 2023

Objectives

01.

Assess the extent to which governments of selected countries are effectively integrating ECM policies and plans in their national and local budgets

02.

Analyse trends, adequacy, allocative efficiency and composition of public spending on a range of services and programs, across several sectors, which contribute to the prevention and response to child marriage.

03.

Map out off-budget expenditures going towards ECM activities by donors and NGOs.

04.

Identify game changers, challenges and good practices in ECM spending

05.

Generate recommendations for selected governments to improve allocation and utilisation of budgets to end child marriage

Main Findings: Policy planning and budgeting

- Supportive policy environment;
- Low integration of ECM policies and plans in government budgets;
- Negligible and mostly indirect ECM spending;
- ECM under-funded even in ministries that coordinate child protection issues;
- Development partner financing of ECM expenditure is significant;
- ECM expenditures largely recurrent.

Recommendations

- Budget Advocacy for investments in child protection systems, including ECM;
- Strengthen technical capabilities of public officials on integrated ECM planning and budgeting for ECM ;
- Integration of ECM plans into sector medium-term expenditure frameworks and annual budgets;
- Visibility of ECM in programme-based budgets

Lessons learned

- Enactment of laws, policies and plans on ECM does not translate to budget allocation;
- Holistic approach to investing in ECM;
- Limited awareness of the socio-economic consequences of CM;
- Programme or output based budgeting helps with measuring of ECM expenditures

End-Game

- ✓ **If** governments have robust evidence on role of budgets in ending child marriage and current gaps/ challenges in spending,
- ✓ **Then** they are likely to improve the quantity and quality of spending on programs to end child marriage,
- ✓ **Leading to** accelerated implementation of policies and plans to end child marriage,
- ✓ **And ultimately** attainment of SDGs and realization of children's rights.

Session 18

What is next?: Areas of agreement for moving forward

Speakers:
Nankali Maksud, UNICEF HQ
Jose Roberto Luna, UNFPA HQ

THE PHASE III

DEVELOPMENT PROCESS

What is your biggest takeaway from this week?

Quels sont les éléments principaux que vous avez retenus de cette semaine?

Quais foram os principais elementos que retirou desta semana?

1. The importance of integrated, multi-sectoral programming and systems strengthening (37%)

“Leverage linkages between integrated social services and social protection to prevent and respond to child marriage”

“Need to integrate child marriage as life saving criteria in humanitarian response”

“Not only UNICEF and UNFPA work”

- With government, girls and women, youth-led organizations, feminist organizations, health sector, education sector, tech sector, all sectors...

2. The importance of using data and evidence to guide program design and to strengthen accountability (28%)

“Embedding evidence generation in all our work”

“J'ai retenu que les études et les évaluations permettant de disposer de données probantes sont indispensables pour non seulement avancer mais pour convaincre ceux et celles qui sont réticents”

3. Many good practices exist and this knowledge is in the room. What is needed now is for this to be applied to the different country contexts

“the experiences and the learnings are there we just need to look into them and into adapting relevant ones to our context”

4. The need to take the polycrisis into account

5. The importance of scaling up efforts

6. The need to engage youth, feminist organizations and women

7. The need to leverage innovations as a critical means of scaling up programming and impact

“We have to be able to do our programming taking into account the polycrisis and the megatrends”

“The wealth of knowledge, expertise and experience in this room and beyond is mind boggling (in a positive way)”

“Time to unlearn and challenge some assumptions, and take some bold steps”

“The biggest strength of the programme, is its people. Without all the brilliant and talented people in the room, we cannot end child marriage”
